Teaching the Silk Road Jacqueline M. Moore, Rebecca Woodward Wendelken, 2012-02-01. Advocating a global as opposed to a Eurocentric perspective in the college classroom discusses why and how to teach about China's Silk Road. The romance of the Silk Road journey with its exotic locales and luxury goods still excites the popular imagination. But study of the trade routes between China and central Asia that flourished from about 200 BCE to the 1500s can also greatly enhance contemporary higher education curricula. Indeed with people, plants, animals, ideas and beliefs traversing it, the Silk Road is both a metaphor of globalization and an early example of it. *Teaching the Silk Road* highlights the reasons to incorporate this material into a variety of courses and shares resources to facilitate that process. It is intended for those who are not Silk Road or Asian specialists but who wish to embrace a global history and civilizations perspective in teaching as opposed to the more traditional approach that focuses on cultures in isolation. The book explores both classroom and experiential learning and is intentionally interdisciplinary. Each essay focuses on pedagogical strategies or themes that teachers can use to bring the Silk Road into the classroom. Based on years of experience, the authors of *Teaching the Silk Road* offer sound strategies for both stand alone courses on aspects of the route and mainstreaming what has been uncovered in three decades of research into existing courses in a variety of disciplines. H-Net Reviews H-Asia. This collection of essays and personal reflections allows the reader to listen in on a relaxed conversation on teaching the topic of the Silk Road. It offers a nice blueprint for integrating the Silk Road into new or existing curricula. J.
