Lanteigne,2005-11-14 China has shifted its foreign policy from one that avoided engagement in international organizations to one that is now embracing them These moves present a new challenge to international relations theory How will the global community be affected by the engagement of this massive global power with international institutions This new study explores why China has chosen to abandon its previous doctrine of institutional isolation and details how it is currently unable to balance American power unilaterally and details an indirect path to greater power In addition it includes the first major analysis of the Shanghai Cooperation Organization comprising China Russia and most of Central Asia In contrast to many works on the rise of China question which place an emphasis on her material goods and powers this book delivers a new approach It shows how the unique barriers Beijing is facing are preventing the country from taking the traditional paths of territorial expansion and political economic domination in order to develop as a great power One of these barriers is the United States and its inherent military and economic strength The other is the existence of nuclear weapons which makes direct great power conflict unacceptably costly China has therefore opted for a new path using institutions as stepping stones to great power status This book will be of great interest to students and scholars of international relations world politics world history and Asia **Authoritative Democracies** Bill K. Koul,2022-07-22 This book comments on growing

authoritarianism in democracy and suggests how it ought to be instead It asks if some degree of authoritarianism is the need of the hour to address potentially existential issues facing the human race Readers are encouraged to analyse the state of democracy in their own countries and verify if it meets their expectations or if it is just a myth or an imposter or a necessary but imperfect compulsion in the absence of a perfect alternative The book presents a commentary on the state of democracy in some of the world s leading democracies It aims to challenge the human mind which seems to be getting accustomed to not having to think thanks to a constant bombardment of information real and fake and in between that it receives through social and print media which is freely accessible through smartphone to which it has become addicted It discusses how the drivers of capitalism through their business like connections with powerful and influential politicians and celebrities could be cleverly manipulating the gullible human mind and exploiting the system to their own material benefit *Baby boom and bust* United States.
