Agent Technology:

   Agent Technology Nicholas R. Jennings,Michael J. Wooldridge,2012-12-06 Agents represent an exciting and promising new approach to building a wide range of software applications Agents are autonomous problem solving entities that are able to flexibly solve problems in complex dynamic environments without receiving permanent guidance from the user Agent Technology Foundations Applications and Markets is the first book to provide an integrative presentation of the issues challenges and success of designing building and using agent applications The chapters presented are written by internationally leading authorities in the field The book provides for a general audience a unique overview on agent technology applications ranging from an introduction to the technical foundations to reports on dealing with specific agent systems in practice   **Intelligent Agent Technology** Ning Zhong,2001 This volume is an attempt to capture the essence of the state of the art of intelligent agent technology and to identify the new challenges and opportunities that it is or will be facing The most important feature of the volume is that it emphasizes a multi faceted holistic view of this emerging technology from its computational foundations OCo in terms of models methodologies and tools for developing a variety of embodiments of agent based systems OCo to its practical impact on tackling real world problems Contents Formal Agent Theories Computational Architecture and Infrastructure Learning and Adaptation Knowledge Discovery and Data Mining Agents Distributed Intelligence Agent Based Applications Readership Graduate students in computer science and engineering academics lecturers researchers software systems engineers IT engineers and industrialists   *Applications of Agent Technology in Traffic and Transportation* Franziska Klügl,Ana Bazzan,Sascha Ossowski,2006-03-30 Building effective and user friendly transportation systems is one of the big challenges for engineers in the 21st century There is an increasing need to understand model and govern such systems at both the individual and the society level Traffic and transportation scenarios are extraordinarily appealing for Distributed Artificial Intelligence and multi agent technology in particular This book gives an overview of recent advances in agent based transportation systems   **Coordination and Agent Technology in Value Networks** Martin Bichler,2004 New approaches and technologies are required to coordinate the interdependent interests of economic entities Distributed decision making and self organization become increasingly important where hierarchical planning reaches its limits Therefore innovative solutions have to face those challenges allowing especially for coordination and information processing between distributed entities In particular market based coordination mechanisms provide this opportunity they can be efficiently combined with powerful technologies like software agents to build the flexible coordination infrastructures for today s and tomorrow s electronic business Science and industry will have to collaborate Not only to identify the challenges of the prospering information society and to bring them onto our research agendas Consequently the book at hand is targeted towards scientists and practitioners likewise   Intelligent Agent Technology: Systems, Methodologies And Tools - Proceedings Of The 1st Asia-pacific Conference On Intelligent Agent Technology (Iat '99)

Jiming Liu,Ning Zhong,1999-11-05 This book is a collection of high quality technical papers contributed by active researchers and leading practitioners in intelligent agent technology It offers a closer look at the state of the art in the development of intelligent agents and examines in depth the underlying logical cognitive physical and biological foundations as well as the performance characteristics of various approaches in intelligent agent technology It will stimulate the development of new models new methodologies and new tools for building a variety of embodiments of agent based systems **Massively Multi-Agent Technology** Nadeem Jamali,2008-08-04 This book constitutes the thoroughly refereed post workshop proceedings of the joint AAMAS 2006 International Workshops on Massively Multi Agent Systems MMAS 2006 and on Large scale Multi Agent Systems LSMAS 2006 held in Hakodate Japan in May 2006 and of the International Workshop on Coordination and Control in Massively Multi Agent Systems CCMMS 2007 held in Honolulu HI USA in May 2007 as associated event of AAMAS 2007 The 13 revised full papers presented were carefully selected from the presentations made at the 3 workshops fall in 4 broad categories presenting a snapshot of current research Included are implementation strategies addressing coordination in the space of spatial and temporal distributed systems approaches to deal with complexity to make decisions such as task allocation and team formation efficiently by creating implicit or explicit encapsulations and finally a diverse range of applications to which these approaches may be applied from large scale agent based simulations to managing different types of networks to image segmentation *Agent Technology for Intelligent Mobile Services and Smart Societies* Fernando Koch,Felipe Meneguzzi,Kiran Lakkaraju,2015-02-09 This book constitutes the refereed proceedings of the Workshop on Collaborative Agents Research and Development CARE 2014 and the Workshop on Agents Virtual Societies and Analytics AVSC 2014 held as Part of AAMAS 2014 in Paris France in May 2014 The 10 revised full papers presented were carefully reviewed and selected from more than 40 submissions The papers deal with the following topics an ubiquitous service oriented architecture for urban sensing geo fencing based disaster management service applying ontologies and agent technologies to generate ambient intelligence applications VIRTUAL ME a library for smart autonomous agents in multiple virtual environments shared message boards for smart enterprises an improved learning automata approach for the route choice problem urban context detection and context aware recommendation via networks of humans as sensors mining social interaction data in virtual worlds a multi agent architecture to support ubiquitous applications in smart environments caring for my neighborhood a platform for public oversight **Agent and Multi-agent Technology for Internet and Enterprise Systems** Anne Hakansson,Ronald Hartung,Ngoc-Thanh Nguyen,2010-07-14 Research in multi agent systems offers a promising technology for problems with networks online trading and negotiations but also social structures and communication This is a book on agent and multi agent technology for internet and enterprise systems The book is a pioneer in the combination of the fields and is based on the concept of developing a platform to share ideas and presents research in technology in the field and application to real problems The

