Air Pollution Control Equipment Louis Theodore,Anthony J. Buonicore,1982 **Air Pollution Control Equipment** Louis Theodore,Anthony J. Buonicore,1994-11-04 With the advent of the Clean Air Act in 1970 the number of air pollution control equipment installations has increased at an accelerated pace Although much has been written on attaining collection performance with the various control devices a major void has occurred in the identification and transfer of information needed to help reduce maintenance costs and to prevent deterioration of collector performance Although design and selection information is presented it is the primary intention of this book to discuss operation and maintenance topics and explore many of the repetitive problems that have plagued users of air pollution control equipment The existence of these problems may be related to the complexity of the process or to a lack of well defined operation techniques among other reasons In any event this book intends to emphasize where and how these factors can have a major impact on the maintenance problems of control devices Operation and maintenance problems have plagued users for nearly 100 years

Local Effects and their Control - Volume II* Qian Yi,2009-08-17 Point Sources of Pollution Local Effects and their Control is a
component of Encyclopedia of Environmental and Ecological Sciences Engineering and Technology Resources in the global
Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Point sources
of pollution are the major causes of degradation of ecosystems and may have significant effects on human health if they are
not properly controlled They can be classified in terms of sources the discharged media and the pollutants themselves
Broadly speaking the sources include municipal and industrial sector activities and the media include water air and solids
Noise is also an important form of pollution Pollutant compositions from point sources can be vast varied and complex and
can vary between different countries and regions The Theme discusses matters of great relevance to our world such as
Vehicular Emissions Industrial Pollution Domestic Pollution Environmental Pollutants and Their Control Technologies for Air

Pollution Control and Technologies for Water Pollution Control These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

Environmental Infrastructure Management J.J. Boland, M.E. Bell, Eugene Z. Stakhiv, 2013-06-29 Environmental issues continue to burden governments and economies throughout the post communist countries of Central and Eastern Europe and the newly independent states of the former Soviet Union Severe environmental degradation is endemic to the region the existing environmental infrastructure is often inadequate significant new investment is perhaps decades away and there is little knowledge of advanced techniques for impact assessment project evaluation and project financing The first two papers of *Environmental Infrastructure Management* survey available cost effective technology for solid waste treatment and air pollution control providing guidance for possible incremental additions to existing infrastructure There is also a discussion of transferable pollution credits as an instrument in regulating air quality The discussion of economic incentives also embraces user fees and other pollution control instruments A range of methods is presented for the evaluation and comparison of alternative projects where data are poor or scarce Canadian experience with specific capital budgeting techniques is given comprehensive attention Debt financing strategies are addressed in the context of present day Ukraine Finally an outline is given of a general framework for making decisions about environmental projects including the use of environmental impact assessments
