Contemporary Capitalism:

Max Weber and Contemporary Capitalism N. Gane, 2012-09-10 This book explores the uses and limits of Max Weber's work for thinking sociologically about capitalism today. The book argues that through Weber a network of concepts can be developed that can frame a sociological analysis of the present.

Transformations of Contemporary Capitalism David Evans, 2023-10-02 In recent decades there has been many attempts to describe, explore and explain the new post modern capitalism of the twenty first century. In this context this book looks at one of the most exciting strands of this research in the late twentieth century: the flexible specialisation research programme (FSRP). Drawing on the history of ideas, discourse and literature on capitalism of the last four decades, this book shows that although flexible specialisation anticipated some of the ways in which capitalism was being transformed in the late twentieth century, they underestimated and failed to anticipate the forms of creative destruction and corporate digital control which were becoming embedded in the global capitalist accumulation dynamic itself. The sudden disappearance of the Soviet Union and the end of history failed to open up the pathway for new forms of modern social democracy but gave rise instead to the new digital Behemoths. Today the classical tendencies of capitalism as anticipated by Marx are all too present and despite talk of post capitalism and digital techno feudalism, the landscape of monopoly finance capital has consolidated itself. The book counterposes the FSRP with the various Marxist interpretations of the capitalist transition together with the wider social and economic theories that emerged in the first decades for the twenty first century around, for example, the great acceleration, de-growth and post-growth. This book will be of interest to all readers concerned with heterodox political economy, critical social theory, intellectual history and above all the prospects for social transformation leading to social justice and an egalitarian enlightenment.

Contemporary Capitalism J. Rogers Hollingsworth, Robert Boyer, 1997 This book argues that there is no single best institutional arrangement for organizing modern societies. Therefore, the market should not be considered the ideal and universal arrangement for coordinating economic activity. Instead, the editors argue the economic institutions of capitalism exhibit a large variety of objectives and tools that complement each other and can not work in isolation. The various chapters of the book ask what logics and functions institutions follow and why they emerge, mature and persist in the forms they do.

Contemporary Capitalism and Marxist Economics Jacques Gouveneur, 1983-01-01

The Implosion of Contemporary Capitalism Samir Amin, 2013-09-01 Renowned political economist Samir Amin engaged in a unique lifelong effort both to narrate and affect the human condition on a global scale. Bringing his analysis up to the present, the world of 2013, the key events of our times: financial crisis, the emerging nations, globalization, financialization, political Islam, Euro zone implosion are related in a

coherent historically based account Changes in contemporary capitalism require an updating of definitions and analysis of social classes class struggles political parties social movements and the ideological forms in which they express their modes of action in the transformation of societies Amin meets this challenge and lays bare the reality of monopoly capitalism in its general global form Ultimately Amin demonstrates that this system is not viable and that the implosion in progress is unavoidable Whether humanity will rise to the challenge of building a more humane global order free of the contradictions of capital however is yet to be seen

A Political Economy of Contemporary Capitalism and its Crisis Dimitris

Sotiropoulos, John Milios, Spyros Lapatsioras, 2013-06-19 The recent financial meltdown and the resulting global recession have rekindled debates regarding the nature of contemporary capitalism This book analyses the ongoing financialization of the economy as a development within capitalism and explores the ways in which it has changed the organization of capitalist power The authors offer an interpretation of the role of the financial sphere which displays a striking contrast to the majority of contemporary heterodox approaches Their interpretation stresses the crucial role of financial derivatives in the contemporary organization of capitalist power relations arguing that the process of financialization is in fact entirely unthinkable in the absence of derivatives The book also uses Marx's concepts and some of the arguments developed in the framework of the historic Marxist controversies on economic crises in order to gain an insight into the modern neoliberal form of capitalism and the recent financial crisis Employing a series of international case studies this book will be essential reading for all those with an interest in the financial crisis and all those seeking to comprehend the workings of capitalism

Classes in Contemporary Capitalism Nicos Poulantzas, 2018-01-01 Nicos Poulantzas's third major work is a pioneering survey of some of the most fundamental yet least studied aspects of the class structure of advanced capitalist societies today The book starts with a general theoretical essay that for the first time seriously explores the distinction between the agents and positions of capitalist relations of production and seeks to avoid the typical errors of either functionalism or historicism It also provides a polemical reconsideration of the problem of the nation state as a political unit today and its relationship to the internationalization of capital Finally and most originally Poulantzas develops a long and powerful analysis of the much abused concept of the petty bourgeoisie In this he scrupulously distinguishes between the traditional categories of petty bourgeoisie shopkeepers artisans small peasants and the new categories of clerical workers supervisors and salaried personnel in modern industry and commerce At the same time he demonstrates the reasons why a unitary conceptualization of their class position is possible The difficult question of the definition of productive and unproductive labor within Marx's own account of the capitalist mode of production is subjected to a novel and radical reinterpretation The political oscillations peculiar to each form of petty bourgeoisie and especially their characteristic reactions to the industrial proletariat are cogently assessed Poulantzas ends his work with a reminder that the actions and options of the petty bourgeoisie are critical to any successful struggle by the working class which must secure the alliance of important sections of the petty bourgeoisie

