Aging Scientific Perspectives And Social Issues:

Handbook of Theories of Aging, Second Edition Merrill Silverstein PhD, Vern L. Bengtson PhD, Norella Putney PhD, Daphna Gans PhD, 2008-10-27 The field of gerontology has often been criticized for being data rich but theory poor. The editors of this book address this issue by stressing the importance of theory in gerontology. While the previous edition focused on multidisciplinary approaches to aging theory, this new edition provides cross-disciplinary integrative explanations of aging theory. The contributors of this text have reached beyond traditional disciplinary boundaries to partner with researchers in adjacent fields in studying aging and age-related phenomena. This edition of the Handbook consists of 39 chapters written by 67 internationally recognized experts in the field of aging. It is organized in seven sections reflecting the major theoretical developments in gerontology over the past 10 years: Special Features, Comprehensive coverage of aging theory focusing on the biological, psychological, and social aspects of aging, A section dedicated to discussing how aging theory informs public policy, A concluding chapter summarizing the major themes of aging and offering predictions about the future of theory development. Required reading for graduate students and post-doctoral fellows, this textbook represents the current status of theoretical development in the study of aging. Aging Diana S. Woodruff-Pak, Diana S. Woodruff, James E. Birren, 1983 **Demographic and Socioeconomic Aspects of Aging in the United States** Jacob S. Siegel, Maria Davidson, 1984 Brings together and analyzes data on selected topics related to the demographic and socioeconomic characteristics of the older population in the United States. The report covers for older persons age, sex, and race, geographic distribution, and residential mobility. **Demographic Aspects of Aging and the Older Population in the United States** Jacob S. Siegel, 1978 **Experimental Psychology, Cognition, and Human Aging** Donald H. Kausler, 2012-12-06 This book is a major revision and extension of my earlier book *Experimental Psychology and Human Aging* which appeared in 1982. The intervening years have seen a remarkable expansion of psychological research on human aging, especially on topics dealing with cognition. They have also seen research on cognitive aging gain increasing importance within the mainstream of basic cognitive research. As my lecture notes for my course in the psychology of aging grew, so did my apprehension regarding the task ahead of me in revising the first edition. The research explosion in cognitive aging forced several major changes in content from the first to the second edition. Two chapters on learning and memory in the first edition were necessarily expanded to six chapters in the present edition. Similarly, the single prior chapter on perception and attention became two chapters, as did the single prior chapter on thinking. Another change from the first edition is the addition of some review of the effects of abnormal aging on various cognitive processes, particularly in regard to memory functioning. To keep the revision within reasonable length, some sacrifices had to be made. The multiple chapters on methodology and theory in the first edition were condensed into the present single chapter. However, the major topics from the first edition were retained and in fact added to by the inclusion of important topics and issues that emerged over the past eight years.

The Science of Well-being Felicia A. Huppert, Nick Baylis, Barry Keverne, 2005 How much do we know about what makes people thrive and societies flourish While a vast body of research has been dedicated to understanding problems and disorders we know remarkably little about the positive aspects of life the things that make life worth living This landmark volume heralds the emergence of a new field of science that endeavours to understand how individuals and societies thrive and flourish and how this new knowledge can be applied to foster happiness health and fulfillment and institutions that encourage the development of these qualities Taking a dynamic cross disciplinary approach it sets out to explore the most promising routes to well being derived from the latest research in psychology neuroscience social science economics and the effects of our natural environment Designed for a general readership this volume is of compelling interest to all those in the social behavioural and biomedical sciences the caring professions and policy makers It provides a stimulating overview for any reader with a serious interest in the latest insights and strategies for enhancing our individual well being or the well being of the communities in which we live and work Cognitive and Behavioral Performance Factors in Atypical Aging Mark L. Howe, Michael J. Stones, Charles J. Brainerd, 2012-12-06 It is a truism that as we age there are a number of underlying physiological changes conspiring to alter our level of behavioral and cognitive functioning Despite the inherent interrelatedness of these behavioral and cognitive changes all too often the papers we read confine themselves to specific isolated components of the developing process Although exceptions naturally exist we believe that these exceptions should become rule Although an integrated approach is important in all areas of adult development it is perhaps particularly germane in the study of atypical aging Here changes in overall functioning can occur in rapid succession with the synchrony of decline between different subprocesses making it difficult to factor changes in one process from changes in another For example because changes in cognitive functioning co occur with other dramatic changes in motoric response capacities it is unclear how one can effectively study changes in the ability to cognize independent of changes in the very mechanisms ability to execute motor sequences so often used to index cognitive performance *A Guide to Minority Aging References* Jose B. Cuellar, 1983 Current Catalog National Library of Medicine (U.S.), 1985 First multi year cumulation covers six years 1965 70 Images of Aging Mike Featherstone, Andrew Wernick, 2003-09-02 The contributors in this book discuss images of aging which have come to circulate in the advanced industrial societies today They address such themes as gender images of aging images of health illness and death **The Psychology of Ageing** Ian Stuart-Hamilton, 2012-05-15 This well established text has been completely revised in this expanded fifth edition Each chapter has been updated to reflect current thinking and a new chapter on death dying and bereavement has been added This new edition is essential reading for all those working with older people and a key text for students **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1983 *Developmental Aspects of Health Compliance Behavior* Norman A. Krasnegor, Leonard Epstein, Suzanne B. Johnson, Sumner J. Yaffe, Leonard H. Epstein, 2013-05-13 While in the late 1970s and early 1980s health

compliance research on adults represented a vigorous field of study a marked decline of interest on the topic set in during the last part of the 1980s By contrast research on health compliance involving pediatric populations was less popular during the same period however interest in this topic as evidenced by the contributions to this volume is on the increase Four main themes relating to theory measurement prevention and intervention emerge and are interwoven among the chapters These themes help to bind and unify the volume into a conceptual whole because although the sections are divided along thematic lines contributors often include elements of some or all of the themes in their chapters This state of affairs reflects the interdependence of these thematic issues and suggests how important they are for the state of the art

Sigel,1989 In the wake of World War II the issues of political stability in general and the survival of stable democracies in particular captured the attention of American political scientists An inevitable offshoot of this interest was the study of political behavior how it is acquired and how and why it persists In its early stages work on political socialization focused exclusively on childhood and adolescence as if the learning process ends when adulthood begins Only recently has adult socialization emerged as a legitimate field of study within political science In *Political Learning in Adulthood* social scientists for the first time examine the changes in political outlook and behavior that take place during the adult years providing an invaluable overview of the problems theories and methodological approaches that characterize the field of political socialization They consider which political values remain constant and which are subject to change and they explore the ways in which both ordinary and extraordinary life events affect adults political worldviews Among specific topics considered are the effects of age and aging the relation between participation in the work force and the development and expression of political views continuity and change in the wake of revolutionary social and political movements and the effects of such traumatic and life threatening situations as war and terrorist activity

Handbook of Marriage and the Family Suzanne K. Steinmetz,Marvin B. Sussman,2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them

leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4
