Aids Images Of The Epidemic:

The Impact of AIDS: Psychological and Social Aspects of HIV Infection, 3rd Edition Jose Catalan, Barbara Hedge, Lorraine Sherr, 1997-05-22 This volume contains a selection of key contributions to the discussion on the psychological and social implications on HIV infection. It contains up to date and authoritative papers by senior practitioners and researchers in the field of the psychological and social aspects of HIV infection. The book will appeal to those involved in providing care for people with HIV infections be they physicians and nurses or psychologists social workers and psychiatrists as well as those involved in preventing the spread of the HIV infection. From the start of the HIV epidemic the psychological and social aspects of the AIDS infection have been recognized. What could have been regarded simply as an infectious disease was soon acknowledged as a global problem that raised important issues about its transmission and prevention economic ethical and legal questions regarding the mental health consequences and the need for access to medical and social care. [A Visual History of HIV/AIDS](#) Elisabet Björklund, Mariah Larsson, 2018-07-04 The Face of AIDS film archive at Karolinska Institutet Sweden consists of more than 700 hours of unedited and edited footage shot over a period of more than thirty years and all over the world by filmmaker and journalist Staffan Hildebrand. The material documents the HIV AIDS pandemic and includes scenes from conferences and rallies and interviews with activists physicians people with the infection and researchers. It represents a global historical development from the early years of the AIDS crisis to a situation in which it is possible to live a normal life with the HIV virus. This volume brings together a range of academic perspectives from media and film studies medical history gender studies history and cultural studies to bear on the archive shedding light on memories discourses trauma and activism. Using a medical humanities framework the editors explore the influence of historical representations of HIV AIDS and stigma in a world where antiretroviral treatment has fundamentally altered the conditions under which many people diagnosed with HIV live. Organized into four sections this book begins by introducing the archive and its role setting it in a global context. The first part looks at methodological legal and ethical issues around archiving memories of the present which are then used to construct histories of the past something that can be particularly controversial when dealing with a socially stigmatized epidemic such as HIV AIDS. The second section is devoted to analyses of particular films from the archive looking at the portrayal of people living with HIV AIDS the narrative of HIV as a chronic illness and the contemporary context of particular films. The third section looks at how stigma and trauma are negotiated in the material in the Face of AIDS film archive discussing ideas about suffering and culpability. The final section contributes perspectives on and by the filmmaker as activist and auteur. This interdisciplinary collection is placed at the intersection of medical humanities sexuality studies and film and media studies continuing a tradition of studies on the cultural and social understandings of HIV AIDS.

Compassion Fatigue
 Susan D. Moeller, 2002-09-11 From outbreaks of the flesh eating viruses Ebola and Strep A to death camps in Bosnia and massacres in Rwanda the media seem to careen from one trauma to another in a breathless tour of poverty disease and death First we re horrified but each time they turn up the pitch show us one image more hideous than the next it gets harder and harder to feel Meet compassion fatigue a modern syndrome Susan Moeller argues that results from formulaic media coverage sensationalized language and overly Americanized metaphors In her impassioned new book Compassion Fatigue Moeller warns that the American media threatens our ability to understand the world around us Why do the media cover the world in the way that they do Are they simply following the marketplace demand for tabloid style international news Or are they creating an audience that as seen too much or too little to care Through a series of case studies of the Four Horsemen of the Apocalypse disease famine death and war Moeller investigates how newspapers newsmagazines and television have covered international crises over the last two decades identifying the ruts into which the media have fallen and revealing why Throughout we hear from industry insiders who tell of the chilling effect of the mega media mergers the tyranny of the bottom line hunt for profits and the decline of the American attention span as they struggle to both tell and sell a story But Moeller is insistent that the media need not and should not be run like any other business The media have a special responsibility to the public and when they abdicate this responsibility and the public lapses into a compassion fatigue stupor we become a public at great danger to ourselves
