**Contemporary Anthropology** Daniel G. Bates,Susan H. Lees,1981      **Caucasus Paradigms** Bruce Grant, Lale Yalçın-Heckmann,2007 Bringing together a dozen specialists in anthropology linguistics and cultural history this volume identifies patterns in how the Caucasus has figured on the world stage through both politics and scholarship      **Roger Sandall's Films and Contemporary Anthropology** Lorraine Mortimer,2019-09-12 A look at a prize winning documentarian whose work with aboriginal Australians and others united the fields of film and anthropology in the 1960s and 70s In Roger Sandall s Films and Contemporary Anthropology Lorraine Mortimer argues that while social anthropology and documentary film share historic roots and goals particularly on the continent of Australia their trajectories have tended to remain separate This book reunites film and anthropology through the works of Roger Sandall a New Zealand born filmmaker and Columbia University graduate who was part of the vibrant avant garde and social documentary film culture in New York in the 1960s Mentored by Margaret Mead in anthropology and Cecile Starr in fine arts Sandall was eventually hired as the one man film unit at the newly formed Australian Institute of Aboriginal Studies in 1965 In the 1970s he became a lecturer in anthropology at the University of Sydney Sandall won First Prize for Documentary at the Venice Film Festival in 1968 yet his films are scarcely known even in Australia now Mortimer demonstrates how Sandall s films continue to be relevant to contemporary discussions in the fields of anthropology and documentary studies She ties exploration of the making and restriction of Sandall s aboriginal films and his nonrestricted films made in Mexico Australia and India to the radical history of anthropology and the resurgence today of an expanded existential phenomenological anthropology that encompasses the vital connections between humans animals things and our environment

**Philosophy on Fieldwork** Nils Bubandt,Thomas Schwarz Wentzer,2022-07-29 How do we teach analysis in anthropology and other field based sciences How can we engage analytically and interrogatively with philosophical ideas and concepts in our fieldwork And how can students learn to engage critical ideas from philosophy to better understand the worlds they study Philosophy on Fieldwork provides show don t tell answers to these questions In twenty six master class chapters philosophy meets anthropological critique as leading anthropologists introduce the thinking of one foundational philosopher from a variety of Western traditions and beyond and apply this critically to an ethnographic case Nils Bubandt Thomas Schwarz Wentzer and the contributors to this volume reveal how the encounter between philosophy and fieldwork is fertile ground for analytical insight to emerge Equally the philosophical concepts employed are critically explored for their potential to be thought otherwise through their frictional encounter with the worlds in the field allowing non Western and non elite life experience and ontologies to speak back to both anthropology and philosophy This is a unique and concrete guidebook to social analysis It answers the critical need for a how to textbook in fieldwork based analysis as each chapter demonstrates how the ideas of a specific philosopher can be interrogatively applied to a concrete analytical case study The straightforward pedagogy of Philosophy on Fieldwork makes

this an accessible volume and a must read for both students and seasoned fieldworkers interested in exploring the contentious middle ground between philosophy and anthropology     **Encyclopedia of Ancient Greece** Nigel Wilson,2013-10-31 Examining every aspect of the culture from antiquity to the founding of Constantinople in the early Byzantine era this thoroughly cross referenced and fully indexed work is written by an international group of scholars This Encyclopedia is derived from the more broadly focused Encyclopedia of Greece and the Hellenic Tradition the highly praised two volume work Newly edited by Nigel Wilson this single volume reference provides a comprehensive and authoritative guide to the political cultural and social life of the people and to the places ideas periods and events that defined ancient Greece     The Geography of Names Gwilym Lucas Eades,2016-07-15 This book examines geographical names place names and toponymy from philosophical and cultural evolutionary perspectives Geographical name tracking networks Geo NTNs are posited as tools for tracking names through time and across space and for making sense of how names evolve both temporally and spatially Examples from North and South American indigenous groups the Canadian arctic Wales England and the Middle East are brought into a theoretical framework for making sense of aspects of place naming practices beliefs and systems New geographical tools such as geographic information systems GIS and global positioning systems GPS are demonstrated to be important in the production and maintenance of robust networks for keeping names and their associated meanings viable in a rapidly changing world where place naming is being taken up increasingly in social media and other new mapping platforms The Geography of Names makes the case that geographical names are transmitted memetically i e as cultural units or memes through what Saul Kripke called communication chains Combining insights from Kripke with views of later Wittgenstein on language and names as being inherently spatial the present work advances theories of both these thinkers into an explicitly geographical inquiry that advances philosophical and practical aspects of naming language and mapping     The Ecosystem Concept In Anthropology Emilio F Moran,Susan H Lees,2019-09-06 Critics of the ecosystem concept have noted the tendency of ecosystem based studies to overemphasize energy flow to rely on functionalist assumptions to neglect historical and evolutionary factors and to overlook the role of individuals as the locus of natural selection and decision making In this volume leading figures in the study of biological and human ecology evaluate these criticisms and propose ways to advance the state of knowledge in ecological research     The Oxford Handbook of the Archaeology of the Contemporary World Paul Graves-Brown,Rodney Harrison,Angela Piccini,2013-10 This Handbook is the first comprehensive survey of a rapidly expanding sub field in archaeology the study of the present and recent past It seeks to explore the boundaries of this emerging area to develop a tool kit of concepts and methods which are applicable to this new sub field and to suggest important future trajectories for research     Anthropology, Contemporary Perspectives David E. **Perspectives in Cultural Anthropology** Herbert A. Applebaum, 1987-01-01 Designed as a reader for courses this anthology presents an array of theories and interpretations in the field of modern cultural anthropology. It provides a deeper understanding of the major theoretical orientations which have historically guided and currently guide anthropological research.

