*Agriculture in the Tropics* J. C. Willis,2015-06-28 Excerpt from Agriculture in the Tropics An Elementary Treatise During the last twenty five years a great deal of attention has been drawn to agriculture in the tropics as to other subjects connected with the same regions of the world Not only do people travel more in the tropical regions not only has there been great rivalry between the nations of the North in acquiring and developing colonies there but also such agricultural phenomena as the collapse of coffee planting and the rise of cinchona cacao and tea in Ceylon the depression of sugar in the West Indies

and the formation of an Imperial Department of Agriculture to deal with the situation the recent rise of rubber planting in Ceylon the Federated Malay States Mexico and other tropical countries and the depression in cotton followed by the formation of the British Cotton Growing Association and the extension of the cultivation of this crop in the West Indies and the British African colonies have all in themselves excited very general interest This has shown itself among other things in the formation of departments of agriculture in most of the colonies of the tropics The danger is now that we may try to go too rapidly without a proper thinking out of the subject About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
