Cycles Of Time And Scientific Learning In Medieval Europe:

Cycles of Time and Scientific Learning in Medieval Europe Wesley M. Stevens, 2024-10-28 The calendar worked out by Bede remains essentially the one we still use today yet the mathematical and scientific studies of the early medieval schools have been largely neglected in most discussions of the cultural and intellectual history of Latin Europe These articles by Wesley Stevens are based on an unrivalled knowledge of the manuscript sources and provide a very different perspective demonstrating the real vitality of this science in the early medieval West Working from the original texts and diagrams he identifies and explains mathematical reckonings and astronomical cycles by early Greek Roman and Christian scholars Through made for religious purposes those early studies created a demand for standard arithmetic geometry and astronomy and this remained of often intense interest through into the 9th century in the schools of Fulda and Reichenau One paper here further sets out to correct much mis information on the ideas of Isidore Boniface and other church fathers a second revised especially for this volume looks in detail at Bede s scientific achievements his theories of latitudes and tides as well as his cosmology and computus

The Construction of Communities in the Early Middle Ages Richard Corradini, Maximilian Diesenberger, Helmut Reimitz, 2003 This volume provides a complex discussion of the variety of social efforts which were undertaken to create meaningful communities in the process of the formation of the early medieval gentes and kingdoms in the post Roman west

Scandalous Error C. Philipp E. Nothaft, 2018 The Gregorian calendar reform of 1582 which provided the basis for the civil and Western ecclesiastical calendars still in use today has often been seen as a triumph of early modern scientific culture or an expression of papal ambition in the wake of the Counter Reformation Much less attention has been paid to reform s intellectual roots in the European Middle Ages when the reckoning of time by means of calendrical cycles was a topic of central importance to learned culture as impressively documented by the survival of relevant texts and tables in thousands of manuscripts copied before 1500 For centuries prior to the Gregorian reform astronomers mathematicians theologians and even Church councils had been debating the necessity of improving or emending the existing ecclesiastical calendar which throughout the Middle Ages kept losing touch with the astronomical phenomena at an alarming pace Scandalous Error is the first comprehensive study of the medieval literature devoted to the calendar problem and its cultural and scientific contexts It examines how the importance of ordering liturgical time by means of a calendar that comprised both solar and lunar components posed a technical astronomical problem to medieval society and details the often sophisticated ways in which computists and churchmen reacted to this challenge By drawing attention to the numerous connecting paths that existed between calendars and mathematical astronomy between the Fall of Rome and the end of the

fifteenth century the volume offers substantial new insights on the place of exact science in medieval culture

Instructional Writing in English Matti Peikola, Janne Skaaffari, Sanna-Kaisa Tanskanen, 2009 The history of English writing is to a considerable extent the history of instructional writing in English This volume is the first collection of papers to focus on instructional writing throughout the history of the language Spanning a millennium of English texts the materials studied represent procedural and behavioural discourse in a variety of genres The primary texts from AElfric's homilies to medieval cooking recipes to seventeenth century American conduct literature to present day language textbooks display a variety of linguistic devices typical of instruction The materials nonetheless differ with respect to the explicitness of their instructive purpose Bringing together a broad range of instructional writing from the Old Middle and Modern English periods this collection celebrates the sixtieth birthday of Risto Hiltunen who has successfully combined discourse linguistic approaches with the history of English in his research and inspired the colleagues and former students contributing to this volume *From Theodulf to Rashi and Beyond: Texts, Techniques, and Transfer in Western European Exegesis (800 - 1100)*, 2022-08-08 This book offers a new and inclusive approach to Western exegesis up to 1100 For too long modern scholars have examined Jewish and Christian exegesis apart from each other This is not surprising given how religious social and linguistic borders separated Jews and Christians But they worked to a great extent on the same texts Christians were keenly aware that they relied on translation The contributions to this volume reveal how both sides worked on parallel tracks posing similar questions and employing more or less the same techniques and in some rare instances interdependently

Anglo-Saxon Prognostics, 900-1100 László Sándor Chardonnens, 2007 This book offers an analysis of the status and function of the Anglo Saxon prognostics in their manuscript context a study of their introduction to and transmission in Anglo Saxon England and for the first time a comprehensive edition of prognostics in Old English and Latin **Palaces of Time**

Elisheva Carlebach, 2011-04-04 Palaces of Time resurrects the seemingly banal calendar as a means to understand early modern Jewish life Elisheva Carlebach has unearthed a trove of beautifully illustrated calendars to show how Jewish men and women both adapted to the Christian world and also forged their own meanings through time **The Wiley Blackwell**

Essays on Early Medieval Mathematics Menso

Folkerts, 2023-06-14 This book deals with the mathematics of the medieval West between ca 500 and 1100 the period before the translations from Arabic and Greek had their impact Four of the studies appear for the first time in English Among the topics treated are the Roman surveyors agrimensores recreational mathematics in the period of Bede and Alcuin geometrical texts compiled in Corbie and Lorraine from Latin sources from late antiquity the abacus at the time of Gerbert pope Sylvester II and a board game invented in the first half of the 11th century the Rithmimachia to help people to learn mathematics Included in the volume are critical editions of several texts e g that of Franco of Li ge on squaring the circle Bede and Alcuin on recreational mathematics and part of Pseudo Boethius Geometry I The book opens with a survey of mathematics in the Middle Ages and ends with a history of Rithmimachia up to the 17th century when the game fell into disuse

