Barrows, 2000-09-30 Shadow was a zero a nothing one of a growing underclass thrown up in the wake of the vast corporate leviathans which daily swallow ever growing tracts of a crumbling society The Net was his home as it was to six billion others the virtual worlds behind the eyepiece a new underworld where hackers cut deals and peddled terrabyte chunks of ripped off corporate cake But it was just data the elaborate VR tapestry was an illusion spun by hi res stereo optics Cyberspace was just an electrical mirage no more real than TV or hi fi Until one day it changed At some point nobody knows when something happened something barely on the threshold of consciousness It somehow woke up came alive At first there were just thin rumours the hushed whispers and urban myths that spread like a voice born virus But when a clan of high tech pagans go crazy the stories darken and intensify a diabolical force permeating the Net a hideous presence growing in an embryonic cyberspace Shadow was starting pick up the vibe too but Shiva 2 Bit and the others didn't have much time for ghost stories They were more interested in the news that was spreading across the underworld Word was out that someone had finally done it Direct Neural Interfacing the holy grail of technology was here enabling a direct cortical jack between the human mind and the electrical miasma of the Net The door to cyberspace was finally open Suddenly an old flame is dead after shadowing a satellite hack dead from that particular species of coronary failure that stinks of corpshop erasure The uneasy stand off between the Big Three super corporations is over and a deadly race begins for a technology that will change everything Shadow is suddenly centre stage in a drama that will decide the future of humanity and brings him to a climactic confrontation with the nameless horror that awaits in a new born cyberspace **Cybor and Gaia** Roy E. Allen, 1997 [The Publishers Weekly](#), 1997 **The Cyber Meta-Reality** Joshua A. Sipper, 2022-04-04 As one begins to explore the many complexities of quantum computing nanotechnology and AI it becomes clear that there is an underlying reality within cyberspace that is comprised of other realities and that these realities all have their own biomes ecosystems and microbiomes built on information energy and human creative reality and potential It is clear that there has not been much research on this especially the piece dealing with the cyber microbiome which looks at the part of the iceberg that is under the surface and makes up most of cyberspace much like how our human microbiome is many orders of magnitude larger than our human cells The microbiome is extremely important from the perspective of how to treat diseases in humans especially

bacterial infections The same is true for how to treat diseases in the cyber meta reality Thus knowing all we can about the cyber meta reality biome and microbiome is absolutely necessary in ensuring this world s growth care and flourishing
