Learning through Community Kathryn Church, Nina Bascia, Eric Shragge, 2008-02-01 The Turbulence of Learning to Publish As researchers we learned about working together and collaborating across multiple dimensions of space time and our own identities We learned and we are still learning We are learning as we write and revise this book We learn as we begin to see this book through the eyes of others who have not lived through the process of discovery with us in the field We learn as we go back to work to try to figure out how our learnings can make a difference Jackson 2004 p 289 It took 10 years to create this book Of course none of us intended to take so long Like a lot of things that appear to be individual pathology our tardiness was socially produced The first defining relation was the collegial way in which Nina Bascia Eric Shragge and I selected contributors for this volume As co editors we sought contributions from academics who had produced case studies for the Toronto based 1 research network called NALL Network for New Approaches to Lifelong Learning

Men at Risk Shari L. Dworkin, 2015-12-04 Presents a unique approach to HIV prevention at the intersection of sociological and public health research Although the first AIDS cases were attributed to men having sex with men over 70% of HIV infections worldwide are now estimated to occur through sex between women and men In Men at Risk Shari L. Dworkin argues that the centrality of heterosexual relationship dynamics to the transmission of HIV means that both women and men need to be taken into account in gender specific HIV AIDS prevention interventions She looks at the costs of masculinity that shape men's HIV risks such as their initiation of sex and their increased status from sex with multiple partners Engaging with the common paradigm in HIV research that portrays only women and not heterosexually active men as being vulnerable to HIV Dworkin examines the gaps in public health knowledge that result in substandard treatment for HIV transmission and infection among heterosexual men both domestically and globally She examines a vast array of structural factors that shape men's HIV transmission risks and also focuses on a relatively new category of global health programs with men known as gender transformative that seeks to move men in the direction of gender equality in the name of improved health Dworkin makes suggestions for the next generation of gender transformative health interventions by calling for masculinities based and structurally driven HIV prevention programming Thoroughly researched and theoretically

Women Take Care Katie Hogan,2018-08-06 Self sacrificing mothers and forgiving wives

caretaking lesbians and vigilant maternal surrogates these good women are all familiar figures in the visual and print culture relating to AIDS In a probing critique of that culture Katie Hogan demonstrates ways in which literary and popular works use the classic image of the nurturing female to render queer AIDS more acceptable while consigning women to conventional roles and reinforcing the idea that everyone with this disease is somehow suspect In times of crisis the figure of the idealized woman who is modest and selfless has repeatedly surfaced in Western culture as a balm and a source of comfort and as a means of mediating controversial issues Drawing on examples from journalism medical discourse fiction drama film television and documentaries Hogan describes how texts on AIDS reproduce this historically entrenched paradigm of sacrifice and care a paradigm that reinforces biases about race and sexuality Hogan believes that the growing nostalgia for women's traditional roles has deflected attention away from women's own health needs Throughout her book she depicts caretaking as a fundamental human obligation but one that currently falls primarily to those members of society with the least power Only by rejecting the stereotype of the good woman she says can Americans begin to view caretaking as the responsibility of the entire society
