Economics, the Environment and Our Common Wealth James K. Boyce, 2013 If you're interested in the cutting edge of the very best thinking on economics and the environment it's right here Boyce has done a masterful job integrating issues of equity and ecological thinking into economics and presenting deep and important ideas accessibly with the latest research to back them up Not just recommended but essential Juliet Schor Boston College US and author of True Wealth How and Why Millions of Americans are Creating a Time rich Ecologically light Small scale High satisfaction Economy A colleague of mine puts it best when thinking about the fundamentals of the economy and the environment there is Pigou Coase and Boyce Boyce adds to traditional economics the critical understanding that social power is a determinant of the extent and spatial scale of environmental degradation In these essays on subjects ranging from housing and credit markets to agriculture and globalization Boyce mixes a data driven picture of unequal environmental protection with a keen and useful discussion of the many forms of social power that can help right the scales Eban Goodstein Bard College US This fascinating volume has at its heart a simple but powerful premise that a clean and safe environment is not a commodity to be allocated on the basis of purchasing power nor a privilege to be allocated through political power but rather a basic human right Building upon this premise James K Boyce explores the many ways in which economics can be refashioned into an instrument for advancing human well being and environmental health Comprising a decades worth of essays written since the publication of the authors pathbreaking book *The Political Economy of the Environment* 2002 this volume discusses a number of diverse environmental issues through an economists lens Topics covered include environmental justice disaster response globalization and the environment industrial toxins and other pollutants cap and dividend climate policies and agricultural biodiversity The first economics book to explore the idea that the environment belongs in equal measure to us all this pioneering volume will hold great interest for students professors and researchers of both economics and environmental studies Nature and Culture Sarah Pilgrim, Jules N. Pretty, 2010-09-23 There is a growing recognition that the diversity of life comprises both biological and cultural diversity But this division is not universal and in many cases has been deepened by

the common disciplinary divide between the natural and social sciences and our apparent need to manage and control nature This book goes beyond divisive definitions and investigates the bridges linking biological and cultural diversity The international team of authors explore the common drivers of loss and argue that policy responses should target both forms of diversity in a novel integrative approach to conservation thus reducing the gap between science policy and practice While conserving nature alongside human cultures presents unique challenges this book forcefully shows that any hope for saving biological diversity is predicated on a concomitant effort to appreciate and protect cultural diversity

Conservation Monique Borgerhoff Mulder, Peter Coppolillo, 2018-06-05 Nearly 90 percent of the earth's land surface is directly affected by human infrastructure and activities yet less than 5 percent is legally protected for biodiversity conservation and even most large protected areas have people living inside their boundaries In all but a small fraction of the earth's land area then conservation and people must coexist Conservation is a resource for all those who aim to reconcile biodiversity with human livelihoods It traces the historical roots of modern conservation thought and practice and explores current perspectives from evolutionary and community ecology conservation biology anthropology political ecology economics and policy The authors examine a suite of conservation strategies and perspectives from around the world highlighting the most innovative and promising avenues for future efforts Exploring highlighting and bridging gaps between the social and natural sciences as applied in the practice of conservation this book provides a broad practically oriented view It is essential reading for anyone involved in the conservation process from academic conservation biology to the management of protected areas rural livelihood development to poverty alleviation and from community based natural resource management to national and global policymaking

Prosperity in Rural Africa? Dan Brockington, Christine Noe, 2021 Prosperity in Rural Africa addresses questions related to tracking economic development in poor rural areas in the face of scarce data The chapters collect insights and experience into the dynamics of rural societies in Tanzania demonstrating that economic data can render development in these regions invisible

Ecotourism and Environmental Sustainability Dr Jennifer Hill, Dr Tim Gale, 2012-11-28 This book offers conceptual and practical insights into the complex interactions between ecotourism and the natural environment with consideration given to government policy marketing by suppliers consumer behaviour and visitor environmental management Illustrated by international case studies the roles of and interplay between tour operators their clients resource managers and local communities are examined This creates a comprehensive and insightful overview of the factors that work for and against the achievement of environmental sustainability in and through ecotourism The result is a critical examination of ecotourism and environmental sustainability that highlights ideas for best practice and proposes new directions for future research

