**Over Empires and Oceans** Robert Bluffield, 2014-11-19 This a story of pioneers intrepid aviators adventurers tycoons and innovators It is also a story of dedication and determination for despite fixed wing aircraft proving their value over the battlefields of the Western Front during the First World War convincing governments and public alike that they had a role in peacetime proved far more challenging The Americans as inventors of heavier than air powered flight had briefly courted with a passenger airline across Tampa Bay in 1914 yet it took a further nine years for mail to be flown coast to coast In 1919 a British company made the first international scheduled flight between London and Paris but the continuation of regular services was thwarted by a less than enthusiastic government that allowed its generously subsidised French competition for a short time at least to fly cross Channel passenger schedules unimpeded The British eventually realized that fast links with their Empire were vital followed the example of the French and Dutch who had forged air links with their cousins in North Africa and the Far East Meanwhile in South America the Germans forbidden under the Versailles Treaty from any major aircraft building were establishing cunning supremacy by forming airlines throughout South America and in China While America awaited a transcontinental passenger service Juan Trippe s Pan American Airways was crossing swords with Ralph O Neill of New York Rio Buenos Aires Line NYRBA for air supremacy between the US Brazil Argentina and elsewhere in Latin America that led to the formation of arguably the world s greatest airline In Russia Igor Sikorsky had built a vast passenger carrying aircraft the Il ya Muromets and politicians debated whether giant airships or fixed wing aircraft should rule the skies an issue that was put firmly to bed when the mighty German airship Hindenburg exploded while mooring at Lakehurst in 1937 Robert Bluffield s highly researched and detailed account tells the dramatic stories of explorers such as Kingsford Smith Lindbergh and Cobham and flamboyant entrepreneurs some well known others forgotten who risked fortunes and reputations to follow their dreams of reaching and ruling the skies over empires continents and oceans Against bewildering adversity corruption underhanded deals and dwindling resources these tenacious individuals braved the elements using primitive entirely unsuitable equipment to establish earth shrinking aerial services that criss crossed the great oceans and the globe s most inhospitable territories These are the stories of those pioneers of A ropostale CNAC Air Orient Imperial Airways KLM Deutsche Luft Hansa Pan Am SCADTA The Condor Syndicat Qantas and others that had a far reaching impact on the way the modern world would travel

[Flying Down to Rio](#) Rosalie Schwartz, 2004-10-11 In this book author Rosalie Schwartz uses the 1933 RKORadio Pictures production Flying Down to Rio to examine the interplay of technology and popular culture that shaped a distinctive twentiethcentury sensibility The musical comedy connected

*Barnstormers, Wing-Walking and Flying Circuses* Peter C. Brown,2022-04-21 While large numbers of aeroplanes had been produced In America for the war effort overseas at the Western Front it was found that that the British French and Germans were far ahead of them when it came to flight technology which led to a huge surplus of aeroplanes in the United States The government s solution to recover some of the money was to sell the surplus stock off for as little as 200 dollars each With no licence being required to fly a plane the offer attracted many ex fighter pilots as well as civilians who

developed a new American pastime known as barnstorming Part entertainers part thrill seekers the barnstormers made their way across the country as solo acts and in groups called Flying Circuses The American flier Ormer Locklear wowed the crowds by climbing out of his aeroplane and walk along the wing and it wasn't long before flying circuses held less appeal for spectators if it didn't have a wing walking act Handstands jumps across planes and even the odd game of tennis were attempted by barnstormers to attract larger paying audiences In 1936 the US Government banned wing walking under 1 500 ft which doomed aerial stunting and while a few wing walking teams operated in the 1970s it wasn't until barnstormer Vic Norman founded his famous AeroSuperBatics wing walking team in the early 1980s that the sight of daredevils hand standing and flying upside down on the wing was seen in Europe Several teams around the world subsequently formed using aeroplanes such as the Boeing Stearman or the Curtiss Jenny biplanes to wow crowds as a part of regular air displays and their appeal has continued to rise since the 2000s

**Pilots' Directions** William Matthew Leary,1990 **Air Power History** Sebastian Cox,Peter Gray,2013-11-05 The 20th century saw air power transformed from novelists fantasy into stark reality From string and canvas to precision weaponry and stealth air power has progressed to become not only the weapon of first political choice but often the only conceivable option This rapid development has given rise to considerable debate and controversy with those holding entrenched views rarely slow to shout their case Many myths have grown over the period ranging from the once much vaunted ability of air power to win wars alone through to its impact as a coercive tool This volume examines the theory and practice of air power from its earliest inception The contributors have been drawn from academia and the military and represent some of the world's leading proponents on the subject All significant eras on air power employment are examined some are evidently turning points while others represent continuous development Perhaps more importantly the book highlights the areas that could be considered to be significant and invites the reader to enter the debate as to whether it constitutes a continuum a turning point or indeed a revolution

**Echoes from Dawn Skies** Frederick Warren Merriam, 2022-05-05 No one could doubt that Frederick Warren Merriam was one of the earliest and most important of Britain's aviation pioneers Indeed he taught many of the others to fly men such as Air Chief Marshal Sir Philip Joubert de la Ferte Air Commodore P F M Fellowes who led the aerial Houston Everest Expedition and Sub Lieutenant R A J Warneford VC the first pilot to down a Zeppelin In his later years Merriam decided that he wanted to compile a book that presented a more personal and intimate picture than has yet been produced by aviation history writers of the civil pioneers of British flying It was no simple task Some two years ago Merriam continued I conceived an idea and set to work most energetically to hunt up all the survivors of those wonderful

days to ask them if they would each contribute a story of a personal nature something that had never before been published It was a tall order and admittedly my hopes were not too high of finding sufficient material of the sort to fill a book A tireless search ensued for more than a year Many obstacles and disappointments assailed me Of some oldtimers no trace could be found others had passed on and one or two were too tired to trouble However after a little gentle persuasion many made the effort The remarkable collection of stories that Merriam gathered together was never published his death in 1956 curtailing the project For more than sixty years the manuscript lay hidden away all but forgotten until it was rediscovered in 2013
