Cybernetic Avatar Hiroshi Ishiguro,Fuki Ueno,Eiki Tachibana,2024-11-15 This open access book presents a vision of a future where avatars play an integral role in shaping the fabric of our interconnected society The book introduces the authors ongoing efforts to advance avatar technologies and is structured into nine chapters Chapter 1 discusses the potentially revolutionary impact of cybernetic avatars CAs as a new medium of communication liberating individuals from physical barriers and creating more flexible work environments Chapters 2 3 and 4 present developments in CAs with advanced autonomous functionality Chapters 5 and 6 discuss the creation of a CA platform that connects multiple operators and CAs Chapter 7 explores the physiological and neuroscientific effects of avatars and other media on operators and users Finally Chapters 8 and 9 discuss the societal implementation of CAs This book is stemmed from one of the Moonshot R D projects funded by the Japan Science and Technology Agency JST   *Artificial Intelligence, Neural Networks and Privacy: Striking a Balance between Innovation, Knowledge, and Ethics in the Digital Age* Nicola Fabiano,2025-07-31 This book offers a compelling journey through the history current state and future of privacy personal data protection and artificial intelligence exploring societal changes and effects The author takes us back to the ancient origins of privacy showing how the concept has profoundly evolved through different eras and the complex international regulations that today govern the processing of our personal data such as the GDPR The role of privacy in everyday life is explored paying particular attention not only to our control over personal data but also to the emotional and psychological dynamics that determine our willingness to share intimate information in the digital age Privacy and artificial intelligence are increasingly interconnected creating new and complex challenges Starting from the AI Act the European regulation on artificial intelligence the interactions between AI and emerging phenomena such as emotions digital twins AI agents and quantum privacy are described The book explores emerging digital identity frontiers examining today s most advanced technologies social ethical and cultural impacts Ample space is also reserved for artificial intelligence s practical and legislative aspects from LLM to managing security related risks algorithmic biases hallucinations and industry standards thus fully providing the reader with the tools to understand this constantly evolving scenario   Neoliberalism Inequality and Authoritarianism Jon Kofas,2024-09-03 This book exposes the inherent contradictions of neoliberalism The myth of limitless growth ignores the reality of resource constraints and fuels a global upward transfer of wealth Meanwhile a fractured global economy and intensifying class warfare chip away at neoliberalism s foundation As inequality spirals and social justice crumbles the model increasingly serves a privileged few at the expense of the majority This undermines the Enlightenment ideal of using liberal democracy to improve lives in the age of mass politics threatening neoliberalism s very survival   **Artificial Intelligence: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources,2016-12-12 Ongoing advancements in modern technology have led to significant developments in artificial intelligence With the numerous

applications available it becomes imperative to conduct research and make further progress in this field Artificial Intelligence Concepts Methodologies Tools and Applications provides a comprehensive overview of the latest breakthroughs and recent progress in artificial intelligence Highlighting relevant technologies uses and techniques across various industries and settings this publication is a pivotal reference source for researchers professionals academics upper level students and practitioners interested in emerging perspectives in the field of artificial intelligence **Political Economy of Media and Communication** Joan Pedro-Carañana,Rodrigo Gómez,Thomas F. Corrigan,Francisco Sierra Caballero,2024-02-01 The first book dedicated specifically to research methods in the political economy of media and communication it provides a methodological toolkit to investigate the functioning of media technology and cultural industries in their historical institutional structural and systemic contexts Featuring contributions from across the globe and a variety of methodological perspectives this volume presents the state of the art in political economy of media and communication methods articulating those methods with adjacent approaches to study concentration of ownership and power pluralism and diversity regulation and public policies governance genderization and sustainability This collection charts the methodological innovations critical political economists are adopting to analyse a rapidly transforming digital media landscape exploring ideology narratives socio analysis and praxis in communication with ethnographic and participatory approaches as well as designs for quantitative and qualitative methods of textual discourse and content analysis network analyses which consider power relations affecting communication including