Abstract: During the "14th Five-Year Plan," Yulin's agricultural mechanization developed rapidly, hilly mountain agricultural production gradually from animal power-based to rely on mechanical power transformation. However, due to the restriction of natural conditions and development basis, there are still problems such as unbalanced development of agricultural machinery and equipment, imperfect service system of agricultural mechanization, the small scale of agro-machinery industry and insufficient input of agricultural scientific research in Yulin. In view of this, put forward the policy suggestions to promote the development of agricultural mechanization in Yulin: improve the effectiveness of infrastructure construction, strengthen the innovation of agricultural science and technology, construct the modern agricultural management system, increase the investment of agricultural machinery scientific research and other countermeasures.

Keywords: Hilly and Mountainous Areas; Agricultural Mechanization; Yulin; Current Situation and Countermeasures.

1. Introduction

The mechanization of agriculture is an important support to promote the transformation of traditional agriculture to modern agriculture, which is conducive to the transformation of agricultural production methods and the improvement of agricultural productivity. In recent years, with the further implementation of agricultural machinery purchase subsidies, the implementation of the measures of strengthening farmers to benefit, Shaanxi province agricultural machinery equipment in the total continued to grow, the level of operation is steadily improved. The total power of agricultural machinery in 2021 totals 24312.1 thousand kw, arable land area 3174.48 thousand hm², the overall mechanization rate of main crop cultivation is 71.1%. The development of agricultural mechanization continues to inject new kinetic energy into modern agriculture in Shaanxi Province, which has become an important driver of high-quality agricultural rural development.

The total land area of Yulin is 4292.02 thousand hm², the landform is divided into three categories: wind sand and grass beach area, loess hilly gully area, beam-like low hilly area. Among them, the loess hilly gully area is mainly in the southeast, with a total area of 58%, it covers the counties of Suide, Mizhi, Jia County, Wuba, Qingjian and Zichou. The region's agricultural production is dominated by drought. Mainly cultivated are small grains, potatoes, corn, mountain apples, etc., the area of grain sown is 245.87 thousand hm², accounting for 33.8% of the city's total food area. During the "14th Five-Year Plan," the rapid development of agricultural mechanization in Yulin, the gradual renewal of agricultural machinery in hilly mountainous areas, agricultural production gradually entered a new stage dominated by mechanical power. In 2020, a high-standard farmland area of 1850 thousand hm² was added, with 67.19% of the overall mechanization level of major crop cultivation. However, there is still a large gap compared to the national average level of agricultural mechanization development of 71%. The 2023 Yulin Municipal Committee Working Meeting on Rural Areas

pointed out that we should continue to promote scientific and technological empowerment, continuously improve the level of agricultural mechanization, and further improve the level of integrated mechanization of major crops.

2. Development Status of Agricultural Mechanization

On the level of agricultural machinery and equipment, the total amount of agricultural machinery and equipment in Yulin increased significantly, the structure of agricultural machinery and equipment is continuously optimized, the main crop production machinery and equipment types are constantly abundant. In 2021, the total power of Yulin's agricultural machinery reached 3227.6 thousand kw, with all kinds of agricultural machinery 560 thousand units (sets). Of these, 24,159 large and medium-sized tractors, 27532 small tractors, 77308 tractors with agricultural implements, 3721 food crop combine harvesters and 2049 other crop combine harvesters [1]. The continuous abundance of agricultural machinery and types provides important equipment support for agricultural production and efficiency enhancement.

At the level of agricultural machinery, the area of machine farming in Yulin continues to expand, and the level of agricultural machinery work continues to improve. At the end of 2020, Yulin's machine farming area 0.69 thousand km², machinery sowing 4.4 thousand km², machinery tillage 2.7 thousand km², implementation of agricultural machinery deep pine ground 0.67 thousand km². Among them, Yuyang District is the first to become a national level basic to achieve the whole process of major crop production mechanization demonstration county, the total power of agricultural machinery in the region reached 470 thousand kw. In the spring farming operation of 2023, the full use of all kinds of agricultural machinery for production. More than 380 technicians have been deployed to the relevant departments. Guidance for more than 2,000 agricultural machinery households, overhaul of all kinds of agricultural machinery 400 (Set) to ensure the steady and orderly development of agricultural production throughout the year.
