cancer drugs Effective cancer targeting therapies will require both passive and active targeting strategies and a thorough understanding of physiologic barriers to targeted drug delivery Targeted cancer treatments in development and the new combinatorial approaches show promise for improving targeted anticancer drug delivery and improving treatment outcomes This book discusses the advancements and innovations in the field of BME that improve the diagnosis and treatment of cancer This book is focused on bioengineering approaches to improve targeted delivery for cancer therapeutics which include particles targeting moieties and stimuli responsive drug release mechanisms This book is a useful resource for students researchers and professionals in BME and medicine

The Science of Cancer Treatment B.A. Ponder,M.J.

Waring,2012-12-06 Many of the most effective treatments for disease have been discovered empir ically Nowadays however we think that understanding the biology of a disease will lead us to design better treatments and to improve the application of treatments we already have To accomplish this vast sums are expended on cancer research Even so to the casual observer of clinical oncology the proliferation of studies and trials of ever different combinations of therapies looks like empiricism at the best In the first part of this book we have asked practising clinicians in different specialities to assess the contributions of biology and of empiricism to current approaches to treatment In the second part we have asked researchers in different areas of biology applied to cancer to assess the present and likely future impact of their type of biology on cancer treatment and control IX 1 Surgery M BAUM OBJECTIVES OF CANCER TREATMENT The objectives of cancer treatment can be defined according to population requirements or according to the needs of the individual As far as the population is concerned Government authorities are entitled to expect that cancer treatment will lead to mortality reductions and cost containment
