Beyond Broadband Access Richard D. Taylor, Amit M. Schejter, 2013-06-03 This volume not only examines traditional questions about broadband such as availability and access but also explores and evaluates metrics that are more applicable to the evolving technologies of information access Importantly the book provides a well rounded international perspective on theoretical approaches to communications policymaking in the Americas Europe Asia and Africa Showcasing a diversity of approaches this collection aims to help meet the myriad

challenges involved in improving the development of communications policy around the world **The Oxford Handbook of Cyber Security** Paul Cornish,2021 As societies governments corporations and individuals become more dependent on the digital environment so they also become increasingly vulnerable to misuse of that environment A considerable industry has developed to provide the means with which to make cyber space more secure stable and predictable Cyber security is concerned with the identification avoidance management and mitigation of risk in or from cyber space the risk of harm and damage that might occur as the result of everything from individual carelessness to organised criminality to industrial and national security espionage and at the extreme end of the scale to disabling attacks against a country s critical national infrastructure But this represents a rather narrow understanding of security and there is much more to cyber space than vulnerability risk and threat As well as security from financial loss physical damage etc cyber security must also be for the maximisation of benefit The Oxford Handbook of Cyber Security takes a comprehensive and rounded approach to the still evolving topic of cyber security the security of cyber space is as much technological as it is commercial and strategic as much international as regional national and personal and as much a matter of hazard and vulnerability as an opportunity for social economic and cultural growth **Encyclopedia of Virtual Communities and Technologies** Dasgupta,
