experience of the author failure cases are very common and they include any type of company Many reasons to explain the failures and in some cases the successes could be postulated however the experiences are not structured enough and it is difficult to extract from them useful guidelines for avoiding future problems Generally speaking there is a trend to find the root of the problems in the technology itself and in its adequacy with the preexistent technological context Technocratic technology transfer models describe the problems in terms of these aspects Although it is true that those factors limit the probability of success there is another source of explanations linked to the individuals and working teams and how they perceive the technology
