Rodrigues,Belinda Smaill,2009-05-05 Youth Media and Culture in the Asia Pacific Region presents an analysis of youth media activities in a diverse but geographically connected Asia Pacific region The region which is spatially connected by its colonial and imperial past is becoming a significant player in the globalized world In this context

youth situated in these economically politically and socially structured communities are redefining their locales through their patterns of media use The discourse of youth in this disparate region is manifest in the media through their identity articulations and social activism The book illustrates that these youth subcultures in the Asia Pacific are part of the well marketed global consumerism culture and yet at other times independent of the commodifying impetus of global capital It draws on case studies to examine some of the media practices youth in the region are engaged in and elucidates the process of social change taking place in some Asia Pacific nations This book contributes to the important and growing field of youth media studies The regionalization of media research is necessarily recuperated here bringing large populations of media users into a frame of reference that allows critical reflection on the new waves of use and sociality in the Asia Pacific region

Wall,2017-07-05 This volume presents the reader with an interesting and at times provocative selection of contemporary thinking about cybercrimes and their regulation The contributions cover the years 2002 2007 during which period internet service delivery speeds increased a thousand fold from 56kb to 56mb per second When combined with advances in networked technology these faster internet speeds not only made new digital environments more easily accessible but they also helped give birth to a completely new generation of purely internet related cybercrimes ranging from spamming phishing and other automated frauds to automated crimes against the integrity of the systems and their content In order to understand these developments the volume introduces new cybercrime viewpoints and issues but also a critical edge supported by some of the new research that is beginning to challenge and surpass the hitherto journalistically driven news stories that were once the sole source of information about cybercrimes **Therapeutic Culture** Donileen

and James Davison Hunter Part 4 is devoted to a previously unpublished essay by Philip Rieff whose significant influence can be seen in many of the contributions Rieff revisits the highly controversial confirmation hearings of Supreme Court Associate Justice Clarence Thomas in 1991 and offers ample evidence of the therapeutic uses of politics as well as the political manipulations available within a therapeutic culture to provide a fitting conclusion This volume establishes a benchmark for further
