Conservation of Crop Germplasm William L. Brown, 1984 *Plant Germplasm Maintenance & Storage* Jean A. Larson, 1989 Conservation of Crop Germplasm-An International Perspective W. L. Brown, 1984 *Quick Bibliography Series*, 1976 **Crop Genetic Resources of Africa: Proceedings of an international conference** F. Attere, N. Q. Ng, 1991 **The Use of Plant Genetic Resources** A. H. D. Brown, 1989-02-02 This 1989 volume stresses the way in which the pool of plant genetic resources provides vital raw material for producing new and improved crops **Managing Global Genetic Resources** National Research Council, Board on Agriculture, Committee on Managing Global Genetic Resources: Agricultural Imperatives, 1993-02-01 This anchor volume to the series Managing Global Genetic Resources examines the structure that underlies efforts to preserve genetic material including the worldwide network of genetic collections the role of biotechnology and a host of issues that surround management and use Among the topics explored are in situ versus ex situ conservation management of very large collections of genetic material problems of quarantine the controversy over ownership or copyright of genetic material and more **Plant Genetic Resources of Ethiopia** Jan Engels, J. G. Hawkes, M. Worede, 1991-03-21 One of the world centers of crop evolution and origin Ethiopia has long been recognized as an important area of diversity for several major and various minor crops Based on an international conference held in Addis Ababa this book describes how plant genetic diversity in Ethiopia is of vital importance in breeding new varieties of crops with desirable characteristics such as increased resistance to pests and diseases and greater adaptation to heat and drought The three main sections in the book consider the Ethiopian center of diversity germ plasm or genetic material collection and conservation in Ethiopia and the evaluation and utilization of Ethiopian genetic resources A broad range of food and feed crops and plants of medicinal and industrial importance are discussed both at a national and international level A brief account of conservation strategies and gene bank problems unique to Ethiopia is also given The importance of Ethiopia's plant genetic resources to world agriculture has been demonstrated on more than one occasion Plant breeders geneticists and botanists throughout the world will therefore find this unique book a valuable source of information and an essential reference work **The Ex Situ Conservation of Plant Genetic Resources** J.G. Hawkes, Nigel Maxted, B.V. Ford-Lloyd, 2012-12-06 It is a distressing truism that the human race during the last millennium has caused the exponential loss of plant genetic diversity throughout the world This has had direct and negative economic political and social consequences for the human race which at the same time has failed to exploit fully the positive benefits that might result from conserving and exploiting the world's plant genetic resources However a strong movement to halt this loss of plant diversity and enhance its utilisation for the benefit of all humanity has been underway since the 1960's Frankel and Bennett 1970 Frankel and Hawkes 1975 This initiative was taken up by the Convention on Biological Diversity CBD 1992 that not only expounds the need to conserve biological diversity but links conservation to exploitation and development for the benefit of all Article 8 of the Convention clearly states the need to

develop more effective and efficient guidelines to conserve biological diversity while Article 9 along with the FAO International Undertaking on Plant Genetic Resources promotes the adoption of a complementary approach to conservation that incorporates both ex situ and in situ techniques *Proceedings, Citrus Germplasm Conservation Workshop* ,1999
