Richard Hartnoll, Tim Rhodes, 2002-03-11 *AIDS Drugs and Prevention* brings together a range of international contributions on the research theory and practice of developing community based HIV prevention. It aims to understand how individual actions to prevent HIV transmission are constrained and encouraged by situational and social context. Drawing on ethnographic and epidemiological research among populations of drug users, sex workers and gay men, it explores how future HIV prevention interventions can target changes at the level of the individual as well as at the level of the community and wider social environment. *AIDS Drugs and Prevention* offers practical and theoretical insights into community based health work in the time of AIDS. It provides invaluable reading for students, lecturers, researchers and practitioners in health promotion, health policy, social work and medical sociology. *AIDS, Drugs and Prevention* Tim Rhodes, 1996. In developing HIV prevention, community orientated approaches have emerged within statutory and voluntary sectors and from the communities themselves. This book considers the diverse approaches and problems for professional practice. **Report on the AIDS and Drugs Misuse Sub Group** Welsh Committee on Drug Misuse. AIDS and Alcohol/Drug Abuse Dennis Fisher, 2002-10-30. AIDS is the number one health issue facing the nation today. The way in which AIDS relates to substance abuse is explored by drug abuse researchers in this timely volume. A major focus of AIDS and Alcohol/Drug Abuse is on the problems of conducting AIDS research on racial minorities in this country. Bringing together experts in the field, this volume examines the specific obstacles and challenges researchers have faced in assessing and addressing the needs of underserved populations and maps routes and procedures that can improve both research and available health care services. This unique volume also focuses on aspects of HIV infection that have received little attention elsewhere. It includes the first information published in the open literature about intravenous drug use in Alaska. Another chapter highlights some little known facts that relate substance abuse to HIV infection in the American Indian/Alaskan Native population, among whom it has been predicted a devastating epidemic of HIV infection is likely. Problems with prevention, research and treatment of individuals who are both intravenous drug users and who are infected with HIV are explored. Other chapters look at the transmission of HIV infection by gay men who are alcoholics and by intravenous drug users. AIDS and Alcohol/Drug Abuse ends with a hopeful chapter for AIDS prevention. Readers interested in the relationship of intravenous drug use and HIV infection, particularly among racial and ethnic minorities, will find this to be a practical, readable book. In particular, substance abuse counselors and researchers and anyone involved in the AIDS prevention movement will find a valuable wealth of information. *Intravenous drug use and AIDS* United States. Congress. House. Select Committee on Narcotics Abuse and Control, 1988. **Drug Use in Prisoners** Stuart Kinner, Daniel Rich, 2018. This edited volume provides the first ever comprehensive international and multi-disciplinary review of the evidence regarding substance use and harms in people who cycle through prisons and jails. Grounded in solid evidence and a human rights framework, the text provides a roadmap for evidence based reform. *AIDS and Intravenous Drug Use* Carl G. Leukefeld, Robert Battjes, Z. Amsel, 1990.
