Abstract

Objective: To assess correlations between clinical and cytological features of feline eosinophilic keratoconjunctivitis at the time of cytological diagnosis.

Animals Studied: Fifteen client-owned, domestic breed cats (18 eyes) examined between 2007 and 2019.

Procedures: An electronic search and medical record review of cats diagnosed with feline eosinophilic keratitis or keratoconjunctivitis (FEK) based on clinical examination findings and eosinophils detected on corneal cytology were conducted. Clinical severity was graded using a modified version of a previously validated semiquantitative preclinical ocular toxicology scoring (SPOTS) system. Clinical grades were assigned following review of clinical images and medical record descriptions, and cytological grades were assigned following review of archived corneal cytology slides. Correlations were analyzed for significance using Spearman's rank correlation coefficient.

Results: Higher total corneal scores correlated with higher total conjunctival scores, but not with total fluorescein scores. Small lymphocyte scores correlated negatively with scores for collagen degeneration or mineralization. Globule leukocytes, a unique cell type not previously described in ocular cytology, were identified in 4 of 18 cytological samples. Higher globule leukocyte scores were correlated with higher scores for mast cells or plasma cells. Specimens with lower eosinophil scores had higher globule leukocyte scores.

Conclusions: Large variability was detected in the cytological characteristics and clinical features of FEK-affected cats. This is the first report of globule leukocytes being identified in ocular cytology from any species. The role of globule leukocytes in the etiopathogenesis and progression of FEK remains unknown and warrants further investigation.

Pulmonary Pathology E-Book Dani S. Zander,Carol F. Farver,2008-07-02 This volume in the Foundations in Diagnostic Pathology Series packs today s most essential pulmonary pathology into a compact high yield format It covers both common and rare neoplastic and non neoplastic diseases of the lung and pleura and focuses primarily on diagnosis with correlations to clinical and radiographic characteristics Its pragmatic well organized approach abundant full color illustrations and at a glance boxes and tables make the information you need easy to access Practical and affordable this resource is ideal for study and review as well as everyday clinical practice Detailed discussions on today s technologies help you select the best test for case evaluation Chapters devoted to the techniques used in the assessment of pulmonary diseases including immunohistochemistry immunofluorescence and certain clinical laboratory tests offer you a better understanding of techniques and their application for the diagnosis of lung disease Internationally recognized pathologists convey the most current information keeping you on the cusp of your field More than 800 photomicrographs and gross photographs most in full color present important pathologic features enabling you to form a differential diagnosis and compare your findings with actual cases Uses a consistent user friendly format including at a glance boxes and tables for easy reference

Atlas of Cytopathology and Radiology Ritu Nayar,Xiaoqi Lin,Ajit S. Paintal,Ramona Gupta,Albert A. Nemcek Jr.,2019-11-04 The aim of this atlas is to guide pathologists and radiologists in the accurate triage and diagnosis of deep seated mass lesions biopsied under ultrasound CT Scan or fluoroscopic guidance Fine needle aspiration cytology has become the foremost diagnostic modality in recent years for the diagnosis of mass lesions including primary and recurrent

neoplasms and masses of non neoplastic and infectious etiology An essential requirement in the accurate diagnosis of these masses is the correlation of cytomorphology with the radiological findings and adequate triage of acquired material during the biopsy procedure The cytologic appearance fine needle aspiration smears touch preparations cell blocks and core biopsy gross surgical resected specimen where available on follow up and imaging findings will be illustrated to provide a complete pathologic radiologic correlation of the entities discussed Collection methods and correlation with ancillary studies such as flow cytometry microbiologic cultures cytogenetics and immunohistochemistry will be described The importance of specimen type and cytologic and radiologic techniques will be emphasized Cytohistology with CD-ROM Prabodh Gupta,Zubair Baloch,2011-02-17 This book represents the essentials of diagnostic cytopathology Clinical research has confirmed the efficacy of the cytologic method of disease diagnosis and it is now considered the definitive method for identifying a wide array of malignancies Cytohistology Essentials and Basic Concepts comprehensively covers all the morphologic variations and landmarks in cells that can potentially signal disease Morphologies in cancer are the primary focus but all potential changes in infectious and inflammatory disorders are also covered in detail There is a separate section on molecular and other ancillary diagnostic techniques in cytopathology Conceptual drawings presented in a pansystemic approach and incorporating state of the art techniques show basic cytomorphologic features essential for interpretation of cytopathology specimens Diagnostic pitfalls and challenging intellectual nuggets are also presented A supplementary CD with images in a downloadable format is included **Atlas of Non-Gynecologic Cytology** Xin Jing,Momin T. Siddiqui,Qing Kay Li,2018-06-30 Cytology is a unique subspecialty in anatomic pathology and plays a critical role in the diagnosis of a variety of benign and malignant lesions by using minimally invasive procedures such as fine needle aspiration brushing washing and lavage Cytology not only provides an accurate diagnosis of the lesion based on the cytomorphological evaluation at cellular level but also provides material for molecular characterization of a tumor for targeted therapy In the era of personalized medicine cytology has continued to grow and evolve as an important diagnostic tool For example some types of procedures are routinely used diagnostic criteria have become more refined and certain terminology has been changed based on current WHO classifications Therefore it is necessary to update our knowledge and terminology in cytology In this volume we have retained the quality and the clarity of the series and like the other volumes this volume aims to be concise and comprehensive yet clinically relevant to daily practice Although this volume is written by multiple authors all chapters follow a similar format brief introduction of the specific organ system including types of specimens and techniques to obtain samples description of normal findings and a practice approach to diagnose benign and malignant lesions In each chapter the key cytomorphological feature and main differential diagnoses of the lesion are summarized in a concise table Images in each chapter are instructive and clearly represent findings Where necessary we have also illustrated the important ancillary tests such as flow cytometry immunohistochemistry and molecular analysis which are crucial for an accurate diagnosis and

targeted therapy The updated knowledge including key cytomorphological features current terminology and molecular diagnostic tests is the highlight of this volume

Cytology Diagnosis Principals And Clinical Correlations Book Review: Unveiling the Magic of Language

In an electronic era where connections and knowledge reign supreme, the enchanting power of language has been apparent than ever. Its capability to stir emotions, provoke thought, and instigate transformation is actually remarkable. This extraordinary book, aptly titled "**Cytology Diagnosis Principals And Clinical Correlations**," published by a highly acclaimed author, immerses readers in a captivating exploration of the significance of language and its profound effect on our existence. Throughout this critique, we shall delve into the book's central themes, evaluate its unique writing style, and assess its overall influence on its readership.