intersectional oppressions and the new developments taking place in artificial intelligence An essential text for advanced undergraduates postgraduate students and researchers in the areas of media cultural and communication studies particularly those studying topics such as the political economy of media and or communication media and communication theory and research methods **Encyclopedia of Artificial Intelligence** Rabuñal Dopico, Juan Ramón,Dorado, Julian,Pazos, Alejandro,2008-07-31 This book is a comprehensive and in depth reference to the most recent developments in the field covering theoretical developments techniques technologies among others Provided by publisher **The Future of Labour** Anthony Larsson,Andreas Hatzigeorgiou,2025-06-16 The Future of Labour How AI Technological Disruption and Practice Will Change the Way We Work is an anthology that offers a forward looking exploration of how artificial intelligence AI digitalisation and technological transformation are reshaping the future of work Through a series of studies conducted by scientists and industry professionals this volume takes a deep dive into many of the issues related to new policies AI and the digital transformation s anticipated impact on the labour market Balancing speculative foresight with scientific rigor the authors ground their discussions in empirical data theoretical frameworks and comprehensive literature studies The book delves into the evolving labour landscape through three key themes The Future of Society and Economy Examining the socio economic implications of emerging technologies and their transformative impact on work The Future Way of Working Investigating how AI and digital tools are redefining the nature of work and workplace

conditions New Uses of AI and Technology in Labour Highlighting innovative applications of AI and technology that are reshaping job roles and industries Each chapter provides unique insights blending rigorous analysis with predictive insights to illuminate the challenges and opportunities of a rapidly technologically advancing labour landscape The Open Access version of this book available at www taylorfrancis com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 International license Innovative Intelligent Industrial Production and Logistics Michele Dassisti,Kurosh Madani,Hervé Panetto,2025-02-12 This two volume set CCIS 2372 2373 constitutes the proceedings of the 5th International Conference on Innovative Intelligent Industrial Production and Logistics IN4PL 2024 held in Porto Portugal during November 21 22 2024 The total of 15 full papers along with 38 short papers presented together in this book was carefully reviewed and selected from 76 submissions This conference focuses on research and development involving innovative methods software and hardware whereby intelligent systems are applied to industrial production and logistics This is currently related to the concept of industry 5 0 an expression the new wave that extends the trend towards automation and data exchange in manufacturing technologies and processes including cyber physical systems the industrial internet of things industrial robotics cloud computing cognitive computing and artificial intelligence towards the new role of human resources cooperating with these technologies *The Cybernetic Brain* Andrew Pickering,2010-04-15 Cybernetics is often thought of as a grim military or industrial science of control But as Andrew Pickering reveals in this beguiling book a much more lively and experimental strain of cybernetics can be traced from the 1940s to the present The Cybernetic Brain explores a largely forgotten group of British thinkers including Grey Walter Ross Ashby Gregory Bateson R D Laing Stafford Beer and Gordon Pask and their singular work in a dazzling array of fields Psychiatry engineering management politics music architecture education tantric yoga the Beats and the sixties counterculture all come into play as Pickering follows the history of cybernetics impact on the world from contemporary robotics and complexity theory to the Chilean economy under Salvador Allende What underpins this fascinating history Pickering contends is a shared but unconventional vision of the world as ultimately unknowable a place where genuine novelty is always emerging And thus Pickering avers the history of cybernetics provides us with an imaginative model of open ended experimentation in stark opposition to the modern urge to achieve domination over nature and each other **Principles and Practice of Constraint Programming - CP97** Gert Smolka,1997-10-15 This book constitutes the refereed proceedings of the Third International Conference on Principles and Practice of Constraint Programming CP 97 held in Linz Austria in October November 1997 The volume presents 37 revised full papers carefully selected from a total of 132 submissions also included are the abstracts of two invited talks and three tutorials The papers address all current aspects of constraint programming Among the topics covered are constraint matching constraint languages set constraints constraint search constraint satisfaction problems scheduling constraint routing temporal constraints constraint graphs local search object oriented constraint programming etc **KI 2004:**
