Aid To Africa So Much To Do So Little Done:

Aid to Africa Carol Lancaster, 1999-04-15 5 The United States **Killing Sub-Saharan Africa with Aid** Humphrey Orjiako, 2001 Annotation Orijiako who is not identified examines the hypothesis that rather than promoting growth and development in sub Saharan Africa foreign aid interventions may have contributed in no small measure to the poor performance of the region s economies Challenging conventional views that problems are technical details of delivery or administration he suggests that an economy operating under appropriate circumstances and conditions may not require foreign aid to succeed and presents historical records common sense and cognate experiments to bolster the view c Book News Inc *China's Education Aid to Africa* Wei Ye, 2023-05-31 China s rise as an aid provider in Africa has caught global attention with China s activity being viewed as the projection of soft power of a neo colonialist kind in an international relations context This book which focuses on China s education aid government scholarships training Confucius Institutes dispatched teachers etc reveals a much more complicated picture It outlines how the divide between the Chinese Ministry of Commerce and the Ministry of Education hinders China s soft power projection how much of China s aid is bound up with an education for economic growth outlook mirroring China s own recent experiences of economic development and how China s aid prioritized to reflect the commercial sector s interests is out of step with most international development aid which is dominated by education agendas and the campaigns of international organizations and traditional donors this leaves China easily exposed to the charge of neo colonialism This situation also reveals insufficient knowledge production of China and in South South Cooperation Substantial production of Southern knowledge should recognize the international development cooperation architecture as an open system by which both traditional donors and Southern countries transform **The Politics and Economics of Britain's Foreign Aid** Tim Lankester, 2013-06-07 The Pergau dam in Malaysia was the most controversial project in the history of British aid Because of its high cost it was a poor candidate for aid funding It was provided in part to honour a highly irregular promise of civil aid in connection with a major arms deal After two parliamentary inquiries and intense media coverage in a landmark judgement the aid for Pergau was declared unlawful Tim Lankester offers a detailed case study of this major aid project and of government decision making in Britain and Malaysia Exposing the roles played by key politicians and other stakeholders on both sides he analyses the background to the aid arms linkage and the reasons why the British and Malaysian governments were so committed to the project before exploring the response of Britain s Parliament and its media and NGOs and the resultant legal case The main causes of the Pergau debacle are carefully drawn out from conflicting policy agendas within the British government to the power of the business lobby and the inability of Parliament to provide any serious challenge Finally Lankester asks whether given what was known at the time and what we know now he and his colleagues in Britain s aid ministry were correct in their objections to the project Pergau is still talked about as a prime example of how not to do aid Tim Lankester a key figure in the affair is perfectly placed to

provide the definitive account At a time when aid budgets are under particular scrutiny it provides a cautionary tale

Nicolas Van de Walle, 2001-09-24 This Book explains why African countries have remained mired in a disastrous economic crisis since the late 1970s It shows that dynamics internal to African state structures largely explain this failure to overcome economic difficulties rather than external pressures on these same structures as is often argued Far from being prevented from undertaking reforms by societal interest and pressure groups clientelism within the state elite ideological factors and low state capacity have resulted in some limited reform but much prevarication and manipulation of the reform process by governments which do not really believe that reform will be effective **Imagining Human Rights** Susanne Kaul, David Kim, 2015-09-25

Why is it that human rights are considered inviolable norms of justice at local and global scales although the number of their violations has steadily increased in modern history On the surface this paradox seems to be reducible to a straightforward discrepancy between idealism and reality in humanitarian affairs but *Imagining Human Rights* complicates the picture by offering interdisciplinary perspectives on the imaginary status of human rights By that the contributors mean not merely subject to imagination open to interpretation or far too abstract but also formative of a social imaginary with emphatic identifications and shared values From a variety of disciplinary perspectives they explore critical ways of engaging in rigorous interdisciplinary conversations about the origin and language of human rights personal dignity redistributive

justice and international solidarity Together they show how and why a careful examination of the intersection between disciplinary investigations is essential for imagining human rights at large Examples range from the legitimacy of land ownership rights and the inadequacy of human faculty to make sense of mass violence in visual representation to the stewardship of human rights promoters and the genealogy of human rights

German Philanthropy in Transatlantic Perspective Gregory R. Witkowski, Arnd Bauerkämper, 2016-10-25 This volume examines philanthropic practices against the backdrop of the continuities disruptions and changes in twentieth century German socio political relations It presents a differentiated understanding of the relationship between philanthropy and civil society that traces this connection from Germany's first democracy the Weimar Republic through the Nazi dictatorship and Soviet style rule in Communist East Germany to the stable democracy of the Federal Republic of Germany While concentrating on Germany this volume places German philanthropy in a triangular relationship with the United States and the developing world primarily through Africa In particular the contributions to the book demonstrate that despite many transatlantic exchanges between German and American philanthropic organizations these relationships should not be reduced to bilateral exchanges but rather seen in the context of a globalizing world More generally this transnational study is a reminder that philanthropic activities need to be placed into their specific historical contexts Such an analytical framework allows for more dynamic understanding of the meaning of philanthropy in society illustrating both enduring and changing practices

