## **Constitution Of Capital Essays On Volume 1 Of Marxs Capital:**

**The Constitution of Capital** R. Bellofiore, N. Taylor, 2004-03-25 The essays in this collection address specific themes in Volume I of Marx's Capital. Although the essays can be read independently they present complementary perspectives on issues at the cutting edge of recent scholarship on Marx's work. Although all Parts of Capital I are discussed the book is not intended to be a textbook. It will be read by specialists in the field as well as graduate students in the history of economic thought, political economy and philosophy. Essays on Marx's Capital Geert Reuten, 2024-05-13 In this book Geert Reuten presents 21 of his previously published essays on the three volumes Marx's Capital dating from 1991-2019. The essays largely take the form of a summary of Marx's text a Volume or its Parts or Chapters followed by an appreciation and when required a reconstruction. The book thus offers an overview of each of the three volumes of Capital including their interconnection as well as a focus on specific Parts of Capital. Throughout the general overviews and more focused analyses Reuten emphasises Marx's systematic dialectical method and his monetary value form analysis. Marx's Capital: An Unfinishable Project?, 2018-04-10 For almost 150 years scholars have been debating how to interpret Marx's seminal work Capital while they had access to just some of Marx's economic manuscripts. This changed in 2013 with the publication of all the known economic writings of Marx and Engels in the Marx Engels Gesamtausgabe MEGA. One can now reconstruct the lines of intellectual development and one can also explore in detail how Friedrich Engels went about compiling volumes II and III of Capital from the vast legacy of manuscripts that Marx left behind after his death in 1883. It should be possible now to develop a more comprehensive and accurate picture of Marx as an economic theoretician. This volume of essays aims to initiate this process. Contributors are Christopher J. Arthur, Matthias Bohlender, Timm Graumann, Jorge Grespan, Gerald Hubmann, Heinz D. Kurz, Marcel van der Linden, Kenji Mori, Fred Moseley, Lucia Pradella, Geert Reuten, Regina Roth and Carl Erich Vollgraf. Marx's Capital, Method and Revolutionary Subjectivity Guido Starosta, 2015-11-24 In Marx's Capital Method and Revolutionary Subjectivity Guido Starosta develops a materialist inquiry into the social and historical determinations of revolutionary subjectivity. Through a methodologically minded critical reconstruction of the Marxian critique of political economy from the early writings up to the Grundrisse and Capital this study shows that the outcome of the historical movement of the objectified form of social mediation which has turned into the very alienated subject of social life i.e. capital is to develop as its own immanent determination the constitution of the self-abolishing working class as a revolutionary subject. A crucial element in this intellectual endeavour is the focus on the intrinsic connection between the specifically dialectical form of social science and its radical transformative content. The Spectre of Capital: Idea and Reality Christopher J. Arthur, 2022-07-18 What is money? What is capital? The Spectre of Capital tackles such fundamental questions at a deep philosophical level. It argues that the modern world is ruled by a spectre the spectre of capital. This insight is rooted in an original combination of the ideas of Marx and Hegel. It presents the most sophisticated argument to date for the homology

thesis namely that the order of Hegel's logical categories and that of the social forms addressed by Marx's Capital share the same architectonic. The systematic dialectical presentation shows how capital becomes a self-sustaining power. *Marx's Capital and Hegel's Logic*, 2014-04-17. This book provides a wide-ranging and in-depth reappraisal of the relation between Marx's economic theory in Capital and Hegel's Logic by leading Marxian economists and philosophers from around the world. The subjects dealt with include systematic dialectics, the New Dialectics, materialism vs idealism, Marx's inversion of Hegel, Hegel's Concept logic, universality, particularity, singularity, Hegel's Essence logic, essence, appearance, Marx's levels of abstraction of capital in general and competition, and capital as Hegelian Subject. The papers in this volume were originally presented at the 22nd annual meeting of the International Symposium on Marxian Theory at Mount Holyoke College in August 2011. The twelve authors are divided between seven economists and five philosophers, as is fitting for the interdisciplinary subject of the relation between Marx's economic theory and Hegel's logic. Contributors are Chris Arthur, Riccardo Bellofiore, Roberto Fineschi, Gastón Caligaris, Igor Hanzel, Juan I. Carrera, Mark Meaney, Fred Moseley, Patrick Murray, Geert Reuten, Mario Robles, Tony Smith, and Guido Starosta. *How Language Informs Mathematics*, Dirk Damsma, 2019-11-11. In *How Language Informs Mathematics*, Dirk Damsma shows how Hegel's and Marx's systematic dialectical analysis of mathematical and economic language helps us understand the structure and nature of mathematical and capitalist systems. More importantly, Damsma shows how knowledge of the latter can inform model assumptions and help improve models. His book provides a blueprint for an approach to economic model building that does away with arbitrarily chosen assumptions and is sensitive to the institutional structures of capitalism. In light of the failure of mainstream economics to understand systemic failures like the financial crisis and given the arbitrary character of most assumptions in mainstream models, such an approach is desperately needed. *The unity of the capitalist economy and state*, Geert Reuten, 2018-12-24. In *The unity of the capitalist economy and state*, Geert Reuten offers a systematic exposition of the capitalist system, showing that the capitalist economy and the capitalist state constitute a unity. In its critique of contemporary economics, the book argues that in order to comprehend the capitalist system, one requires a full synthetic exposition of the economic and state institutions and processes necessary for its continued existence. A synthetic approach also reveals a range of components that are often obscured by partial analyses. In its systematic character, Reuten's work takes inspiration from Marx's provisional outline of the capitalist system in Capital, while also addressing fields that Marx left unfinished, such as the capitalist state. **Marx: Key Concepts**, Riccardo Bellofiore, Tommaso Redolfi Riva, 2024-01-18. This scholarly book conducts an extensive exploration into the central ideas of Karl Marx, focussing on the key concepts that have defined his thought and legacy. Bringing together a wealth of internationally renowned contributors across different generations, *Marx: Key Concepts* analyses in depth Marx's theories of surplus value, money, and capital, and their reception in classical and contemporary economic, sociological, and philosophical debates. **Marx's Temporalities**, Massimiliano

Tomba,2012-11-09 The book rethinks key categories of Marx's work beyond any philosophy of history showing how the plurality of temporal layers that are combined and come into conflict in the violently unifying historical dimension of modernity are central to Marx's thought     *Reading Marx in the Information Age* Christian Fuchs,2015-10-23 Renowned Marxist scholar and critical media theorist Christian Fuchs provides a thorough chapter by chapter introduction to Capital Volume 1 that assists readers in making sense of Karl Marx's most important and groundbreaking work in the information age exploring Marx's key concepts through the lens of media and communication studies via contemporary phenomena like the Internet digital labour social media the media industries and digital class struggles Through a range of international current day examples Fuchs emphasises the continued importance of Marx and his work in a time when transnational media companies like Amazon Google and Facebook play an increasingly important role in global capitalism Discussion questions and exercises at the end of each chapter help readers to further apply Marx's work to a modern day context     *A Critical Theory of Economic Compulsion* Werner Bonefeld,2023-03-20 This book explores a variety of interconnected themes central to contemporary Marxist theory and its further development as a critical social theory Championing the critique of political economy as a critical theory of society and rejecting Marxian economics as a contradiction in terms it argues instead that economic categories are perverted social categories before identifying the sheer unrest of life the struggle to make ends meet as the negative content of the reified system of economic objectivity With class struggle recognised as the negative category of the cold society of capitalist wealth which sees in humanity a living resource for economic progress the author contends that the critique of class society finds its rational solution in the society of human purposes that is the classless society of communist individuals A theoretically sophisticated engagement with Marxist thought A Critical Theory of Economic Compulsion will appeal to scholars of social and political theory with interests in critical theory and post capitalist imaginaries     Money and Capital Laurent Baronian,2022-12-30 This book renews the Marxian theory of the general equivalent by highlighting the contradiction between the social functions of money unit of account means of circulation and its private functions store of value accumulation It draws a clear distinction between the monetary base and the commodity base of money and thus avoids the confusion between money and credit on the one hand and money and capital on the other which are found in other heterodox monetary theories It accounts for the new forms of monetary constraints weighing on the banking systems under and inconvertible fiat money standard the class relationships underlying the interventions of monetary authorities and governments and presents a definition of the state which emphasises its mode of intervention on the collective and social conditions of capitalisms which are money and labour power The emphasis on the contradiction between these two types of monetary functions gives a more fundamental account of the conflict between the international role and the national origin of the dollar than the Triffin dilemma which has been constantly overcome or deferred by the US since 1960 The author explains this evolution by demonstrating how from the 1950s onwards the dollar began a process of

acquiring relative autonomy from the US economy By focusing on the role and international functions of the dollar he offers a fresh look at the 2008 crisis and its consequences for the international monetary system but also for a possible post capitalist financial system which post revolutionary Russia experimented with in the form of the NEP and whose contemporary implementation is foreshadowed by the rise of digital central bank currencies The book thereby provides a necessary update to the tools and concepts inherited from Marx for analysing and understanding money capital and the state **Revitalizing**

**Marxist Theory for Today's Capitalism** Paul Zarembka, Radhika Desai, 2011-11-07 Amidst a capitalist crisis that has upturned mainstream orthodoxies this title underscores the importance of historical and materialist understandings of capitalist economies It exposes the limitations of neoclassical economics endogenous growth theory and how it in fact gropes for understandings well established within Marxism *The Human and the Meat* Chiara Stefanoni, 2025-09-19 Over 85

billion animals are killed in slaughterhouses yearly to sustain a profit driven meat production system devastating animals workers and the environment How did we get here How has capitalist society reshaped human animal relations Elaborating a novel materialist and intersectional framework Chiara Stefanoni conceptualizes the social form of human animal relations and its centrality within the interconnected structure of domination in capitalist societies especially in relation to gender and class Through a historical analysis of industrial slaughterhouses the study reveals how the human animal divide and meat based diet are not timeless facts but concrete social solutions crucial for the reproduction of capitalist society **The**

