Tools: a device, instrument or implement used to carry out a particular function.

Some of the commonly used ICT tools are: laptops, desktops, printers, scanners, software programs, data projectors, interactive teaching box and pen drives.

They are devices or objects that are used in the IT world, that is information and technology.

Bureaucratic administration can be defined as a system of management that follows a hierarchy where official duties are fixed.

Employees in this form of leadership are expected to follow specific rules and authority created by their superiors.