if the fateful experience of Chile is not to recur elsewhere tomorrow Combining empirical and theoretical materials throughout *Classes in Contemporary Capitalism* represents a notable achievement in the development of Marxist social science and political thought *Political Economy and Contemporary Capitalism* Ron P. Baiman, Heather Boushey, Dawn Saunders, 2015-02-12 This volume covers the theoretical method macroeconomics microeconomics international trade and finance development and policy of economic theory It incorporates various alternative approaches as well as a broad spectrum of policy issues *Property in Contemporary Capitalism* Paddy Ireland, 2024-07-31 Amid the shift towards neoliberalism and the privatization of resources this book provides a radical new lens to view property and property theory Boldly challenging the conventional theories of property law that have shaped our understanding for centuries leading expert Paddy Ireland explores the rise and growth of new intangible property forms the nature of investment and of property as capital and the empirical realities of modern property Raising broader questions about ownership in society the author ignites a powerful conversation about the increasingly unequal distribution of wealth forcing us to confront that our current property system bears considerable responsibility for the current polycrisis This groundbreaking work will set the agenda for a new era in property theory **Socialism: The Only Practical Alternative to Contemporary Capitalism** Tatah Mentan, 2012 Since the end of World War II global capitalism spearheaded by US financial interests and backed by the most lethal military force that has ever been assembled has consolidated its power over the world economy In the past decades especially transnational corporations have tightened their control over national governments and international institutions The imposition of free trade policies and the increasing privatization of social services have facilitated the accumulation of fabulous wealth for the owners of capital at the expense of working people and the environment worldwide Contemporary capitalism now dominates every major sector of the world economy The social and environmental costs of contemporary capitalism are prohibitive The global megatrends of rising inequality and absolute poverty political instability and global climate change all compounded and accelerated by this predatory mode of production are adversely affecting the lives and threatening the future of every inhabitant of nations and the entire world In view of these megatrends and the current global economic crisis the conclusion that contemporary capitalism does not serve the interests of the vast majority of the people on the planet and is both economically and environmentally unsustainable is self evident History offers harsh lessons The political violence of the 20th century which resulted in an estimated 200 million deaths and untold economic and environmental destruction cautions us to work for socialism in the 21st century with every means at our disposal except violence Facing the awful power and willingness of capitalism to coerce and corrupt we must find ways to make soft power prevail Clearly a revolution is in order it is time to place the socialist alternative on the national and world agenda

Corporate Power and Ownership in Contemporary Capitalism Susanne Soederberg, 2009-09-14 Despite the influence corporations wield over all aspects of everyday life there has been a remarkable absence of critical inquiry into the social

constitution of this power In analysing the complex relationship between corporate power and the widespread phenomenon of share ownership this book seeks to map and define the nature of resistance and domination in contemporary capitalism Drawing on a Marxist informed framework this book reconnects the social constitution of corporate power and changing forms of shareholder activism In contrast to other texts that deal with corporate governance this study examines a diverse and comprehensive set of themes from socially responsible investing to labour led shareholder activism and its limitations Through this ambitious and critical study author Susanne Soederberg demonstrates how the corporate governance doctrine represents an inherent feature of neoliberal rule effectively disembedding and depoliticising relations of domination and resistance from the wider power and paradoxes of capitalism Examining corporate governance and shareholder activism in a number of different contexts that include the United States and the global South this important book will be of interest to students and scholars of international political economy international relations and development studies It will also be of relevance to a wider range of disciplines including finance economics and business and management studies Winner of the Davidson Studies in Political Economy Award Value and Crisis: Essays on Labour, Money and Contemporary Capitalism Alfredo Saad Filho, 2019-02-11 Value and Crisis brings together selected essays written by Alfredo Saad Filho one of the most prominent Marxist political economists today This book examines the labour theory of value from a rich and innovative perspective from which fresh insights and new perspectives are derived with applications for the nature of neoliberalism financialisation inflation monetary policy and the contradictions limitations and crises of contemporary capitalism

