AIDS in an Aging Society Matilda White Riley, Marcia G. Ory, Diane Zablotsky, 1989 An uncommon emphasis on the epidemic Authors deal with risk and prevention care both home and institutional and social consequences of AIDS in old people Annotation copyright Book News Inc Portland Or

Social Work and Health Care in an Aging Society Barbara Berkman, Linda Harootyan, 2003-06-01 This book places significant issues related to the health mental health and well being of older adults and their caregivers within the context of social work service delivery By presenting the research of social work scholars all experts in specific research areas the editors clarify the value that social work brings to the larger realm of health care for older adults and their families Special consideration is given to such issues as case management urban African American elders grandmothers raising grandchildren aging persons with developmental disabilities home health care and more For Further Information on Dr Berkman Please Click Here

HIV/AIDS and Older Adults Charles A. Emlet, MSW, PhD, 2004-03-31 This volume focuses on the ways in which HIV AIDS can affect older adults The chapters in this book discuss the variety of HIV AIDS problems that we face at the individual family and community levels Topics examined include demographics and epidemiological aspects of HIV disease with this population prevention of HIV disease issues impacting individuals in a medical psychological and social context and service needs Originally published as a special issue of the Journal of Mental Health and Aging the volume contains new chapters on demographics HIV prevention and education and effective coalition building among systems of care Contributors include Diane Zablotsky Michael Kennedy Janice Nichols and Timothy Heckman among others For Further Information Please Click Here

[HIV & AIDS And The Older Adult](#) Kathleen M. Nokes, 2020-04-14 First published in 1996 The incidence of HIV AIDS in society has reached epidemic levels People of all ages are contracting the disease and with the advances in medication and treatment those with the disease are living longer This book discusses the unique issues facing older adults with HIV AIDS and addresses living with the disease

HIV/AIDS in the Post-HAART Era John C. Hall, Brian John Hall, Clay J. Cockerell, 2011 The science of the virus and its effects and the clinical approaches to its treatment and transmission prevention are placed in the context of the history and epidemiology of the HIV AIDS pandemic Each organ system of the body is explored as to manifestations of the disease treatment now and in the future as well as what the disease has taught us about the immune response The science of epidemiology which is so important in allowing for tracking of the disease and potential limitation of transmission is another aspect of AIDS explored in detail The pandemic manifests differently in different parts of the world and the relevance of the volume is enhanced by its international group of contributors No other text provides the historical and epidemiological context of this disease along with an update of diagnosis and treatment The underlying science and epidemiology of AIDS are not neglected so the student or clinician who is treating patients with AIDS can gain a full understanding of HIV AIDS in individual patients and in their communities

Aging with HIV Janice E. Nichols, 2002-08-13 In 1998 approximately 30 million people worldwide were

living with HIV AIDS about 5 million of whom became infected that year The epidemic continues to expand with an estimated doubling time of 10 years making AIDS the leading infectious cause of death ahead of tuberculosis and malaria Even in the U S A where the death rate from AIDS is declining as a result of effective drug therapies HIV infection rates continue to climb in several population groups The prevalence of AIDS among people over the age of 50 is steadily increasing and most older people are unprepared to address it for a number of reasons including the widespread discomfort with matters sexual and homosexual and the belief that elderly people are not sexually active and therefore not at risk This guide for care providers seeks to educate and inform readers about the difficulties and complications that accompany the disease in older people Thus while the appendix includes technical descriptions of methodology data and results the narratives in the chapters describing the findings and their practical implications are written in layman s language Topics covered include biomedical aspects demographics sexuality stressors mental health older women and patient care all of which are supported by case studies
