## **Conservation In Africa Peoples Policies And Practice:**

*Conservation in Africa* David Anderson, Richard H. Grove, 1987 This book provides a new inter disciplinary look at the practice and policies of conservation in Africa Bringing together social scientists anthropologists and historians with biologists for the first time the book sheds some light on the previously neglected but critically important social aspects of conservation thinking To date conservation has been very much the domain of the biologist but the current ecological crisis in Africa and the failure of orthodox conservation policies demand a radical new appraisal of conventional practices This new approach to conservation the book argues cannot deal simply with the survival of species and habitats for the future of African wildlife is intimately tied to the future of African rural communities Conservation must form an integral part of future policies for human development The book emphasises this urgent need for a complementary rather than a competitive approach It covers a wide range of topics important to this new approach from wildlife management to soil conservation and from the Cape in the nineteenth century to Ethiopia in the 1980s It is essential reading for all those concerned about people and conservation in Africa     Conservation in Africa : People, Policies and Practice Richard Grove David Anderson, 1987

*Practice Before Policy* Fred Kigenyi, Peter Gondo, John Mugabe, 2002 References pp 52 54     Environmental Planning, Policies and Politics in Eastern and Southern Africa M.A. Mohamed Salih, Shibru Tedla, 2016-07-27 Caught between underdevelopment poverty and environmental degradation and the need for exploiting their natural resources for development Africa has during the last two decades been engaged in a serious effort to integrate environment and development The nine case studies Botswana Ethiopia Kenya Lesotho Malawi Tanzania Sudan Uganda and Zambia presented in this book explore the complexity involved in environmental planning and policy in one of the World s poorest regions The authors articulate an informed debate with new conclusions and alternative policy recommendations     **The Politics of Nature and Science in Southern Africa** Maano Ramutsindela, Giorgio Miescher, Melanie Boehi, 2016-09-12 This book brings together recent and ongoing empirical studies to examine two relational kinds of politics namely the politics of nature i e how nature conservation projects are sites on which power relations play out and the politics of the scientific study of nature These are discussed in their historical and present contexts and at specific sites on which particular human environment relations are forged or contested This spatio temporal juxtaposition is lacking in current research on political ecology while the politics of science appears marginal to critical scholarship on social nature Specifically the book examines power relations in nature related activities demonstrates conditions under which nature and science are politicised and also accounts for political interests and struggles over nature in its various forms The ecological socio political and economic dimensions of nature cannot be ignored when dealing with present day environmental issues Nature conservation regulations are concerned with the management of flora and fauna as much as with humans Various chapters in the book pay attention to the ways in which nature science and politics are interrelated and also co constitutive of each other They highlight that

power relations are naturalised through science and science related institutions and projects such as museums botanical gardens wetlands parks and nature reserves

### **Ecological Policy and Politics in Developing Countries** Uday

Desai,1998-04-16 The interconnectedness of the global environment and finiteness of the earth's natural resources require an increased understanding of environmental and natural resource policy and politics in countries around the world This is especially true of industrializing countries where widespread ecological disturbances and rapid exploitation of natural resources are taking place Ecological Policy and Politics in Developing Countries provides an in depth study of ecological problems policies and politics in ten major industrializing countries Each chapter discusses the increasingly international context of domestic environmental policies and explores some of the powerful interests and institutional forces that contribute to ecological problems and shape the policies to deal with them in each country The authors identify some of the major impediments to both well designed environmental policies and their effective implementation The ten countries included here the Czech Republic China India Indonesia Mexico Nigeria Taiwan Thailand Slovakia and Venezuela cover five continents over half of the world's population and most of the major industrializing countries Contributors include Lester Ross Robert Cribb Jonathan Rigg and Philip Stott Juju Chin Shou Wang R K Sapru Stephen P Mumme Pablo Gutman Olusegun Areola and Catherine Albrecht

### Nomadic Peoples and Human Rights Jérémie

Gilbert,2014-03-26 Although nomadic peoples are scattered worldwide and have highly heterogeneous lifestyles they face

similar threats to their mobile livelihood and survival Commonly nomadic peoples are facing pressure from the predominant sedentary world over mobility land rights water resources access to natural resources and migration routes Adding to these traditional problems rapid growth in the extractive industry and the need for the exploitation of the natural resources are putting new strains on nomadic lifestyles This book provides an innovative rights based approach to the issue of nomadism looking at issues including discrimination persecution freedom of movement land rights cultural and political rights and effective management of natural resources Jeremie Gilbert analyses the extent to which human rights law is able to provide protection for nomadic peoples to perpetuate their own way of life and culture The book questions whether the current human rights regime is able to protect nomadic peoples and highlights the lacuna that currently exists in international human rights law in relation to nomadic peoples It goes on to propose avenues for the development of specific rights for nomadic peoples offering a new reading on freedom of movement land rights and development in the context of nomadism

*Wilderness or Home?* Asebe Regassa Debelo, 2016 This book critically probes into the politics of nature conservation and commodification Building on political ecology the book argues that conservation is used by state and non state actors as an instrument of controlling multidimensional spaces of indigenous communities The study creates a nexus between the hegemonic discourse of wilderness conservation in colonial Africa and Ethiopia s appropriation of this narrative and how it internally exported it to its peripheries It found out that the successive Ethiopian regimes the imperial military and developmental state share commonalities in using nature conservation both for political control of societies and their territories and as a means of economic extraction through commodification Asebe Regassa Debelo is a graduate of the Bayreuth International Graduate School of African Studies BIGSAS Series Contributions to African Research Beitrage zur Afrikaforschung Vol 66 Subject Sociology African Studies