Embodying the Soul Meg Leja, 2022-04-26 *Embodying the Soul* explores the possibilities and limitations of human intervention in the body's health across the ninth century Carolingian Empire Early medieval medicine has long been cast as a superstitious degraded remnant of a vigorous rational Greco Roman tradition Against such assumptions Meg Leja argues that Carolingian scholars engaged in an active debate regarding the value of Hippocratic knowledge a debate framed by the efforts to define Christian orthodoxy that were central to the reforms of Charlemagne and his successors From a subject with pagan origins that had suspicious links with magic medical knowledge gradually came to be classified as a sacred art This development coincided with an intensifying belief that body and soul the two components of individual identity cultivated virtue not by waging combat against one another but by working together harmoniously The book demonstrates that new discussions regarding the legitimacy of medical learning and the merits of good health encouraged a style of self governance that left an enduring mark on medieval conceptions of individual responsibility The chapters tackle questions about the soul's material occupation of the body the spiritual meaning of illness and the difficulty of diagnosing the ills of the internal bodily cavity Combating the silence on dark age medicine *Embodying the Soul* uncovers new understandings of the physician the popularity of preventative regimens and the theological importance attached to dietary regulation and bloodletting In presenting a cultural history of the body the book considers a broad range of evidence theological and pastoral treatises monastic rules court poetry capitularies hagiographies biographies and biblical exegesis Most important it offers a dynamic reinterpretation of the large numbers of medical manuscripts that survive from the ninth century but have rarely been the focus of historical study

Astronomies and Cultures in Early Medieval Europe Stephen C. McCluskey, 2000-11-20

This book provides an overview of the astronomical practices that continued through the so called Dark Ages Like the astronomies of traditional societies early medieval astronomies established a religious framework of sacred time and ritual calendar here Christian feasts tied to a pre Christian ritual solar calendar the date of Easter tied to the Hebrew lunar calendar and the timing of monastic prayers in terms of the course of the stars Coupled with the remnants of ancient geometrical astronomy

these provided the framework for the rebirth of astronomy with the rise of the medieval universities The Power of Images in Early Modern Science Wolfgang Lefèvre, Jürgen Renn, Urs Schoepflin, 2012-12-06 Wolfgang Lefèvre Jürgen Renn and Urs Schoepflin General The origin of this volume is a workshop held in 1997 in Berlin as part of a series of workshops organized in the framework of the Network on Science and the Visual Images. The analysis of the function of images in the early modern period shows that 1500-1800, funded by the European Science Foundation and initiated by William Shea, its cultural context but also between practical knowledge and its theoretical reflection thoroughly revised and prepared for publication in scientific theories together with additionally invited papers. The analysis of images thus constitutes an important branch of the history of science we hope corresponds to the original intention that on the one hand is conceived of as part of the Network to contribute to a more general history of culture and on the other hand as a historical epistemology of history of science still neglected because of knowledge. This book is not a systematic and comprehensive account of scientific images on texts corresponding to a concentration on the early modern period *A New History of Ireland: Prehistoric and early Ireland* Theodore William Moody, Francis X. Martin, Francis John Byrne, 1976 In this first volume of the Royal Irish Academy's multi-volume *A New History of Ireland* a wide range of national and international scholars in every field of study have produced studies of the archaeology, art, culture, geography, geology, history, language, law, literature, music and related topics that include surveys of all previous scholarship combined with the latest research findings to offer readers the first truly comprehensive and authoritative account of Irish history from the dawn of time down to the coming of the Normans in 1169. Included in the volume is a comprehensive bibliography of all the themes discussed in the narrative together with copious illustrations and maps and a thorough index **A Handbook of Dates** C. R. Cheney, Michael C. E. Jones, 2000-04-06 *A Handbook of Dates* is an unrivalled reference book for historians. It provides in clear, user-friendly form tables which allow the calculation of the dates and days on which historical events have fallen or will fall from AD 500 to 2100. It describes the calendars and other systems used for dating purposes in England from Roman times to the present including regnal years. Lists of Easter dates, saints' days, popes, rulers of England and the Roman calendar are also given. In this updated and expanded edition edited by Professor Michael Jones the introductory materials for each set of tables has been revised. New tables for legal chronology, old and new style dates, Celtic Easter, adoption of Gregorian style and the French Revolutionary calendar have been added while the existing Anglo-Saxon regnal lists have been significantly revised. *A Handbook of Dates* is an essential tool for all researchers in British history **Dating the Passion** C. Philipp E. Nothaft, 2011-09-30 Drawing on computational and astronomical sources from late antiquity to the Renaissance, this book demonstrates how pre-modern Christian attempts to

determine the principal dates of the life of Jesus played an essential role in the development of historical chronology
