## **Ahead Of The Curve Cases Of Innovation In Environmental Management:**

**Ahead of the Curve** K. Green,P. Groenewegen,P.S. Hofman,2012-12-06 The debate on sustainable production often ends in discussions on the feasibility of far reaching changes in relation to the competitiveness of companies Industry itself and policy makers tend to back away from engaging in profound processes of industrial transformation Examples of companies who have voluntarily moved beyond what is seen as reasonable and feasible can overcome this deadlock This book collects a fine sample of companies who have taken up their responsibility in this respect To quote the editors of this book They are cases that might provide other firms and policy makers with ideas for innovative environmental responses that are outside the slowly rising trend of improvement that we are currently observing in short the cases are of firms and ideas that are ahead of the curve The editors and many of the authors of this volume are members of the Greening of Industry Network and have been debating with one another for years Founded in 1991 the Greening of Industry Network comprises over 1500 individuals representing academia business public interest labor and government from more than 50 countries Participants work together to build policies and strategies toward creating a sustainable future through many vehicles coordinating research efforts publications planning and participating in workshops public forums and conferences To provide benefit to broader society the Network stimulates public dialogue and brings together academic researchers from many disciplines with other stakeholders who traditionally do not work together in coalitions [Environmental Management Accounting - Purpose and Progress](#)

[M.D. Bennett,P.M. Rikhardsson,Stefan Schaltegger,2003-08-31](#) This is the second book of selected papers on environmental management accounting EMA which has been developed for Kluwer by the Environmental Management Accounting Network Europe EMAN Eu drawn primarily from papers presented at EMAN Eu to bring together several examples of leading thinking and practice internationally in this rapidly developing area The authors include academics practitioners from industry and government policy makers and the subjects covered range from individual company experiences to the role of government in promoting EMA in industry The papers included in the book provide several examples of how EMA can be applied in practice both in large corporations and in small and medium sized enterprises and of reports on the extent of the implementation of EMA and the conditions which encourage this The book is intended for all those interested in EMA as either researchers or practitioners It will also be of interest both to those interested in how well established management accounting methods can be adapted and extended in order to meet new demands on companies and also to environmental managers interested in learning how accounting techniques can be of value in achieving environmental management objectives **Partnership and Leadership** T. de Bruijn,Arnold

Tukker,2013-10-14 Sustainable development has become a central perspective in environmental strategies around the world It is clear that neither governments nor businesses have the capability to bring about sustainability on their own Therefore collaboration has emerged as a central concept At the same time it is obvious that someone has to take the lead in the

development towards sustainability This book focuses on different forms of collaboration emerging between various actors The objective of the book is to more systematically explore the different roles and relationships between partnership and leadership Basically both partnership and leadership can be seen in a positive and negative way for example as far as partnership is concerned we can assume that the path towards sustainability can be paved by parties coming together taking some initiative collaborating On the opposite partnership and consensus based decisions can be seen as an obstacle to foster radical changes in production and consumption patterns Similarly leadership can be seen as an obstacle to sustainable development if leaders form close circles and are not willing to share experiences with other actors but leadership could also be considered as an important element to keep concepts and practices forward The book holds this double perspective explaining mapping and analyzing different goals formats methods of more and less collaborative approaches but at the same time taking a critical approach to the theme by understanding related risks effects prospects and corrective actions Next to a conceptual part the book brings together case studies from around the world The focus is in describing and understanding various formats of collaboration and critically evaluating its effects and prospects A concluding chapter discusses the role of partnership and leadership in realizing various levels of environmental innovations optimization and re design that usually affect only a small part of the production consumption structure and much more complicated radical innovations that have to deal with societal sub systems The book is in part an edited version of selected papers presented during the 1998 Greening of Industry Conference in Rome on the subject enriched with contributions of other invited authors

Organizational Change for Corporate Sustainability Dexter Colboyd Dunphy, Andrew Griffiths, Suzanne Benn, 2003 Using specific examples of incremental and transformational changes and outlining the long term corporate benefits of sustainability the book examines the changes required to achieve true sustainability

*The European Union's Eco-Management and Audit Scheme (EMAS)* Michael S. Wenk, 2005-07-09 This text definitively breaks down each component of the Eco Management and Audit Scheme regulation EMAS even its appendices and EU guidance documents providing a step by step analysis of the Scheme In addition the work offers case examples of three of Akzo Nobel manufacturing locations which have been registered to EMAS providing real world advice on how to meet the requirements of the Scheme

The Computational Structure of Life Cycle Assessment R. Heijungs, Sangwon Suh, 2002-05-31 Life Cycle assessment LCA is a tool for environmental decision support in relation to products from the cradle to the grave Until now more emphasis has been put on the inclusion quantitative models and databases and on the design of guidebooks for applying LCA than on the integrative aspect of combining these models and data This is a remarkable thing since LCA in practice deals with thousands of quantitative data items that have to be combined in the correct manner For this one needs mathematical rules and algorithmic principles for carrying out an LCA This book presents the first coherent treatment of the mathematical and algorithmic aspects of LCA These computational aspects are presented in matrix form so that a concise and elegant formulation is achieved This form moreover provides a

platform for further extension of analysis using perturbation theory structural theory and economic input output analysis

**The Effectiveness of Policy Instruments for Energy-Efficiency Improvement in Firms** Kornelis Blok,2004-05-31

How can governments stimulate energy efficiency improvement This book analyzes environmental policy in the Netherlands to present a wealth of empirical results on the successes and failures of governmental initiatives in environmental policy

Discussion extends to such topics as free rider effects of subsidies the credibility of voluntary agreements the art of regulation and the fate of research development money

