How to Have Theory in an Epidemic Paula A. Treichler,1999 A collection of essays on the AIDS epidemic by a leading feminist cultural theorist of science *HIV/AIDS Prevention* ,1997 *HIV/AIDS in South Africa 25 Years On* Poul Rohleder,Leslie Swartz,Seth C. Kalichman,Leickness Chisamu Simbayi,2009-09-01 Much has happened since the first appearance of AIDS in 1981 it has been identified studied and occasionally denied The virus has shifted host populations and spread globally Medicine the social sciences and world governments have joined forces to combat and prevent the disease And South Africa has emerged as ground zero for the pandemic The editors of HIV AIDS in South Africa 25 Years On present the South African crisis as a template for addressing the myriad issues surrounding the epidemic worldwide as the book brings together a widely scattered body of literature analyzes psychosocial and sexual aspects contributing to HIV transmission and prevention and delves into complex intersections of race gender class and politics Including largely overlooked populations and issues e g prisoners persons with disabilities stigma as well as challenges shaping future research and policy the contributors approach their topics with rare depth meticulous research carefully drawn conclusions and profound compassion Among the topics covered The relationship between HIV and poverty starting from the question Which is the determinant and which is the consequence Epidemiology of HIV among women and men concepts of femininity

and masculinity and gender inequities as they affect HIV risk gender specific prevention and intervention strategies The impact of AIDS on infants and young children risk and protective factors care of children by HIV positive mothers HIV infected children Current prevention and treatment projects including local level responses community based work and VCT voluntary counseling and testing programs New directions promoting circumcision vaccine trials positive prevention South Africa s history of AIDS denialism The urgent lessons in this book apply both globally and locally making HIV AIDS in South Africa 25 Years On uniquely instructive and useful for professionals working in HIV AIDS and global public health

Communicating Science to the Public Leo Tan Wee Hin, R. Subramaniam, 2014-07-24 This book explores effective approaches for communicating science to the public in developing countries Offering multiple perspectives on this important topic it features 17 chapters that represent the efforts of 23 authors from eight countries Australia Bangladesh India Ireland New Zealand USA Singapore and South Africa Inside readers will find a diversity of approaches to communicate science to the public The book also highlights some of the challenges that science communicators science policy makers science teachers university academics in the sciences and even entrepreneurs may face in their attempts to boost science literacy levels in their countries In addition it shares several best practices from the developed world that may help readers create communication initiatives that can lead to increased engagement with science in communities in the Asia Pacific region and beyond Given the pervasive influence of science and technology in today s society their impact will only increase in the years to come as the world becomes more globalized and the economies of countries become more inter linked This book will be a useful source of reference for developing countries looking to tap into the potential of science for nation building and effectively engage their communities to better understand science and technology Supported by the Pacific Science Association Hawaii *The Psychology of Health* Keith Phillips, Marian Pitts, 2002-04-12 Completely revised and updated second edition of this classic text which contains additional chapters on cancer nutrition and exercise social drugs and the impact of social inequalities upon health **Methodological Issues in AIDS Behavioral Research** David G.

Library of Medicine (U.S.), 1993-04 National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1988 **Impure Science** Steven Epstein, 1996-12-09 In the short turbulent history of AIDS research and treatment

the boundaries between scientist insiders and lay outsiders have been crisscrossed to a degree never before seen in medical history Steven Epstein s astute and readable investigation focuses on the critical question of how certainty is constructed or deconstructed leading us through the views of medical researchers activists policy makers and others to discover how

knowledge about AIDS emerges out of what he calls credibility struggles Epstein shows the extent to which AIDS research has been a social and political phenomenon and how the AIDS movement has transformed biomedical research practices through its capacity to garner credibility by novel strategies Epstein finds that nonscientist AIDS activists have gained enough of a voice in the scientific world to shape NIH sponsored research to a remarkable extent Because of the blurring of roles and responsibilities the production of biomedical knowledge about AIDS does not he says follow the pathways common to science indeed AIDS research can only be understood as a field that is unusually broad public and contested He concludes by analyzing recent moves to democratize biomedicine arguing that although AIDS activists have set the stage for new challenges to scientific authority all social movements that seek to democratize expertise face unusual difficulties Avoiding polemics and accusations Epstein provides a benchmark account of the AIDS epidemic to date one that will be as useful to activists policy makers and general readers as to sociologists physicians and scientists

