Basic In Action

Marcel Sarot

Basic In Action:

Rational Powers in Action Sergio Tenenbaum, 2020 *Rational Powers in Action* presents a conception of instrumental rationality as governing actions that are extended in time with indeterminate ends Tenenbaum argues that previous philosophical theories in this area in focusing on momentary snapshots of the mind of idealized agents miss central aspects of human rationality

Human Action and Its Explanation R. Tuomela, 2012-12-06 This book presents a unified and systematic philosophical account of human actions and their explanation and it does it in the spirit of scientific realism In addition various other related topics such as psychological concept formation and the nature of mental events and states are discussed This is due to the fact that the key problems in the philosophy of psychology are interconnected to a high degree This interwovenness has affected the discussion of these problems in that often the same topic is discussed in several contexts in the book I hope the reader does not find this too frustrating The theory of action developed in this book especially in its latter half is a causalist one In a sense it can be regarded as an explication and refinement of a typical common sense view of actions and the mental episodes causally responsible for them It has of course not been possible to discuss all the relevant philosophical problems in great detail even if I have regarded it as necessary to give a brief treatment of relatively many problems Rather I have concentrated on some key issues and hope that future research will help to clarify the rest

Action and Responsibility Andrew Sneddon, 2006-01-27 This book is an exploration of what it takes for an event to count as an action I first became interested in this topic nearly a decade ago while working on a different topic I kept coming across philosophers making claims about the nature of action that seemed false or at least dubious to me As a consequence I turned to the philosophy of action directly to get to the heart of the matter I have wrestled with this territory ever since I hope that with this book I have finally earned the intuitions that put me at odds with the philosophers I was originally reading This book develops ideas in Part Two of my doctoral dissertation which I wrote at Queen's University in Kingston Ontario Canada I loved being at Queen's for both professional and personal reasons My thanks go to the Social Sciences and Humanities Research Council of Canada for financial support as a doctoral candidate Steve Leighton and Ronald de Sousa were readers for my dissertation They provided some early and invaluable challenges to the ideas developed here My deepest debt of gratitude is owed to David Bakhurst my supervisor I learned a lot from David this book would not be the same without his help

Causalism Carolina Sartorio, 2023 Carolina Sartorio argues for a naturalistic conception of agency and free agency that unifies them under the thesis that actions free actions are behaviors that have the right kinds of causes or explanations The result is a compelling view of practical agency taking in key metaphysical notions such as causation grounding absences and powers

Religion, Reality, and a Good Life Eberhard Herrmann, 2004 Do we have access to reality as it is conceptualized by us Against metaphysical realism and postmodern relativism Eberhard Herrmann develops a pragmatic realism It stresses reality as conceptualized reality while at the same time not ruling out objectivity Contents

include The Nature of the Enquiry The Philosophical Problem Formulated Religion and Philosophy Philosophy Reasons for and Against Metaphysical Realism Critique of Semantic Realism Pragmatic Realism Realism from an Internal Perspective Religious Metaphysical Realism Religious Metaphysical Anti Realism Religious Statements as Purported Assertions Christian Theism The Character of Religious Utterances Pragmatic Realism The Function of Religion Two Material Definitions of Truth Perspectives on Views of Life The Role of the Emotions in Our Conception of Reality Emotions and the Conceptualization of Values *Foundational Problems in the Special Sciences* Robert E. Butts, Jaakko Hintikka, 2012-12-06 The Fifth International Congress of Logic Methodology and Philosophy of Science was held at the University of Western Ontario London Canada 27 August to 2 September 1975 The Congress was held under the auspices of the International Union of History and Philosophy of Science Division of Logic Methodology and Philosophy of Science and was sponsored by the National Research Council of Canada and the University of Western Ontario As those associated closely with the work of the Division over the years know well the work undertaken by its members varies greatly and spans a number of fields not always obviously related In addition the volume of work done by first rate scholars and scientists in the various fields of the Division has risen enormously For these and related reasons it seemed to the editors chosen by the Divisional officers that the usual format of publishing the proceedings of the Congress be abandoned in favour of a somewhat more flexible and hopefully acceptable method of presentation Accordingly the work of the invited participants to the Congress has been divided into four volumes appearing in the University of Western Ontario Series in Philosophy of Science The volumes are entitled Logic Foundations of Mathematics and Computability Theory Foundational Problems in the Special Sciences Basic Problems in Methodology and Linguistics and Historical and Philosophical Dimensions of Logic Methodology and Philosophy of Science *Encyclopedia of Law and Society* David S. Clark, 2007-07-10 Introduction to and survey of the field of law and society Includes interdisciplinary perspectives on law from sociology criminology cultural anthropology political science social psychology and economics *The Attentional Shaping of Perceptual Experience* Francesco Marchi, 2020-01-23 This monograph presents a clear account of when and how attentional processes can shape perceptual experience This argument is based on the prediction error minimization model of the mind The author believes that the topic of attention should take a more central role in the debate about the influence of cognition on perception Inside he shows how this can be possible The hypothesis that cognition may shape perceptual experience has been traditionally labeled as the cognitive penetrability of perceptual experience Cognitive penetrability is relevant for several debates in philosophy and cognitive science It tackles the possibility of gathering genuine knowledge on the basis of perceptual information about the world delivered by sensory channels The problem the author notes is that if our previously acquired belief can shape current perceptual experiences such experiences cannot serve as an adequate source of justification in retaining those beliefs or even forming new ones He argues that cognitive penetration may sometimes happen through attentional processes but that its occurrence need not undermine

perceptual justification The book provides an overview of the cognitive penetrability debate The author discusses evidence that supports the occurrence of this phenomenon Overall this investigation offers readers a philosophical discussion of attention based on the biased competition theory It argues that attention is a property of mental representations that emerges from a metacognitive competition process

