On the Edge of the American Dream, 1992 *American Health Crisis* Martin Halliwell, 2021-05-18 A history of U.S. public health emergencies and how we can turn the tide. Despite enormous advances in medical science and public health education over the last century, access to health care remains a dominant issue in American life. U.S. health care is often hailed as the best in the world, yet the public health emergencies of today often echo the public health emergencies of yesterday: consider the Great Influenza Pandemic of 1918-19 and COVID-19, the displacement of the Dust Bowl and the havoc of Hurricane Maria, the Reagan administration's antipathy toward the AIDS epidemic and the lack of accountability during the water crisis in Flint, Michigan. Spanning the period from the presidency of Woodrow Wilson to that of Donald Trump, *American Health Crisis* illuminates how, despite the elevation of health care as a human right throughout the world, vulnerable communities in the United States continue to be victimized by structural inequalities across disparate geographies, income levels, and ethnic groups. Martin Halliwell views contemporary public health crises through the lens of historical and cultural revisionings, suturing individual events together into a narrative of calamity that has brought us to our current crisis in health politics. *American Health Crisis* considers the future of public health in the United States and presenting a reinvigorated concept of health citizenship, argues that now is the moment to act for lasting change.

AIDS Presidential Advisory Council on HIV/AIDS (U.S.), 2000 *AIDS in the Mind of America* Dennis Altman, 1986 Traces the history of the epidemic and examines its social, political, and psychological impact on society.

The AIDS Pandemic Lawrence O. Gostin, 2005-11-16 In this collection of essays, Lawrence O. Gostin, an internationally recognized scholar of AIDS law and policy, confronts the most pressing and controversial issues surrounding AIDS in America and around the world. He shows how HIV/AIDS affects the entire population, infected and uninfected, by influencing our social norms, our economy, and our country's role as a world leader. Now in the third decade of this pandemic, the nation and the world still fail to respond to the needs of persons living with HIV/AIDS and continue to tolerate injustice in their treatment. Gostin argues that AIDS, both in the United States and globally, deeply affects poor and marginalized populations, and many U.S. policies are based on conservative moral values rather than public health and social justice concerns. Gostin tackles the hard social, legal, political, and ethical issues of the HIV/AIDS pandemic: privacy and discrimination, travel and immigration, clinical trials, and drug pricing, exclusion of HIV-infected health care workers, testing and treatment of pregnant women and infants, and needle exchange programs. This book provides an inside account of AIDS policy debates together with incisive commentary. It is indispensable reading for advocates, scholars, health professionals, lawyers, and the concerned public.

Health America United States. Congress. Senate. Committee on Finance. Subcommittee on Health for Families and the Uninsured, 1992 **Public Health Reports**, 1987 *AIDS Bibliography*, 1994 *The Queer Biopic in the AIDS Era* Laura Stamm, 2021-12-31 The *Queer Biopic in the AIDS Era* offers a

new account of the AIDS crisis and the emergence of New Queer Cinema Author Laura Stamm asks why queer filmmakers repeatedly produced biographical films of queer individuals living and dead throughout the years surrounding the AIDS crisis Queer filmmakers engagement with the biopic evokes the genre s history of building life through the portrayal of lives worthy of admiration and emulation but it also points to another biopic history that of representing lives damaged By portraying lives damaged by inconceivable loss queer filmmakers challenge the illusion of a coherent self presumably reinforced by the biopic genre and in doing so their films open the potential for new means of connection and relationality The Queer Biopic in the Aids Era features fresh readings of the cinema of Derek Jarman John Greyson Todd Haynes Barbara Hammer and Tom Kalin By calling for a reappraisal of the queer biopic this book also calls for a reappraisal of New Queer Cinema s legacy and its influence of contemporary queer film As a whole this book pays particular attention to the biopic s queer resonances opening up its historical connections to projects of education public health and social hygiene along with the production of a shared history and national identity

Critique of Authenticity Thomas Claviez,Kornelia Imesch,Britta Sweers,2020-01-10 The volume provides a critical assessment of the concept of authenticity and gauges its role significance and shortcomings in a variety of disciplinary contexts Many of the contributions communicate with each other and thus acknowledge the enormous significance of this politically morally philosophically and economically charged concept that at the same time harbors dangerous implications and has been critically deconstructed The volume shows that the alleged need or desire for authenticity is alive and kicking but oftentimes comes at a high price connected to a culture of experts authority and exclusionary strategies
