The Chemistry of Transition Metal Carbides and Nitrides S.T. Oyama,2012-12-06 This book arose from a symposium titled Transition Metal Carbides and Nitrides Preparation Properties and Reactivity organized by Jae Sung Lee Masatoshi Nagai and myself The symposium was part of the 1995 Congress of

Pacific Rim Chemical Societies held in Honolulu Hawaii between December 17-22, 1995. The meeting was the first major conference to exclusively address the theme of metal carbides and nitrides and brought together many of the major researchers in the field. Over 50 scientists and engineers reported their latest findings in five sessions of presentations and discussions. The book closely follows the topics covered in the conference: Theory of bonding, Structure and composition, Catalytic properties, Physical properties, New methods of preparation, Spectroscopy and microscopy. The book is unique in its coverage. It provides a general introduction to the properties and nature of the materials but also covers their latest applications in a wide variety of fields. It should thus be of interest to both experts and nonexperts in the fields of material science, solid state chemistry, physics, ceramics, engineering and catalysis. The first chapter gives an overview and many of the chapters provide summaries of advanced topics. All contributions were peer reviewed.
