Bat Conservation:

Bat Conservation Anna Berthinussen, Olivia C. Richardson, John D. Altringham, 2014-05-16 This book brings together scientific evidence and experience relevant to the practical conservation of bats The authors worked with an international group of bat experts and conservationists to develop a global list of interventions that could benefit bats For each intervention the book summarises studies captured by the Conservation Evidence project where that intervention has been tested and its effects on bats quantified The result is a thorough guide to what is known or not known about the effectiveness of bat conservation actions throughout the world Bat Conservation is the fifth in a series of Synopses that will cover different species groups and habitats gradually building into a comprehensive summary of evidence on the effects of conservation interventions for all biodiversity throughout the world By making evidence accessible in this way we hope to enable a change in the practice of conservation so it can become more evidence based We also aim to highlight where there are gaps in knowledge Evidence from all around the world is included If there appears to be a bias towards evidence from northern European or North American temperate environments this reflects a current bias in the published research that is available to us Conservation interventions are grouped primarily according to the relevant direct threats as defined in the International Union for the Conservation of Nature IUCN's Unified Classification of Direct Threats www.iucnredlist.org/technical-documents/classification-schemes Bats in Scotland Bat Conservation Trust, 2012 **Bat Conservation** Kim Williams, Erik D. Stoops, 2001 *Bat Conservation Project Book* Shirley Thompson, Tessa Lovatt-Smith, 1993 *Bat Surveys* Bat Conservation Trust, 2007-01 To conserve bats effectively and to meet national and international statutory obligations and agreements there is a clear need for quality controls and appropriate levels of bat survey to be established To date there has been uncertainty around the type of survey and level of survey effort needed when to survey and how these decisions are affected by the habitat time of year geographical location and the species present or likely to be present in the prospective survey area This book provides good practice guidance for those commissioning undertaking or reviewing bat surveys throughout the UK It is intended to bring about improvements in the standard and consistency of bat surveys and survey reports and ultimately lead to greater understanding about bats and improvements in their protection and conservation