*Understanding Cultural Transmission in Anthropology* Roy Ellen, Stephen J. Lycett, Sarah E. Johns, 2013-08-01

The concept of cultural transmission is central to much contemporary anthropological theory since successful human reproduction through social systems is essential for effective survival and for enhancing the adaptiveness of individual humans and local populations. Yet what is understood by the phrase and how it might best be studied is highly contested. This book brings together contributions that reflect the current diversity of approaches from the fields of biology, primatology, palaeoanthropology, psychology, social anthropology, ethnobiology and archaeology to examine social and cultural transmission from a range of perspectives and at different scales of generalization. The comprehensive introduction explores some of the problems and connections. Overall the book provides a timely synthesis of current accounts of cultural transmission in relation to cognitive process, practical action and local socio ecological context while linking these with explanations of longer term evolutionary trajectories.

Anthropological Optimism Anna J. Willow, 2023-04-25 This book theorizes the roles of optimism in anthropological thinking, research, writing and practice. It sets out to explore optimism's origins and implications, its conceptual and practical value and its capacity to contribute to contemporary anthropological aims. In an era of extensive ecological disruption and social distress, this volume contemplates how an optimistic anthropology can energize the discipline while also contributing to bettering the lives, communities and environments of those we study. It brings together scholars diverse in background, career stage and theoretical approach in a collective attempt to comprehend the myriad intersections of anthropology and optimism. The challenges of the COVID 19 pandemic have recently underscored the larger, longer term catastrophes of climate change, ecosystemic collapse, social injustice and antipathy toward scientific knowledge and those who produce it. In this context, exceedingly few anthropologists feel comfortable observing and documenting passively while their research communities face unrelenting waves of unnatural disasters. We need to act. But we also need to hope. Discontent with the state of the world and cultural anthropology's turn to increasingly positive, future-oriented and engaged work have converged to unleash a courageously optimistic anthropology. This book is a timely springboard for this impactful and emergent approach.

Alutiiq Villages Under Russian and U.S. Rule Sonja Luehrmann, 2008 Sonja Luehrmann's volume examines Alutiiq history within the larger context of Russian and American expansionism. The author uses source material in both English and Russian in order to create a work focused on the intersection of the two colonial perspectives, throwing light on our understanding of the differences in the way each society incorporated the Alutiiq community both as a labor force and a social entity. In a series of map essays, Luehrmann examines

the changing patterns of settlement and demography among the Alutiiq as the population responded to the conditions they encountered economic exploitation new cultural influences intermarriage disease and the eruption of Novarupta The addition of Russian source material fills an important blank in this unique history and makes Alutiiq Villages Under Russian and U S Rule a major resource for anyone working on Alutiiq history or the region s history in the Russian colonial period Jubuntu  
Larissa Denk,2023-02-13 This study investigates the nexus between giving belonging and Jewishness in South Africa Charitable interactions are as much manifestations of inequalities as an expression of the giving individual s desire to alleviate them Structuring aspects like class race economics and post apartheid politics are at the basis of this study At the same time though it is individual agency reproducing inequalities and making sense of the ambiguity of the charitable interaction In the context of the Jewish community in South Africa this analysis shows how the community s organisations practices and concepts are connected to charitable giving The author carved out three dimensions which are entangled reinforced or at times contradict each other Belonging diaspora and charitable giving Along with shared values and practices it relates to volunteering or charitable giving connects one individual to a group while possibly excluding another from it Expressing belonging to the Jewish collective as a diaspora community relates individuals or collectives to the triadic relationship between local diaspora group host society and homeland and other local communities of the same diaspora
