Stalking Sociologists Renee C. Fox,2017-07-05 Until recent years the Federal Bureau of Investigation enjoyed an exalted reputation as America s premier crime fighting organization However it is now common knowledge that the FBI and its long time director J Edgar Hoover were responsible for the creation of a massive internal security apparatus that undermined the very principles of freedom and democracy they were sworn to protect While no one was above suspicion Hoover appears to have held a special disdain for sociologists and placed many of the profession s most prominent figures under surveillance In Stalking Sociologists Mike Forrest Keen offers a detailed account of the FBI s investigations within the context of an overview of the history of American sociology This ground breaking analysis history uses documents obtained through the Freedom of Information Act Keen argues that Hoover and the FBI marginalized sociologists such as W E B Du Bois and C Wright Mills tried to suppress the development of a Marxist tradition in American sociology and likely pushed the mainstream of the discipline away from a critique of American society and towards a more quantitative and scientific direction He documents thousands of man hours and millions of dollars dedicated to this project Faculty members of various departments of sociology were recruited to inform on the activities of their colleagues and the American Sociological Association was a target of FBI surveillance Keen turns sociology back upon the FBI using the writings and ideas of the very

sociologists Hoover investigated to examine and explain the excesses of the Bureau and its boss The result is a significant contribution to the collective memory of American society as well as the accurate history of the sociological discipline This ground breaking book documents in meticulous detail decades of harassment and surveillance of major American sociologists by the FBI The misuse of power will outrage all Americans a **Paper Empires** Craig Munro,2006 This book tells the inside story of Australian publishing over the past half century *Digital Transformation of Industry* John Stark,2024-10-27 This graduate textbook is focused on digital transformation It answers key questions regarding which technologies can be used to transform an organisation which activities within an organisation can be transformed and what the aim of digital transformation should be Now fully updated and expanded in this second edition the content is divided into three main parts the first of which offers an introduction to the topic highlights fundamental examples of digital transformation defines the terminology and enables readers to quickly understand the main components of digital transformation The second part of the book addresses examples of digital transformation from several industries including government finance health manufacturing and education The third and final section of the book describes the activities and processes within a typical digital transformation programme The pedagogical approach to the process makes the book beneficial to both students who have never been involved in such a programme and practitioners who plan to implement digital transformation in their organisation **Demystifying Marketing** Patrick Forsyth,2007-10-30 Marketing is a big topic It is complex vital and yet too often misunderstood Developing an Outstanding Core Collection Carol Alabaster,2002 Presents step by step instructions for librarians on creating a core collection from scratch or revitalizing an existing collection providing sample core lists in seven subject areas **Program of the ...