chapters range over both applications illustrating the possible uses of agents in an enterprise domain and design and analytic methods needed to provide the solid foundation required for practical systems *Applications of Software Agent Technology in the Health Care Domain* Antonio Moreno,John L. Nealon,2012-12-06 Agent Cities 4 is an ambitious project whose main aim is the construction of a worldwide publicly accessible network of agent based FIPA platforms In March 2003 there are around 50 active platforms Each of them supports agents that offer services similar to those that can be found in a real city facilities amenities attractions information and commercial services It is expected that in the near future it will be possible to implement intelligent complex compound services e g agents that are able to help a user to plan a weekend away including tasks such as booking air tickets selecting and booking a room in an appropriate hotel buying tickets for the theatre and reserving a table in a restaurant that is near the theatre and offers the user s favourite meal The main aim of our work was to develop a set of agents that could offer to the citizens and visitors of a city not the usual leisure oriented services but health care related services This interest is related with previous work that our research group had done in the last years in the application of AI techniques especially agent based technology to the medical domain see e g 6 Therefore we decided to design and implement a multi agent system with the following features The user may request information about all the medical centres available in a particular geographical area *Agent Technology from a Formal Perspective* Michael Hinchey,Christopher Rouff,James Rash,Walt Truszkowski,Diana F. Gordon-Spears,2006-01-27 The field of agent indicating open problems to be addressed by future researchers students practitioners **Human Cognition and Social Agent Technology** Kerstin Dautenhahn,2000 This text discusses design issues of social agent technology with the perspective of human cognition It combines the disciplines of computer science social science and psychology but seeks to avoid being overly technical and is written for an interdisclipinary audience *Agent Technology and e-Health* Roberta Annicchiarico,Ulises Cortes Garcia,Cristina Urdiales,2008-04-05 Multi agent systems are one of the most exciting research areas in Artificial Intelligence This book reports on the results achieved in this area discusses the benefits and drawbacks that agent based systems may bring to medical domains and society and also provides a list of the research topics that should be tackled in the near future to make the deployment of health care agent based systems a reality Current topics of research include communication and co operation between distributed intelligent agents to manage patient care *Agent and Multi-Agent Systems: Technologies and Applications* Anne Hakansson,Ronald Hartung,2009-05-25 This book constitutes the proceedings of the Third International Symposium on Agent and Multi Agent Systems Technologies and Applications held in Uppsala Sweden during June 3 5 2009 The 86 papers contained in this volume were carefully reviewed and selected from numerous submissions There are 13 main tracks covering the methodology and applications of agent and multi agent systems and 8 special sessions on specific topics within the field The papers are divided in topical sections on social and organizational structures of agents negotiation protocols mobile agents and robots agent design and implementation e
