## **Aging From Birth To Death Interdisciplinary Perspectives:**

Towards an Interdisciplinary Perspective on the Life Course René Levy, Paolo Ghisletta, Jean-Marie Le Goff, Dario Spini, Eric Widmer, 2005-11-17 Despite the well established consensus on the need for an interdisciplinary research paradigm to understand the unfolding of human lives within their social context existing empirical research rarely embraces this belief This volume aims at examining the feasibility and hurdles of interdisciplinarity specific to given research fields by bringing together leading North American and European researchers in sociology psychology social psychology and social demography all highly concerned with fostering an interdisciplinary perspective for the study of the human life course The contributions are organized along four major axes three of them substantive agency and structure transitions and biographical re constructions and one methodological methodological innovations leaving ample leeway for the contributions to address the specific gains and difficulties of empirical interdisciplinary research within their particular domain The editors introduce the volume by discussing general features theoretical linkages and transversal substantive themes of interdisciplinarity in life course research Likewise the volume is ended by the editors conclusions based on the contributions they single out major challenges and difficulties for the interdisciplinary study of the life course together with some promising research meant to address such difficulties and improve current knowledge about the life course The volume speaks to both experienced scholars and graduate students of the life course Advanced scholars will benefit from the latest in life course research domains and from a comprehensive overview of life course methodologies Graduate students of the life course will find in the book an original introduction to many empirical aspects of life course research and to the application of innovative methods to various research settings as well as rich bibliographical references from the research literature in English German and French

Life-span Perspectives and Social Psychology R. P. Abeles, 2014-02-25 First published in 1987 There is a wide gap between life span research and mainstream social psychology and this book strikes a bright spark between these poles promising as a corrective to narrowness and sterility The chapters reflect a wide variety of approaches in social psychology as well as considerable breadth in the range of ideas from life span human development that are brought to bear

**Aging From Birth To Death** Ronald P Abeles, Michael S Teitelbaum, 1979 *Aging from Birth to Death* Matilda White Riley, 2019-03-13 This book provides deeper understanding of the aging process of the likely differences between the lives of past and future generations and of the potential for optimizing these future lives from cross cultural and cross temporal perspectives

**Aging from Birth to Death** Taylor & Francis Group, 2020-04-28 The ways in which people age from birth to death over the life course depend upon where and when they live Much evidence has been gathered to demonstrate that aging is not an immutable process rather aging varies as social structure varies and changes But how does the life course vary Under what conditions of place and time do particular individuals age in particular ways This book a companion to *Aging from Birth to Death Interdisciplinary Perspectives* edited by Matilda White Riley AAAS Selected

Symposium 30 Westview 1979 addresses these questions from two perspectives From the cross cultural perspective anthropologists and sociologists examine the cultural variability of aging as this variability reveals the nature and extent of social and cultural influences on the aging process the lives of people of all ages and the general significance of age norms and age graded institutions in society From the cross temporal perspective historians sociologists and demographers examine the impact of social change both on the process of growing up and growing old and on the place in society of people of all ages The authors stress that the changing society is composed of people who are aging and who are not only shaped by but are also continually shaping social institutions values and technologies Thus the book provides deeper understanding of the aging process of the likely differences between the lives of past and future generations and of the potential for optimizing these future lives     **Aging** ,1982     **An Aging World** Barbara Boyle Torrey, Kevin G. Kinsella, Cynthia Murray

Taeuber, 1987     Age Structuring in Comparative Perspective David I. Kertzer, K. Warner Schaie, 2013-05-13 This volume studies age as a basis for social organization by uniting research from the social science disciplines while implementing both cross cultural and historical perspectives The contributors a distinguished interdisciplinary group of scholars advance our understanding of age structuring by relating the changing societal level processes and individual aging experiences and examining retirement practices age and power in society and cultural conceptions of age     **Rising Infant Mortality in**