Divine Action and Modern Science Nicholas Saunders, 2002-10-31 Divine Action and Modern Science considers the relationship between the natural sciences and the concept of God acting in the world Nicholas Saunders examines the Biblical motivations for asserting a continuing notion of divine action and identifies several different theological approaches to the problem He considers their theoretical relationships with the laws of nature indeterminism and probabilistic causation His book then embarks on a radical critique of current attempts to reconcile special divine action with quantum theory chaos theory and quantum chaos As well as considering the implications of these problems for common interpretations of divine action Saunders also surveys and codifies the many different theological philosophical and scientific responses to divine action The conclusion reached is that we are still far from a satisfactory account of how God might act in a manner that is consonant with modern science despite the copious recent scholarship in this area

The Ethics of Belief Jonathan Matheson, Rico Vitz, 2014 How do people form beliefs and how should they do so This book presents seventeen new essays on these questions drawing together perspectives from philosophy and psychology The first section explores the ethics of belief from an individualistic framework It begins by examining the question of doxastic voluntarism i e the extent to which people have control over their beliefs It then shifts to focusing on the kinds of character that epistemic agents should cultivate what their epistemic ends ought to be and the way in which these issues are related to other traditional questions in epistemology The section concludes by examining questions of epistemic value of whether knowledge is in some sense primary and of whether the ethics of belief falls within the domain of epistemology or ethics The second section extends this traditional debate to issues concerning the social dimensions of belief formation It begins with essays by social psychologists discussing the past three decades of research in lay epistemics It continues by examining Humean Kantian and feminist insights into the social aspects of belief formation as well as questions concerning the ethics of assertion The section concludes with a series of essays examining a topic that is currently of great interest to epistemologists namely the significance of peer disagreement

community structure network dynamics diffusion epidemics and spreading processes resilience and control as well as all the main network applications including social and political networks networks in finance and economics biological and ecological networks and technological networks Computer Analysis of Images and Patterns Walter Kropatsch, Martin Kampel, Allan Hanbury, 2007-08-18 The refereed proceedings of the 12th International Conference on Computer Analysis of Images and Patterns are presented in this volume The papers cover motion detection and tracking medical imaging biometrics color curves and surfaces beyond two dimensions reading characters words and lines image segmentation shape image registration and matching signal decomposition and invariants and features and classification *Formal Methods: Foundations and Applications* Simone Cavalheiro, José Fiadeiro, 2017-11-17 This book constitutes the refereed proceedings of the 20th Brazilian Symposium on Formal Methods SBMF 2017 which took place in Recife Brazil in November December 2017 The 16 papers presented together with three invited talks were carefully reviewed and selected from 37 submissions They are organized in the following topical sections formal methods integration and experience reports model checking refinement and verification and semantics and languages The chapter Rapidly Adjustable Non Intrusive Online Monitoring for Multi core Systems is published open access under a CC BY 4 0 license *Information, Interaction, and Agency* Wiebe van der Hoek, 2005-07-22 Contemporary epistemological and cognitive studies as well as recent trends in computer science and game theory have revealed an increasingly important and intimate relationship between Information Interaction and Agency Agents perform actions based on the available information and in the presence of other interacting agents From this perspective Information Interaction and Agency neatly ties together classical themes like rationality decision making and belief revision with games strategies and learning in a multi agent setting Unified by the central notions Information Interaction and Agency the essays in this volume provide refreshing methodological perspectives on belief revision dynamic epistemic logic von Neumann games and evolutionary game theory all of which in turn are central approaches to understanding our own rationality and that of other agents Reprinted from Synthese 139 2 and 142 2 2004 Special Section Knowledge Rationality and Action On the Nature of Health L.Y Nordenfelt, 2013-03-09 GENERAL INTRODUCTION This study of the concept of health is an attempt to combine central ideas in modern philosophy of medicine with certain results from analytical action theory What emerges from the study is a concept of health based on an action theoretic foundation A person's health is characterized as his ability to achieve his vital goals The general conception is not new This study has been inspired by a number of scholars both ancient and modern The most important influences from the latter have been those of Georges Canguilhem H Tristram Engelhardt Jr Caroline Whitbeck and Ingmar Pern The novel aspect of this book consists of elaborations made to the general conception First the action theoretic platform is analysed in some detail The nature of the ability involved as well as the conditions for having that ability are specified Second the vital goals of man are given considerable attention Some previous attempts to define such vital goals are analysed and criticized A new characterization

is proposed in which the vital goals are conceptually linked to the notion of happiness A person s vital goals are such states of affairs as are necessary and together sufficient for his minimal happiness Third a number of consequences of this conception are observed and analysed One issue which is particularly emphasized is that of whether the concept of health is a theoretical or a normative concept

Power, Realism and Constructivism Stefano Guzzini, 2013 This book brings together Stefano Guzzini s research on power realism and constructivism framed by a new and substantial introductory chapter It explores the diversity of different schools and their intrinsic tensions and fallacies by analysing both theories and their assumptions and theorists following their intellectual paths

God, Passibility and Corporeality Marcel Sarot, 1992 Peeters 1992

Rethinking the Value of Humanity Sarah Buss, L. Nandi Theunissen, 2023 It is widely agreed that to treat some human beings as less worthy of concern and respect than others is to lose sight of their humanity But what does this moral blindness amount to The essays in this volume offer a wide range of competing yet overlapping answers to this question Some essays appeal to distinctively human capacities Others argue that our obligations to one another are ultimately grounded in self interest or certain shared interests or our natural sociability This rich selection of proposals encourages us to rethink some of our own deepest assumptions about the moral significance of being human
