Cystic Diseases Of The Kidney:

Cystic Diseases of the Kidney Kenneth D. Gardner,1976 The Cystic Kidney K.D. Gardner,J. Bernstein,2012-12-06

This is a book about renal cysts and cystic kidneys Its contributors have created a resource of current information in a field that once aroused only curiosity but that now stands at the leading edge of molecular nephrology Its authorship includes oldtimers who bring the wisdom of experience and newcomers whose presence attests to the contributions made by the investigative and technological advances of the past decade Its text is organized to carry the reader from renal cyst to cystic renal disease Each of its chapters defines or explores a challenge or an advance Cells that line renal cysts are diverse in structure type and perhaps function The cysts themselves lie within an interstitium that is not normal and may influence cyst development and growth Experimental analogs of human disease offer increasing opportunities to basic researchers to examine in sequence and under controlled circumstances those events that favor nephron dilation cyst growth and ultimate renal failure Renal Cystic Disease David S. Hartman,1989 *Tubulointerstitial and Cystic Disease of the Kidney* Susan

M. Dodd,2012-12-06 Over recent years much renal research has focused on the pathology of the glomerulus where many primary renal insults occur However nearly thirty years have passed since Risdon s study made the apparently anomalous observation that the extent of damage to the tubulointerstitial compartment is the major determinant of renal outcome in a variety of human glomerular diseases This volume covers various aspects of tubulointerstitial disease and starts with an update on cystic disease of the kidney by Drs WILSON and FALKENSTEIN which includes recent experimental data on the altered properties of cystic epithelium My own chapter gives an overview of the mechanisms of tubulo interstitial damage in progressive renal disease and includes a discussion of the possible role of cytokines vasoactive peptides and peptide growth factors found over the last few years to be secreted by renal tubular cells These comments are expanded in the contribution by Dr WOLF and Professor NEILSON who provide a detailed account of the cellular biology of tubulointerstitial growth The earliest studies from the 1960s attempted to correlate histo morphometry of the tubulointerstitium with renal outcome Dr KHAN and Professor SINNIAH provide us with an update on morphometric methods as applied to the kidney using new techniques Similar techniques are employed by Dr IVANYI and Professor OLSEN who give a detailed stereomorphological account of tubulitis both in acute allograft rejection where its recognition is central to the diagnosis and in other forms of tubulointerstitial disease **Acquired Cystic Disease of the Kidney and Renal Cell Carcinoma** Isao

Ishikawa,2007-12-22 The detailed and comprehensive observations presented in this book on acquired cystic disease of the kidney and renal cell carcinoma in dialysis patients are drawn from the author s decades of experience Beginning with the first clinical case in 1978 and including subsequent follow up studies and questionnaires the volume is an excellent clinical reference for practicing physicians Color illustrations and numerous case studies assist the reader Kidney Cysts:
