William J. Sutherland,Peter N. M. Brotherton,Zoe G. Davies,Nancy Ockendon,Nathalie Pettorelli,Juliet A. Vickery,2020-04-16 Conservation research is essential for advancing knowledge but to make an impact scientific evidence must influence conservation policies decision making and practice This raises a multitude of challenges How should evidence be collated and presented to policymakers to maximise its impact How can effective collaboration between conservation scientists and decision makers be established How can the resulting messages be communicated to bring about change Emerging from a successful international symposium organised by the British Ecological Society and the Cambridge Conservation Initiative this is the first book to practically address these questions across a wide range of conservation topics Well renowned experts guide readers through global case studies and their own experiences A must read for practitioners researchers graduate students and policymakers wishing to enhance the prospect of their work making a difference This title is also available as Open Access on Cambridge Core *Science and Heritage* Great Britain: Parliament: House of Lords: Science and

Technology Committee,2006-11-16 The conservation of cultural artefacts such as buildings works of art and books presents a fascinating rich and diverse range of scientific challenges and the UK has a high reputation in the field based in large part on past achievements However the Committee s report finds that our national standing is now under threat as the sector is fragmented and under valued and the DCMS has completely failed to grasp the threat to heritage science and thus to conservation The Department s emphasis on widening public access to our cultural heritage is a laudable objective but this policy needs to be balanced by effective conservation based on sound science if we are to leave a sustainable cultural heritage for the benefit of future generations The Committee also calls on the heritage sector to come together in developing a broad based national strategy for heritage science to be championed at departmental level by the newly appointed DCMS Chief Scientific Adviser and co ordinated administratively by English Heritage drawing on input from all bodies active in the sector including those in Scotland Wales and Northern Ireland Conservation Science and Action William J.