Industry and Work in Contemporary Capitalism Victoria Goddard, Susana Narotzky, 2015-01-30 Throughout history and in every geographical location the rise and fall of industry which impact the fate of large populations are tied to the development and cultural entanglement of particular models that are articulated with political power Models are understood as knowledge devices expert theoretical practical and commonsense that are embedded in cultural and social environments and designed through struggles at various scales This book results from the collaboration of an interdisciplinary team bringing together specialists in anthropology geography sociology economics political science mathematics and engineering around the theme of Models and their Effects on Development Paths Based on empirical research conducted on the heavy industries Industry and Work in Contemporary Capitalism addresses how models that inform the organization of work and production and are created by powerful actors may diverge from overlap with or contradict the models articulated by less powerful actors on the ground and how they are connected across material and cultural spaces Careful observation of industrial work and production as they unfold in and across specific localities and affects people's livelihoods is complemented by analysis of how models circulate through which channels of power which institutional entities which political connections This volume explores an extensive theoretical terrain and a number of empirical cases that show from different perspectives how ideas about the economy about work and industry materialize in specific practices and

interventions that affect people's livelihoods *Urban and Regional Development Trajectories in Contemporary Capitalism* Flavia Martinelli, Frank Moulaert, Andreas Novy, 2013 This book re-evaluates a rich scientific heritage of space and history sensitive development theories and produces an integrated methodology for the comparative analysis of urban and regional trajectories within a globalized world. The main argument put forward is that current mainstream analyses of urban and regional development have forgotten this rich heritage and fail to address the connections between different dimensions of development: the role of history and the importance of place and scale relations. The proposed methodology integrates elements from different theories: radical economic geography, regulation approach, cultural political economy, old and new institutionalism, that all share a strong concern with time and space dynamics. They are recombined into an interdisciplinary meta-theoretical framework capable of articulating the overall problem of socio-economic development and providing methodological anchors for comparative case study analysis while recognizing context specificities. The analytical methodology focuses on key dynamics and relations such as strategic agency and collective action, institutions and structures, culture and discourse as well as the tension between path dependency and path shaping. The methodology is then applied to eight urban and regional cases, mostly from Western Europe but also from the United States and China. The case studies confirm the relevance of time and space sensitive analysis not only for understanding development trajectories but also for policy making. They ultimately highlight that while post-war institutions were able to address systemic contradictions and foster a relatively inclusive development model, the neoliberal turn has led to reductionist policies that not only have resulted in an increase in social and spatial inequalities but have also undermined growth and democracy.

A Political Economy of Contemporary Capitalism and its Crisis Dimitris Sotiropoulos, John Milios, Spyros Lapatsioras, 2013-06-19 The recent financial meltdown and the resulting global recession have rekindled debates regarding the nature of contemporary capitalism. This book analyses the ongoing financialization of the economy as a development within capitalism and explores the ways in which it has changed the organization of capitalist power. The authors offer an interpretation of the role of the financial sphere which displays a striking contrast to the majority of contemporary heterodox approaches. Their interpretation stresses the crucial role of financial derivatives in the contemporary organization of capitalist power relations, arguing that the process of financialization is in fact entirely unthinkable in the absence of derivatives. The book also uses Marx's concepts and some of the arguments developed in the framework of the historic Marxist controversies on economic crises in order to gain an insight into the modern neoliberal form of capitalism and the recent financial crisis. Employing a series of international case studies, this book will be essential reading for all those with an interest in the financial crisis and all those seeking to comprehend the workings of capitalism.

Contemporary Capitalism and Its Crises Terrence McDonough, Michael Reich, David M. Kotz, 2010-01-11 This volume analyses contemporary capitalism and its crises based on a theory of capitalist evolution known as the social structure of accumulation SSA theory It applies this theory to explain the severe financial and economic crisis that broke out in 2008 and the kind of changes required to resolve it The editors and contributors make available new work within this school of thought on such issues as the rise and persistence of the neoliberal or free market form of capitalism since 1980 and the growing globalization and financialization of the world economy The collection includes analyses of the U S economy as well as that of several parts of the developing world

Continuity and Change in Contemporary Capitalism Herbert Kitschelt, 1999-01-13 In the early 1980s many observers argued that powerful organized economic interests and social democratic parties created successful mixed economies promoting economic growth full employment and a modicum of social equality The present book assembles scholars with formidable expertise in the study of advanced capitalist politics and political economy to reexamine this account from the vantage point of the second half of the 1990s The authors find that the conventional wisdom no longer adequately reflects the political and economic realities Advanced democracies have responded in path dependent fashion to such novel challenges as technological change intensifying international competition new social conflict and the erosion of established patterns of political mobilization The book rejects however the currently widespread expectation that internationalization makes all democracies converge on similar political and economic institutions and power relations Diversity among capitalist democracies persists though in a different fashion than in the Golden Age of rapid economic growth after World War II
