The Digitalisation of African Agriculture Report 2018-2019 Tsan, Michael, Totapally, Swetha, Hailu, Michael, Addom, Benjamin K., 2019-06-30 An inclusive digitally

enabled agricultural transformation could help achieve meaningful livelihood improvements for Africa's smallholder farmers and pastoralists. It could drive greater engagement in agriculture from women and youth and create employment opportunities along the value chain. At CTA we staked a claim on this power of digitalisation to more systematically transform agriculture early on. Digitalisation focusing on not individual ICTs but the application of these technologies to entire value chains is a theme that cuts across all of our work. In youth entrepreneurship we are fostering a new breed of young ICT agripreneurs. In climate smart agriculture multiple projects provide information that can help towards building resilience for smallholder farmers. And in women empowerment we are supporting digital platforms to drive greater inclusion for women entrepreneurs in agricultural value chains.