The Other War Lael Brainard, Carol L. Graham, Nigel Purvis, 2004-05-13 A Brookings Institution Press and the Center for Global Development publication The plight of the poorest around the world has been pushed to the forefront of America's international agenda for the first time in many years by the war on terrorism and the formidable challenges presented by the HIV AIDS pandemic In March 2002 President Bush announced the creation of the Millennium Challenge Account MCA This bilateral development fund represents an increase of 5 billion per year over current assistance levels and establishes of a new agency to promote growth in reform oriented developing countries Amounting to a doubling of U S bilateral development aid the largest increase in decades the MCA offers a critical chance to deliberately shape the face that the United States presents to people in poor nations around the world This book makes concrete recommendations on crafting a new blueprint for distributing and delivering aid to make the MCA an effective tool not only in its own right but also in transforming U S foreign aid and strengthening international aid cooperation more generally The book tackles head on the tension between foreign policy and development goals that chronically afflicts U S foreign assistance the danger of being dismissed as one more instance of the United States going it alone instead of buttressing international cooperation and the risk of exacerbating confusion among the myriad overlapping U S policies agencies and programs targeted at developing nations particularly USAID In doing so The Other War draws important lessons from new international development initiatives such as the Global Fund to Fight AIDS TB and Malaria the mixed record of previous U S aid efforts trends in the U S budget for foreign assistance the

agencies currently involved in administering U S development policy and the importance of the relationship between Congress and the executive branch in determining aid outcomes The MCA holds the promise of substantially increasing U S development assistance and policy and the importance of the relationship between Congress and the executive branch in determining aid outcomes The MCA holds the promise of substantially increasing U S development assistance and pioneering a new era in aid but the authors caution against creating yet another example of wasted aid that could undermine political support for foreign assistance for decades to come Ethics & AIDS in Africa A. A. Van Niekerk, Loretta M. Kopelman, 2005 Don American Embassy 2 copies *Developing Capacity Through Technical Cooperation* Stephen Browne, 2024-11-01 Technical co operation involving northern experts transferring expertise to the south has not always worked In fact it has sometimes been counter productive fostering a dependency on outside help rather than creating a genuine indigenous capability This study by experts from Harvard University and the UN Development Programme UNDP uses a range of country studies to analyze what has worked in the past what hasn't and how to ensure that future co operation results in genuine capacity building and ownership of the new capabilities by the recipients It aims to offer a framework for evaluating different methods to achieve these goals The volume is a companion to the earlier *Capacity for Development* and should be useful for all those working in international development as well as researchers academics and students **Democratic Reform in Africa** Emmanuel Gyimah-Boadi, 2004 After more than a decade of reform efforts in Africa much of the optimism over the continent's prospects has been replaced by widespread Afropessimism But to what extent is either view well founded *Democratic Reform in Africa* plumbs the key issues in the contemporary African experience including intrastate conflict corruption and the development of civil society highlighting the challenges and evaluating the progress of political and economic change Case studies of Botswana Mozambique Nigeria and South Africa complement the thematic chapters exploring the interactions between democracy and development Nontaxation and Representation Kevin M. Morrison, 2015 Does oil make countries autocratic Can foreign aid make countries democratic Does taxation lead to representation In this book Kevin M Morrison develops a novel argument about how government revenues of all kinds affect political regimes and their leaders Contrary to conventional wisdom Morrison illustrates that taxation leads to instability not representation With this insight he extends his award winning work on nontax revenues to encompass foreign aid oil revenue and intergovernmental grants and shows that they lead to decreased taxation increased government spending and increased political stability Looking at the stability of democracies and dictatorships as well as leadership transitions within those regimes Morrison incorporates cross national statistical methods formal modeling a quasi experiment and case studies of Brazil Kenya and Mexico to build his case This book upends many common hypotheses and policy recommendations providing the most comprehensive treatment of revenue and political stability to date Humanitarianism in the Modern World Norbert Götz, Georgina Brewis, Steffen Werther, 2020-07-23 A fresh look at two centuries of humanitarian history

through a moral economy approach focusing on appeals allocation and accounting **Democracy Assistance** Peter Burnell,2013-10-23 This examination of how Western governments support democracy worldwide considers how countries use this aid Attention is paid to post conflict situations and semi authoritarian regimes where democratization has stalled and international support of democratic decentralization is assessed Higher Education in Tanzania Brian Cooksey,Daniel J. Mkude,Daniel Mkude,Lisbeth A. Levey,2003 Examines institutional transformation in the University of Dar es Salaam The Partnership for Higher Education in Africa commissioned case studies of higher education provision in Tanzania Uganda Kenya Mozambique Nigeria Ghana and South Africa as part of its effort to stimulate enlightened equitable and knowledge based national development and to provide guides to understanding The University of Dar es Salaam has put in place measures to stop the process of decay and better fulfil its core functions the unity and commitment within its leadership attracting both government and donors This text explores the attributes needed to harvest the fruits of the reform In association with Partnership for Higher Education in Africa Tanzania Mkuki na Nyota *Understanding Development* Paul Hopper,2012-02-27 Drawing on a wide range of case studies from across the globe this book explores such areas as health and population growth conflict and security global inequality and poverty fair trade and trade liberalization gender and education foreign aid and debt and sustainability and the environment This issues driven text focuses on the debates that have generated the most interest and passion among practitioners and non practitioners alike Always attentive to the contested and plural nature of the field it makes the case for a genuinely interdisciplinary approach which takes full account of the impact of globalization Publisher The Moral Demands of Affluence Garrett Cullity,2006-09-21 Given that there is a forceful case for thinking that the affluent are morally required to devote a substantial proportion of what they have to helping the poor Garrett Cullity examines refines and defends an argument of this form He then identifies its limits
