Canadians and the Natural Environment to the Twenty-First Century Neil S Forkey, 2012-06-20 Canadians and the Natural Environment to the Twenty First Century provides an ideal foundation for undergraduates and general readers on the history of Canada's complex environmental issues Through clear easy to understand case studies Neil Forkey integrates the ongoing interplay of humans and the natural world into national continental and global contexts Forkey's engaging survey addresses significant episodes from across the country over the past four hundred years the classification of Canada's environments by its earliest inhabitants the relationship between science and sentiment in the Victorian era the shift towards conservation and preservation of resources

in the early twentieth century and the rise of environmentalism and issues involving First Nations at the end of the century Canadians and the Natural Environment to the Twenty First Century provides an accessible synthesis of the most important recent work in the field making it a truly state of the art contribution to Canadian environmental history *Working for Wildlife* Janet Foster,1998-01-01 Foster shows how a small band of dedicated civil servants transformed their own goals of preserving endangered animals into active government policy The definitive history of the beginnings of wildlife conservation in Canada **The Exploited Seas** Poul Holm,Tim D. Smith,David J. Starkey,2017-10-18 The book combines the approaches of maritime history and ecological science to explore the evolution of life forms and eco systems in the ocean from a historical perspective in order to establish and develop the sub discipline of marine environmental history Documentary records relating to the human activity such as fishing plus naturally occurring paleo ecological data are analysed in order to determine the structure and function of exploited ecosystems The book is divided into four chapter groups the first concerned with Newfoundland and Grand Banks fisheries the second with the potential of historical sources to provide a history of marine animal populations the third explores the development of fisheries in the southern hemisphere during the twentieth century and the final section explores the limitations of data and existing analysis of whale populations The epilogue reiterates the suggestion that collaboration between historians and biologists is the key to furthering the sub discipline Reclaiming the Don Jennifer L. Bonnell,2014-09-24 A small river in a big city the Don River Valley is often overlooked when it comes to explaining Toronto s growth With Reclaiming the Don Jennifer L Bonnell unearths the missing story of the relationship between the river the valley and the city from the establishment of the town of York in the 1790s to the construction of the Don Valley Parkway in the 1960s Demonstrating how mosquito ridden lowlands frequent floods and over burdened municipal waterways shaped the city s development Reclaiming the Don illuminates the impact of the valley as a physical and conceptual place on Toronto s development Bonnell explains how for more than two centuries the Don has served as a source of raw materials a sink for wastes and a place of refuge for people pushed to the edges of society as well as the site of numerous improvement schemes that have attempted to harness the river and its valley to build a prosperous metropolis Exploring the interrelationship between urban residents and their natural environments she shows how successive generations of Toronto residents have imagined the Don as an opportunity a refuge and an eyesore Combining extensive research with in depth analysis Reclaiming the Don will be a must read for anyone interested in the history of Toronto s development *A Cold Colonialism* Tina Adcock,2025-06-01 Exploration has long been pivotal to southern engagements with northern Canada but it is most often associated with the nineteenth century or earlier A Cold Colonialism offers the first extended examination of twentieth century exploration in the Canadian North Modern exploration helped southerners establish and maintain distinctive kinds of colonial and settler colonial power over northern Indigenous homelands Who explored the North between 1918 and 1965 What forms did exploration take What did it mean to explorers