**Mismeasure of Wealth** Patrick Murray, 2016-09-07 *The Mismeasure of Wealth* Essays on Marx and Social Form gathers Patrick Murray's essays reinterpreting Marx and Marxian theory published since his *Marx's Theory of Scientific Knowledge* 1988 along with a previously unpublished essay and an introduction Murray's essays concentrate on Marx the historical materialist the investigator of historically specific social forms of wealth and labour There is no production in general the production of wealth always involves specific social forms and purposes that matter in many ways Marx's attention to the dynamics and far reaching consequences of historically specific social forms in particular those that are constitutive of the capitalist mode of production sets him off from classical political economy and traditional Marxism In probing Marx's dialectical accounts of the commodity value money surplus value wage labour and capital *The Mismeasure of Wealth* establishes Marx's singular relevance for critical social theory today **Value without Fetish** Elena Louisa

Lange, 2021-06-22 *Value without Fetish* presents the first in depth English language study of the influential Japanese economist Uno K z's 1897 1977 theory of pure capitalism in the light of the method and object of Marx's *Critique of Political Economy* A close analysis of the theories of value production and reproduction and crisis in Uno's central texts from the 1930s to the 1970s reveals his departure from Marx's central insights about the fetish character of the capitalist mode of production a departure that Lange shows can be traced back to the failed epistemology of value developed in Uno's earliest writings By disavowing the complex relation between value and fetish that structures Marx's critique Uno adopts the

paradigms of neoclassical theories to present an apology rather than a critique of capitalism      *False Moves in Philosophy and Social Theory* Patrick Murray, Jeanne Schuler, 2023-09-12 This book considers diverse philosophical topics unified by the identification of false moves commonly found in modern philosophy mainstream Anglo American philosophy and social theory The authors expose the sources of fundamental problems that recur in philosophy basic problems with what the authors call factoring philosophy Factoring philosophy fails to attend to the phenomenological task of determining when what is distinguishable is separable and when not Consequently factoring philosophy makes phenomenological mistakes false moves when it treats as separable what is only distinguishable Analytic philosophy is prone to false moves when it fails to recognize that phenomenology is the necessary complement to analysis There is nothing wrong with analysis we might as well give up thinking as give up analysis and nothing is wrong with the values prized by analytic philosophy As Hegel observed philosophizing requires above all that each thought should be grasped in its full precision and that nothing should remain vague and indeterminate Ultimately this book contends that false moves prevail in philosophical analysis and social theory when they neglect their phenomenological foundations      Capital in the Mirror Dan Krier, Mark P. Worrell, 2020-04-01 Aesthetic objects crafted as poetic reflections of the contradictory worlds that they inhabit are simultaneously theorized and theorizing In *Capital in the Mirror* eminent critical theorists explore the aesthetic dimension for reflective visions of capital that are difficult to obtain through even the most rigorous statistical analyses Chapters address inequality alienation ideology warfare and other problems of contemporary capitalism through the cultural prisms of Herman Melville Thomas Mann Charles Dickens J W Goethe Friedrich Hölderlin Walt Whitman Bertolt Brecht and science fiction cinema Famous narrative elements in their works such as Ahab's pursuit of the white whale in Melville's *Moby Dick* demonic production and perverse desire in Mann's *Doctor Faustus* socially electrified bodies of Whitman's *Leaves of Grass* and dystopian projections of current sci fi cinema are theorized as stylistically distorted reflections of social life within capital The authors reveal theoretical powers latent within these condensed images that prefigure the dark dynamics of capitalism Focusing on dark images of domination and also prophetic images of transformation the book points the way toward emancipation social regeneration and human flourishing      Capitalism's Future , 2016-05-30 Capitalism's Future Alienation Emancipation and Critique frames 21st century economic and social possibilities in a dialogue between two forms of critical social theory Marx's critique of political economy that analyzes capitalism and the critique of political psychology that analyzes authoritarianism Contributions from social theorists in sociology philosophy and cultural studies are brought together to dissect and critique capitalist crises left liberalism left Thatcherism resistance to risk pooling idealist philosophy undemocratic social character status wages and authoritarian spectacles Throughout Marx's centrality to critical social theory is confirmed both alone and in powerful combination with Adorno Durkheim Dubois Lacan Veblen Weber and others This book outlines conjoined critiques of commodity fetishism and authority fetishism as the emancipatory agenda of 21st century critical theory
