New Limits on European Agriculture François Duchêne, Edward Szczepanik, Wilfrid Legg, 2023-07-26 Until about 1970 Western Europe was regarded as the great food importing region of the world Over the next 15 years it also became a major food exporter This study originally published in 1985 analyses the expansionary policies of individual nations as well as those of the Community itself which have helped produce this momentous reversal of Western Europe s traditional role The phenomenon in the international food market is reviewed within the context of the economic and political forces responsible for changes in Western European agriculture during the late 20th Century

African Politics in Comparative Perspective Goran Hyden, 2013 This revised and expanded second edition of African Politics in Comparative Perspective reviews fifty years of research on politics in Africa and addresses some issues in a new light keeping in mind the changes in Africa since the first edition was written in 2004

The book synthesizes insights from different scholarly approaches and offers an original interpretation of the knowledge accumulated in the field. Goran Hyden discusses how research on African politics relates to the study of politics in other regions and mainstream theories in comparative politics. He focuses on such key issues as why politics trumps economics, rule is personal, state is weak and policies are made with a communal rather than an individual lens. The book also discusses why, in the light of these conditions, agriculture is problematic, gender contested, ethnicity manipulated and relations with Western powers a matter of defiance.

Transition to Agricultural Market Economies Andrew Schmitz, William H Meyers, 2015-06-22

It is believed that the major countries of the former Soviet Union specifically Kazakhstan, Russia and Ukraine, KRU region are the part of the world with the most potential to increase food supplies and strengthen world food security. This book examines the future of the KRU countries in global agricultural markets and will examine a number of agricultural sectors including meat, dairy, fruits and vegetables. However, particular attention is paid to the region's potential expansion of the grain sector and why the KRU region emerged during the 2000s as a major grain exporter and its potential to further expand grain production and exports. It also examines the issues of environmental constraints and trade offs for agriculture sustainability and the possible effects of climate change.

Reforming the Common Agricultural Policy I. Garzon, 2006-08-04

Reforming the Common Agricultural Policy presents an unprecedented comparison of three successive major reforms of the CAP. It shows the influence of related issues such as international trade negotiations and budget constraints and demonstrates that factors such as opening of the policy network and feedback were key to accelerating change.

European Agricultural Research in the 21st Century Guy Paillotin, 2013-04-17

Jointly published with INRA Paris. What will people eat in the future and how can the food requirements in terms of quantity and quality be met? This EU based study elucidates the need for a productivity level that will make agriculture competitive on the market and yet is reconciled with the need to manage natural resources and lands wisely. In this book, the necessary changes for European agriculture from the biological, medical, economic and political perspective are discussed.

Productivity Growth in Agriculture K. O. Fugile, 2012

Increasing food prices have renewed concerns about long term agricultural demand and supply in the global economy. This book looks at results, methods and data on international agricultural productivity for a better understanding of long run trends and the policies that determine them. By presenting an international assessment of total factor productivity growth in agriculture including up to date empirical analysis for developed and developing countries and regions, it provides a response to the rising global scarcity of agricultural production. It is essential reading for researchers.
