Manufacturing a Socialist Modernity Kimberly Elman Zarecor, 2011-04-10 Eastern European prefabricated housing blocks are often vilified as the visible manifestations of everything that was wrong with state socialism For many inside and outside the region the uniformity of these buildings became symbols of the dullness and drudgery of everyday life Manufacturing a Socialist Modernity complicates this common perception Analyzing the cultural intellectual and professional debates surrounding the construction of mass housing in early postwar Czechoslovakia Zarecor shows that these housing blocks served an essential function in the planned economy and reflected an interwar aesthetic derived from constructivism and functionalism that carried forward into the 1950s With a focus on prefabricated and standardized housing built from 1945 to 1960 Zarecor offers broad and innovative insights into the country's transition from capitalism to state socialism She demonstrates that during this shift architects and engineers consistently strove to meet the needs of Czechs and Slovaks despite challenging economic conditions a lack of material resources and manufacturing and technological limitations In the process architects were asked to put aside their individual creative aspirations and transform themselves into technicians and industrial producers Manufacturing a Socialist Modernity is the first comprehensive history of architectural practice and the emergence of prefabricated housing in the Eastern Bloc Through discussions of individual architects and projects as well as building typologies professional associations and institutional organization it opens a rare window into the cultural and economic life of Eastern Europe during the early postwar period

Prague, Capital of the Twentieth Century Derek Sayer, 2021-11-09 The story of modernity told through a cultural history of twentieth century Prague Setting out to recover the roots of modernity in the boulevards interiors and arcades of the city of light Walter Benjamin dubbed Paris the capital of the nineteenth century In this eagerly anticipated sequel to his acclaimed *Coasts of Bohemia* A Czech History Derek Sayer argues that Prague could well be seen as the capital of the much darker twentieth century Ranging across twentieth century Prague's astonishingly vibrant and always surprising human landscape this richly illustrated cultural history describes how the city has experienced and suffered more ways of being modern than perhaps any other metropolis Located at the crossroads of struggles between democratic communist and fascist visions of the modern world twentieth century Prague witnessed revolutions and invasions national liberation and ethnic cleansing the Holocaust show trials and snuffed out dreams of socialism with a human face Yet between the wars when Prague was the capital of Europe's most easterly parliamentary democracy it was also a hotbed of artistic and architectural modernism and a center of surrealism second only to Paris Focusing on these years Sayer explores Prague's spectacular modern buildings monuments paintings books films operas exhibitions and much more A place where the utopian fantasies of the century repeatedly unraveled Prague was tailor made for surrealist Andr Breton's black humor and Sayer discusses the way the city produced unrivaled connoisseurs of grim comedy from Franz Kafka and Jaroslav Hasek to Milan Kundera and Vclav Havel A masterful and unforgettable account of a

city where an idling flaneur could just as easily be a secret policeman this book vividly shows why Prague can teach us so much about the twentieth century and what made us who we are *Movement, Manifesto, Melee* Milton A.

Cohen,2004-01-01 The years before World War I were a fertile period for artists in Europe and the United States who were challenging aesthetic convention in music writing and the visual arts These early pioneers of modernism sometimes preferred to work alone but just as often they were associated with groups whose boundaries were permeable and freely changing While these individual groups_including the Futurists Imagists Blue Rider and the Second Vienna School_have been thoroughly studied scholars of the period have often neglected the formative and pervasive interactions of these groups across geographic and artistic boundaries Providing a historical taxonomy of this influential milieu Milton Cohen demonstrates how these groups were largely responsible for the artistic innovation and nearly all the avant garde agitation and major events of these years With concluding appendices intended for scholars and specialists this engagingly written book will be useful not only for classroom use and scholarly research but will appeal to anyone interested in reading a fresh approach to the history of early modernism **The Oxford Dictionary of Architecture** James Stevens Curl,Susan