Principles of Ecosystem Stewardship F Stuart Chapin III, Gary P. Kofinas, Carl Folke, 2009-06-12 The world is undergoing unprecedented changes in many of the factors that determine its fundamental properties and their influence on society These changes include climate the chemical composition of the atmosphere the demands

of a growing human population for food and fiber and the mobility of organisms and trade products cultural perspectives and information flows The magnitude and widespread nature of these changes pose serious challenges in managing the ecosystem services on which society depends Moreover many of these changes are strongly influenced by human activities so future patterns of change will continue to be influenced by society's choices and governance The purpose of this book is to provide a new framework for natural resource management a framework based on stewardship of ecosystems for human well being in a world dominated by uncertainty and change The goal of ecosystem stewardship is to respond to and shape change in social ecological systems in order to sustain the supply and opportunities for use of ecosystem services by society The book links recent advances in the theory of resilience sustainability and vulnerability with practical issues of ecosystem management and governance The book is aimed at advanced undergraduates and beginning graduate students of natural resource management as well as professional managers community leaders and policy makers with backgrounds in a wide array of disciplines including ecology policy studies economics sociology and anthropology

The Ethics of Anthropology and Amerindian Research Richard J. Chacon, Rubén G. Mendoza, 2011-12-15 The decision to publish scholarly findings bearing on the question of Amerindian environmental degradation warfare and/or violence is one that weighs heavily on anthropologists This burden stems from the fact that documentation of this may render descendant communities vulnerable to a host of predatory agendas and hostile modern forces Consequently some anthropologists and community advocates alike argue that such culturally and socially sensitive and thereby politically volatile information regarding Amerindian induced environmental degradation and warfare should not be reported This admonition presents a conundrum for anthropologists and other social scientists employed in the academy or who work at the behest of tribal entities This work documents the various ethical dilemmas that confront anthropologists and researchers in general when investigating Amerindian communities The contributions to this volume explore the ramifications of reporting and specifically of non reporting instances of environmental degradation and warfare among Amerindians Collectively the contributions in this volume which extend across the disciplines of archaeology anthropology ethnohistory ethnic studies philosophy and medicine argue that the non reporting of environmental mismanagement and violence in Amerindian communities generally harms not only the field of anthropology but the Amerindian populations themselves

Wildlife and Society Michael J. Manfredo, 2009 Winner of The Wildlife Society's 2009 Wildlife Publication Award for outstanding edited book As human populations around the world

continue to expand reconciling nature conservation with human needs and aspirations is imperative The emergence in recent decades of the academic field of human dimensions of fish and wildlife management is a proactive response to this complex problem Wildlife and Society brings together leading researchers in the range of specialties that are relevant to the study of human dimensions of fish and wildlife work around the globe to provide theoretical and historical context as well as a demonstration of tools methodologies and idea sharing for practical implementation and integration of practices Chapters document the progress on key issues and offer a multifaceted presentation of this truly interdisciplinary field The book presents an overview of the changing culture of fish and wildlife management considers social factors creating change in fish and wildlife conservation explores how to build the social component into the philosophy of wildlife management discusses legal and institutional factors examines social perspectives on contemporary fish and wildlife management issues Wildlife and Society is uniquely comprehensive in its approach to presenting the past present and future of human dimensions of fish and wildlife research and application It offers perspectives from a wide variety of academic disciplines as well as presenting the views of practitioners from the United States Europe Africa and Latin America It is an important new reference for anyone concerned with fish and wildlife management or environmental conservation and protection

Adaptive Cross-scalar Governance of Natural Resources Grenville Barnes, Brian Child, 2014-04-24 Natural resource governance is critical for linking poverty reduction and sustainable natural resource use This book brings together authors from various disciplines with extensive field experience to promote an integrative understanding of cross scale and adaptive governance in Africa and Latin America The authors make the case for reaching beyond decentralization to promote adaptive governance that serves local priorities but through interactions with local district national and global governance structures The book focuses on the governance of common pool resources such as forests wildlife water carbon and pasture resources in both Africa and Latin America This book will appeal to development practitioners and scholars concerned about the conservation of natural resources and the sustainable development of communities It synthesizes experience with the governance of different natural resources from a broad geographic perspective It also provides theoretical and practical suggestions for taking adaptive natural resource governance forward including participatory methods for measuring and monitoring governance

Equity and the Environment Robert C. Wilkinson, William R. Freudenburg, 2007-12-12 Soon after the first Earth Day in 1970 the academic world saw a virtual explosion of new interdisciplinary environmental programs many of which took explicit note for the first time of the fact that environmental problems are inherently social problems as well Even in the new programs however issues of equity and the environment were usually relegated to isolated classes on environmental ethics Today they still are
