Don DeLillo David Cowart, 2012-08-15 Don DeLillo author of twelve novels and winner of the National Book Award the PEN Faulkner Award the William Dean Howells Medal and the Jerusalem Prize has begun to rival Thomas Pynchon as the definitive postmodern novelist Always thought provoking and occasionally controversial DeLillo has become the voice of the bimillennial moment Charting DeLillo's emergence as a contemporary novelist of major stature David Cowart discusses each of DeLillo's twelve novels including his most recent work *The Body Artist* 2001 Rejecting the idea that DeLillo lacks affinities across the cultural spectrum Cowart argues that DeLillo's work invites comparison with that of wide range of antecedents including Dunbar Whitman Wittgenstein Heidegger Freud Lacan Derrida Hemingway Joyce Rilke and Eliot At the same time Cowart explores the ways in which DeLillo's art anticipates parallels and contests ideas that have become the common currency of poststructuralist theory The major site of DeLillo's engagement with postmodernism Cowart argues is language which DeLillo represents as more mysterious numinous even than current theory allows For DeLillo language remains what Cowart calls the ground of all making Don DeLillo *The Physics of Language* is a provocative investigation of the most compelling issues of contemporary fiction

Consuming Surrealism in American Culture Sandra Zalman, 2017-07-05 Consuming Surrealism in American Culture Dissident Modernism argues that Surrealism worked as a powerful agitator to disrupt dominant ideas of modern art in the United States Unlike standard accounts that focus on Surrealism in the U S during the 1940s as a point of departure for the ascendance of the New York School this study contends that Surrealism has been integral to the development of

American visual culture over the course of the twentieth century Through analysis of Surrealism in both the museum and the marketplace Sandra Zalman tackles Surrealism's multi-faceted circulation as both elite and popular Zalman shows how the American encounter with Surrealism was shaped by Alfred Barr William Rubin and Rosalind Krauss as these influential curators mobilized Surrealism to compose to concretize or to unseat narratives of modern art in the 1930s 1960s and 1980s alongside Surrealism's intersection with advertising Magic Realism Pop and the rise of contemporary photography As a popular avant garde Surrealism openly resisted art historical classification forcing the supposedly distinct spheres of modernism and mass culture into conversation and challenging theories of modern art in which it did not fit in large part because of its continued relevance to contemporary American culture German-American Cultural Relations, 1976

American Studies Talmadge Anderson, James Benjamin Stewart, 2007 There is an ongoing debate as to whether African American Studies is a discipline or multidisciplinary or interdisciplinary field Some scholars assert that African American Studies use a well-defined common approach in examining history politics and the family in the same way as scholars in the disciplines of economics sociology and political science Other scholars consider African American Studies multidisciplinary a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses be they anthropological psychological historical etc to study the African world experience In this model the boundaries between traditional disciplines are accepted and researches in African American Studies simply conduct discipline-based analysis of particular topics Finally another group of scholars insists that African American Studies is interdisciplinary an enterprise that generates distinctive analyses by combining perspectives from d **Decentering America** Jessica C. Gienow-Hecht, 2007 This is an introduction for academics students and political analysts to some of the latest trends in the study and state of culture and international history modernity NGOs internationalism cultural violence the Romance of Resistance and the culture of diplomacy **Alcoholism in North America, Europe, and Asia** John E. Helzer, Glorisa J. Canino, 1992 This volume represents a landmark in the important and rapidly expanding literature of cross-cultural epidemiology that has been made possible by the worldwide popularity of the DSM III and the multi-national use of a single

survey instrument the Diagnostic Interview Schedule DIS Reviewing population survey findings across ten regions of North America Europe and Asia this study is the first direct cross national comparison of personal interview data on alcoholism including prevalence rates and risk factors The book carefully describes the background of the various surveys and the methods of analysis and comparison Chapters on each region describe the prevalence of drinking problems the symptomatic expression of alcoholism in that culture aspects of the cultural background that are relevant to drinking behavior and the association between alcoholism and other psychiatric disorders Of particular importance in this volume is the inclusion of a chapter on alcoholism in the Socialist Republic of China from which very little scientific information has been readily available The inclusion of eastern and western cultural perspectives offers insight into both universal and culturally distinct aspects of alcoholism The volume is essential reading for psychiatrists epidemiologists sociologists and alcohol theorists researchers and clinicians *American Studies International*, 1997

Americanism and Americanization Mel van Elteren, 2006-09-28 With the current state of foreign affairs the terms Americanism and Americanization sometimes take on an unexpected and an unflattering connotation Americanism essentially involves values beliefs ideals goods and practices in local settings outside the United States that are in some way related or attributed to American influence While the validity of this influence may be under scrutiny it requires a detailed historical and sometimes cultural analysis to understand all the dynamics and implications of Americanization A variety of factors contributes to this influence including the preoccupation and reception of the relevant culture itself For instance many European countries have at times demonstrated a preoccupation with all things American which was not necessarily swayed by any action of America itself The overall actualization of Americanization however encompasses a number of societal dimensions including power differentials in the exchange processes concerned Informed by a history of relevant developments since the early nineteenth century this volume presents an in depth critical analysis of the Americanization process Beginning with a survey of early European preoccupations with things American the book goes on to discuss European concerns regarding American influence after World War II The work then looks at Americanism and its influence within the United States itself especially regarding developments during the New Deal and beyond The primary goal of the analysis is the construction of an interpretative framework allowing for a more balanced approach to the study of Americanism abroad Written from a critical social emancipatory perspective the author's approach blends economic military social political cultural and psychological dimensions as well as an examination of the ways in which these areas interact Finally Americanism is examined as part of a U S style corporate globalization at the current juncture Instructors considering this book for use in a course may request an examination copy here *The Making of European Consumption* P. Lundin, T.