Leveraging the Private Sector Cary Coglianese,Jennifer

Nash,2010-09-30 Leveraging the Private Sector offers the first sustained analysis of public and private sector initiatives

designed to encourage firms and industries to use their own management expertise to improve their environmental

performance Cary Coglianese and Jennifer Nash bring together original empirical studies by the nation s leading experts on

recent public and private sector experiments Do management based strategies lead to improved environmental outcomes

What kinds of strategies hold the most promise Leveraging the Private Sector addresses these questions through studies of state pollution prevention planning laws private sector purchasing requirements and federal risk management regulations

among others The contributors show that efforts to leverage private sector experience and knowledge can have a distinctive contribution in the future of environmental protection Ultimately a firm s broader management practices shape its

environmental performance Public and private sector strategies that seek to influence these practices directly can help bring about further environmental improvements This book breaks new ground by investigating a new and promising approach for

advancing the economy and the environment

**Computers and the Environment:**

**Understanding and Managing their Impacts** R. Kuehr,Eric Williams,2012-12-06 Personal computers have made life

convenient in many ways but what about their impacts on the environment due to production use and disposal Manufacturing computers requires prodigious quantities of fossil fuels toxic chemicals and water Rapid improvements in performance mean

we often buy a new machine every 1 3 years which adds up to mountains of waste computers How should societies respond

to manage these environmental impacts This volume addresses the environmental impacts and management of computers through a set of analyses on issues ranging from environmental assessment technologies for recycling consumer behaviour strategies of computer manufacturing firms and government policies One conclusion is that extending the lifespan of computers e g through reselling is an environmentally and economically effective strategy that deserves more attention from governments firms and the general public      *Ambiguities in Decision-oriented Life Cycle Inventories* Frank

Werner,2005-08-16 This book shows for the first time how mental models and values influence conclusions in the life cycle inventory step of LCA One key finding is that different management rules for a sustainable use of materials must be taken into account for the attribution of material and energy flows to a product Includes case studies on the modelling of recycling and other end of life options of aluminium windows and beech wood railway sleepers in LCA      *Tourism Enterprise* David

Leslie,2014-11-26 The environmental quality and popularity of any tourist destination is the outcome of sustained development shaped by the socio economic and physical dimensions of the local environment Protecting the living landscape requires recognizing promoting and developing the links between economic social and environmental objectives This book therefore examines the tourism business in terms of greening the local economy people and environment establishing the green agenda and investigating its application to the tourism sector      Sustainability Accounting and Reporting Stefan

**User Behavior and Technology Development** Peter-Paul Verbeek,Adriaan Slob,2006-10-11 Environmental policy has long been determined by a dichotomy between technology and behavior Some approaches stress the importance of technology and technological innovation while others focus on behavioral change Each approach has its limitations however since technology and behavior often appear so closely intertwined Human behavior results not only from intentions and deliberate decisions but also from its interaction with technological artifacts In the area of traffic safety for instance people s driving behavior is determined as much by curves speed bumps and the power of their motors as by considerations of safety and responsibility How can we best describe and

understand these interactions between behavior and technology What conceptual frameworks and empirical studies are available and how can they be integrated And how can we bring these interactions to bear on product design and policy making The book *User Behavior and Technology Development* explores these relationships between technology and behavior from an interdisciplinary perspective This includes contributions from cognitive psychology industrial design public administration marketing sociology ergonomics science and technology studies and philosophy The book aims to create a conceptual basis for analyzing interactions between technology and behavior and to provide insights that are relevant to technology design and environmental policy

**Sustainability Marketing** Frank-Martin Belz, Ken Peattie, 2012-10-29 The new and extended Second Edition of the award winning textbook *Sustainability Marketing A Global Perspective* provides a sustainability oriented vision of marketing for the twenty first century Adopting a consumer marketing focus it emphasises integrating sustainability principles into both marketing theory and the practical decision making of marketing managers The book shows how the complexities of sustainability issues can be addressed by marketers through a systematic step by step approach The steps involve an analysis of socio environmental priorities to complement conventional consumer research an integration of social ethical and environmental values into marketing strategy development a new consumer oriented sustainability marketing mix to replace the outmoded and producer oriented 4Ps and finally an analysis of how marketing can go beyond responding to social change to contribute to a transformation to a more sustainable society Without taking such steps marketing will continue to drive global crises linked to climate change poverty food shortages oil depletion and species extinction instead of helping to tackle them A comprehensive package of supplementary materials for this text is available at [www.wiley.com/college/belz](http://www.wiley.com/college/belz) View the authors blog at [www.sustainabilitymarketing.com](http://www.sustainabilitymarketing.com)

**Tourism in the New Europe** Rhodri Thomas, Marcjanna Augustyn, 2007-01-18 The book represents a state of the art review of key research on small firms in tourism in relation to European integration It is therefore an essential resource for those engaged in research relating to tourism SMEs in transitional economies throughout the world In addition it is an essential purchase for the increasing number of students studying modules on small businesses as part of their final year undergraduate and postgraduate degree programmes One of the key features of this book is its clear focus on breaking new ground by reporting recent research and theorising on small firms in tourism In many cases the analysis provided by contributors will carefully relate small business behaviour to issues of wider concern to tourism academics and policy makers It is also distinctive for its overt emphasis on contrasting European experiences These characteristics contrast with the existing literature on small firms in tourism and hospitality particularly in Europe Previous literature achieved their aims by providing valuable syntheses of existing literature Now that such taking of stock has been undertaken there is a demand for more overtly research based texts that are nevertheless accessible to a wide audience This book does exactly that