**the U.S.S.R. in the 1970's** Christopher Davis, Murray Feshbach, 1980     **Inequality And Old Age** John A Vincent, 2003-09-02 An analysis of ageing in relation to identity formation inequality and stratification The book outlines a theory of social inequality which encompasses those inequalities associated with old age in addition to class gender race and ethnicity This book is intended for undergraduate and postgraduate sociology courses in social stratification and social theory as well as students and researchers in social policy social welfare and health with an interest in the study of ageing

**Aging in Society** Matilda White Riley, Beth B. Hess, Kathleen Bond, 2025-07-01 Originally published in 1983 Aging in Society consists of a selection of papers that were prepared by various authors as background papers for the 1981 White House Conference on Aging The papers provided an overview of knowledge on various aspects of aging in the United States at the time Topics covered include aging and the family economic aspects of an aging population recent trends in the geographical distribution of the elderly population and mortality and health differentials by sex Today it can be read in its historical context     **Bibliographie Internationale de Sociologie 1980** ,1982 Each Bibliography lists and annotates the

most important works published during the year They are arranged by topic and indexed by author subject and geographic location     **A Generation of Change** Jacob S. Siegel, 1993-02-18 A Generation of Change is an exceptional study of the nation s elderly a population that has undergone profound changes in the years since World War II As modern medicine extends the average life span and the baby boom generation begins to approach middle age the number of older Americans is expected to more than double in the next century Currently 75 percent of U S health care expenditures go toward the elderly

But as national trends toward early retirement and low birthrate continue an aging American population could face crises in meeting their financial and physical needs According to Jacob S Siegel in *A Generation of Change* astute public planning must be informed by an understanding of the demographic social and economic characteristics of the older population as it is today and as it will be in the coming years Siegel employs census and survey data from 1950 through the mid 1980s to describe a population constantly shifting in its ethnic and gender composition geographic distribution marital and living arrangements health employment and economic status Surprisingly there is tremendous disparity in the quality of life among the elderly Although their average poverty rate is below that of the general population there are dramatic levels of poverty among older women who are far more likely than men to live alone or in institutions As the elderly progress from the young old to the aged old those over 85 sharp differences emerge as income and employment decrease and degrees of chronic illness increase In addition residential location influences the quality of health care and public assistance available to the elderly an effect that may account for the marked migration of older people to Florida and Arizona Siegel analyzes the full range of characteristics for this heterogeneous population and through comparisons with other age groups as well as with the elderly of the previous decades portrays the crucial influence of social and economic conditions over the life course on the quality of later life With our elderly population growing more numerous and long lived accurate information about them is increasingly essential *A Generation of Change* will serve as a valuable resource for policymakers seeking more effective solutions in critical areas such as housing long term health care and the funding of Social Security and retirement programs

*A Volume in the Russell Sage Foundation Census Series*      **Communication, Health, and the Elderly** Howard Giles, Nikolas Coupland, John M. Wiemann, 1990      *Role Transitions* Vernon L. Allen, Evert van de Vliert, 2012-12-06

The concept of role transition refers to a wide range of experiences found in life job change unemployment divorce entering or leaving prison retirement immigration Gastarbeiten becoming a parent and so on Such transitions often produce strain and hence a variety of problems for the transiting individual occupants of complementary social positions and other members of one's social group and community In spite of the diversity of role transitions that occur however it is important also to realize that many basic psychological processes can be discerned in ostensibly different instances Research on role transitions has been dispersed across many different subdisciplines of the social sciences the problem can be investigated from several points of view and levels of analysis As modern societies become ever more complex role transitions can be expected to increase in number and diversity with a concomitant increase in detrimental consequences for the individual and society Hence for reasons of both theory and practice improved conceptual models and new empirical data are needed The chapters in this book are the outcome of a NATO symposium convened for the purpose of discussing aspects of role transitions from international and interdisciplinary perspectives The meeting was designed to be a working conference to facilitate as much intellectual exchange and debate among participants as possible