and others affected by it Tina Adcock focuses on four representative explorers with richly documented careers mining engineer George Douglas surveyor Guy Blanchet ethnologist Vilhjalmur Stefansson and filmmaker Richard Finnie Despite limited experience in and knowledge of the Canadian North these explorers helped southern militaries industries and governments exert control over northern peoples and their lands Each also claimed belonging in and authority over the North in ways that still resonate among southern settlers in Canada today *Game in the Garden* George Colpitts,2010-10-01 Frontier and pioneer societies provide numerous unexplored avenues of social history *Game in the Garden* identifies the imaginative use of wild animals in early western society In what is now western Canada humans have long used wildlife in order to survive their surroundings better understand their natural world and form aspects of their identity The shared use of wild animals has helped to determine social relations between Native peoples and newcomers In later settlement periods controversy about subsistence hunting and campaigns of local conservation associations drew lines between groups in communities particularly Native peoples immigrants farmers and urban dwellers In addition to examining grassroots conservation activities Colpitts identifies early slaughter rituals iconographic traditions and subsistence strategies that endured well into the interwar years in the twentieth century Drawing primarily on local and provincial archival sources he analyzes popular meanings and booster messages discernible in taxidermy work city nature museums and promotional photography Environmental historians Native studies specialists history students conservationists nature enthusiasts and general readers alike will find fascinating how western attitudes to wild animals changed according to subsistence and economic needs and how wildlife helped to determine the social relations among people in western Canada *Wildlife, Conservation, and Conflict in Quebec, 1840-1914* Darcy Ingram,2013-04-29 Despite the popular assumption that wildlife conservation is a recent phenomenon it emerged over a century and a half ago in an era more closely associated with wildlife depletion than preservation In *Wildlife Conservation and Conflict in Quebec* Darcy Ingram explores the combination of NGOs fish and game clubs and state administered leases that formed the basis of a unique system of wildlife conservation in North America Inspired by a longstanding belief in progress improvement and social order based on European as well as North American models this system effectively privatized Quebec s fish and game resources often to the detriment of commercial and subsistence hunters and fishers *Hunters at the Margin* John Sandlos,2011-11-01 *Hunters at the Margin* examines the conflict in the Northwest Territories between Native hunters and conservationists over three big game species the wood bison the muskox and the caribou John Sandlos argues that the introduction of game regulations national parks and game sanctuaries was central to the assertion of state authority over the traditional hunting cultures of the Dene and Inuit His archival research undermines the assumption that conservationists were motivated solely by enlightened preservationism revealing instead that commercial interests were integral to wildlife management in Canada **J.B. Harkin** E. J. (Ted) Hart,2010-01-19 Many of Canada s superb national parks owe their existence to James Bernard Harkin 1875 1955 the first

commissioner of Canada's new Dominion Parks Branch in 1911 Ted Hart follows Harkin's career from his apprenticeship in the Department of the Interior to his retirement in 1936 and presents Harkin as a major force in early Canadian parks and wildlife conservation He supported Canadian wildlife conservation at its inception created the world's first park service and developed major park policies Conservationists serious history enthusiasts and those with an interest in Canada's national parks will enjoy this biography of a multifaceted and significant individual *Quebec Serge Courville*,2009-01-01 In this richly documented work Serge Courville tells the geographical history of Quebec from the appearance of the first humans through to the present day This detailed and erudite book maps major stages of Quebec's development providing a geographical record of the many social relationships that over time created a sense of place Landscape Courville shows is the keeper of memory the record of successive changes and a witness to the genesis of the new Places that were once agricultural then left to waste and ruin are today revived by tourism Areas that now house office buildings were long ago open playgrounds where children ruled Drawing on vast research Courville shows how in spite of the turbulence Quebec often endures or perhaps because of it the land itself may be seen as an important participant in the history of its peoples Quebec A Historical Geography was originally published by Les Presses de l'Universit  Laval as Le Qu bec Gen ses et mutations du territoire

Mary Louise McAllister,2011-11-01 Popular rhetoric suggests that the twenty first century has ushered in an era of homogeneity Urbanization globalization amalgamation media conglomeration and technological convergence have become familiar terms Given the pressures of integration and assimilation how are people within communities able to make decisions about their own environment whether individually or collectively To what extent can they govern themselves Governing Ourselves explores issues of influence and power within local institutions and decision making processes using numerous illustrations from municipalities across Canada It shows how communities large and small from Toronto to Iqaluit have distinctive political cultures and therefore respond differently to changing global and domestic environments Case studies of Prince George Sherbrooke Saint John and Kitchener Waterloo are used to illuminate historical and contemporary challenges to local governance This stimulating book covers traditional topics such as government structures and institutions and intergovernmental relations It also reaches more broadly into areas of inquiry relevant to geography urban planning environmental studies public administration sociology and Canadian studies