Culture, Society and Sexuality Richard Parker, Peter Aggleton, 2007-01-24 Clearly structured and presented this new and revised edition brings together a broad and international selection of readings to provide insights into the social cultural political and economic dimensions of sexuality and relationships

Risk and 'The Other' Hélène Joffé, 1999-09-29 From earthquakes to epidemics AIDS to industrial accidents the mass media continually bring into our daily lives the awareness of risk But how do people respond to this increased awareness How do people cope with living in what has been termed the risk society This book attempts to explain how within a given social and cultural context individuals make sense of impending crisis In particular it tries to explain the phenomenon of a widespread sense of personal invulnerability when faced with risk the not me factor Using a social psychological framework it highlights emotional factors which are a key component of responses to risk but have hitherto been neglected due to the tendency of much work on risk to concentrate almost exclusively on cognitive processing This book will appeal to an international audience of post graduates academics and researchers in the areas of risk psychology sociology medical anthropology and psychoanalytic studies

Pharmaceutical Design And Development T V Ramabhadran, 1994-03-31 This volume aims to introduce researchers in pharmaceutical and allied industries to the concepts and latest developments in the application of biotechnology recombinant DNA and monoclonal antibodies to drug development

A Queer World City University of New York. Persisting Pandemics Powel H. Kazanjian, 2024-11-15 Persisting Pandemics explores the history of syphilis and AIDS to provide insights into the limits of biomedicine and our experience with epidemics today Novel therapies developed for syphilis and AIDS became renowned in the medical field and the broader public sphere as exemplars of biomedical innovations Public health campaigns based on these spectacular biomedical advances however have repeatedly

fallen short of their goals to eliminate syphilis and AIDS in the population. The diseases epitomize the power of innovative biomedical therapies for the individual while unveiling limitations of scientific medicine in the domain of public health. The need for a public health approach to address mistrust in science, government indifference, and racial inequalities is relevant for strategies to eliminate COVID-19 today. Persisting Pandemics argues that campaigns to eliminate these diseases have not succeeded because they have not adequately addressed how diseases like AIDS, syphilis, and COVID spread unevenly in populations according to race, ethnicity, and geographic location. Despite the expectation of public health officials that medical advances would render epidemics obsolete, new diseases continue to emerge and spread regardless of efforts to eliminate them. Medical doctor and historian Powel H. Kazanjian concludes that narratives of syphilis, AIDS, and COVID, unlike smallpox, do not contain a discrete ending at least not within the timelines specified by their elimination campaigns. Instead, they will be a continued part of our existence.

Gender, Ethnicity, and Health Research Sana Loue, 2007-05-08

Health researchers routinely evaluate health and illness across subgroups defined by their sex, gender, ethnicity, and race. All too often, these classifications are proffered as an explanation for any differences that may be detected, for example, in access to care, frequency of disease, or response to treatment. Relatively few researchers, however, have examined what these classifications mean on a theoretical level or in the context of their own research. Assume, for example, that a researcher concludes from his or her data that African Americans utilize certain surgical procedures less frequently than whites. This conclusion may mean little without an examination of the various underlying issues. Is there such a construct as race at all? How were whites and African Americans classified as such? Does this finding reflect inappropriate overutilization of the specific procedures among whites or inappropriate underutilization among African Americans? To what extent are socioeconomic status and method of payment related to the less frequent use? Are there differences in the manner in which health care providers present the various treatment options to whites and to African Americans that could account for these differences in utilization? Are there differences in health care seeking and health care preferences between the two groups that would explain the difference in utilization? Is the racial classification a surrogate measure for another variable that has remained unidentified and unmeasured? All too often, unfortunately, such issues are ignored or lightly dismissed with an entreaty for additional research.
