Jasper Knight, Christian M. Rogerson, 2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South Race, Ethnicity, and Place in a Changing America, Third Edition

John W. Frazier, Eugene L. Tettey-Fio, Norah F. Henry, 2017-01-12 This book examines major Hispanic African and Asian diasporas in the continental United States and Puerto Rico from the nineteenth century to the present with particular attention on the diverse ways in which these immigrant groups have shaped and reshaped American places and landscapes Through both historical and contemporary case studies the contributors examine how race and ethnicity affect the places we live work and visit illustrating along the way the behaviors and concepts that comprise the modern ethnic and racial geography of immigrant and minority groups While primarily addressed to students and scholars in the fields of racial and ethnic geography these case studies will be accessible to anyone interested in race place connections race ethnicity boundaries the development of racialization and the complexity of human settlement patterns and landscapes that make up the United States and Puerto Rico Taken together they show how individuals and culture groups through their ideologies social organization and social institutions reflect both local and regional processes of place making and place remaking that

occur within and beyond the continental United States      **The Impact of Climatic Variations on Agriculture** M.L. Parry, T.R. Carter, N.T. Konijn, 2012-12-06 Three important studies were initiated in the 1970s to investigate the relationship between climatic variations and agriculture by the National Defense University 1980 on Crop Yields and Climate Change to the Year 2000 by the U.S. Department of Transportation 1975 on Impacts of Climatic Change on the Biosphere and by the U.S. Department of Energy 1980 on Environmental and Societal Consequences of a Possible CO<sub>2</sub> Induced Climatic Change the CIAP 2 study These were pioneering projects in a young field Their emphasis was on measuring likely impacts of climatic variations rather than on evaluating possible responses and they focused on first order impacts e.g. on crop yields rather than on higher order effects on society A logical next step was to look at higher order effects and potential responses as part of a more integrated approach to impact assessment This was undertaken by the World Climate Impact Program WCIP which is directed by the United Nations Environment Program UNEP The WCIP is one of four aspects of the World Climate Program which was initiated in 1979      Place, Migration and Development in the Third World Lawrence A. Brown, 2002-09-11 Providing a fresh examination of the nature of Third World development the author focuses on the characteristics of particular places and regions and their influences on behaviour This is an important study of the relationship between population movements and regional and national changes      **Geography Inside Out** Richard Symanski, 2002-06-01 Taking sharp aim at complacent geography scholars this irreverent book turns the world of academic geography upside down The author a foremost figure in the field joins forces with his alter ego the incorrigible Korski to draw fire from his own personal and professional experience No one knows better than they the stuffy censorship and skewed logic that inform the geography establishment and stifle the valiant geographer and they tell all With an unsparing eye Geography Inside Out exposes a discipline soiled by cerebral litter and shamed by intellectual cowardice Symanski shows no mercy for the pompous the mediocre or the hypocritical And he reveals the devastating truth about a geographer blackballed for life for writing about prostitution and for his intellectual attack of a major figure within the discipline A shrewd look at high profile geographers this book sheds light on how geographers write and think It also helps explain why geography has long been seen as the poor and neglected sister of the social sciences Unprecedented in subject and scope Geography Inside Out is certain to be as controversial as it is edifying      **War on Hunger**, 1974      **Colonialism in Africa 1870-1960: Volume 5, A Bibliographic Guide to Colonialism in Sub-Saharan Africa** L. H. Gann, Peter Duignan, 1969 A comprehensive study of recent African history examining the political social and economic effects of colonialism      **The Changing Face of Land and Conservation in Post-colonial Africa** George Barrett, Shirley Brooks, Jenny Josefsson, Nqobile Zulu, 2016-03-22 The year 2013 marked the 100th anniversary of the 1913 Land Act in South Africa which legalised the violent dispossession and alienation of the African majority from the land It is common cause that the alienation of land for conservation purposes introduced to Africa under colonial rule has continued more or less uninterrupted until today However while nature

conservation practices inevitably raise challenging questions relating to land and land use there has thus far been little concentrated effort to bring together scholars working on the land question particularly around issues of land tenure with those whose work focuses on questions of nature construction and the social impacts of conservation in an African context Compiled from research presented at a ground breaking interdisciplinary conference held at Rhodes University in Grahamstown South Africa in 2012 the chapters in this book made their first appearance in a special issue of the Journal of Contemporary African Studies JCAS in July 2013 The book brings critical interdisciplinary analyses of the complex interrelations between contemporary neoliberal conservation practices in post colonial Africa into conversation with the well trodden territory of land use and contested land issues on the continent Anchored by an intellectual curiosity about the extent to which past practices continue into the present and with what consequences the book provides fresh insights into the complex relationship between land and conservation in contemporary Africa

**Imperial Footprints** James L. Newman, 2004 Dr Livingstone I presume The man who uttered those famous words was compared with Christopher Columbus in his day and became one of the late nineteenth century's most newsworthy figures Yet one hundred years after Henry Morton Stanley's death his accomplishments in Africa have largely receded from public memory or have been discredited as epitomizing the wrongs inflicted by the scourge of European colonialism and its scramble for Africa While numerous writers have attempted to describe the man sometimes through highly speculative means our understanding of the most notable aspect of Stanley's life his relationship to the continent isn't much more advanced than it was one hundred years ago To fill this void James L Newman re-creates Stanley's seven epic African journeys explaining why he made them what transpired en route and what resulted He highlights Stanley's determination to succeed despite incredible odds and his various relationships with the people who enabled him to accomplish his objectives And while he acknowledges Stanley's less admirable traits such as his penchant for stretching the truth his capacity to be ruthless and his tendency to demean others Newman refuses to engage in facile speculation Instead he focuses on the words and deeds of a man who played a major role in shaping today's Africa James L Newman's in-depth research detailed descriptions and vivid prose make Stanley and Africa both a fascinating read and a notable contribution to the study of Africa exploration and the age of empire
