Self-Determination of Peoples and Plural-ethnic States in Contemporary International Law Edward McWhinney, 2007-09-30 In analysing the contemporary International Law principles as to Self determination of Peoples Dr Edward McWhinney gives a special attention to the crisis today of multinational states put together usually hurriedly and without proper regard for foreseeable later problems in establishing a plural constitutional order system by the military victors in World War I in the imposed Peace treaties of 1919 The key to successful exercise of a claimed right to self determination is Recognition by other existing states in the World Community and today also admission to the United Nations In examining the classical rules on Recognition of States and the recent developed practice as to U N Membership the author signals the continuing antinomy of Law and Power and how high political concerns for their own conceived national interests influence or control decisions on application of the legal ground rules in concrete cases by heads of government and their foreign ministries The author notes at the same time the attempt to consolidate and codify existing rules on a political regional basis most evident perhaps with the European Union today In addressing the claimed new legal category of failed state with the concomitant asserted legal right of other states to intervene if necessary unilaterally or outside the United Nations to impose their own corrective measures he suggests that

the postulated failure in such cases may frequently stem less from problems inherent in the state concerned than from past hegemonial actions by outside states in pursuit of their own geopolitical interests in the region A special concluding chapter draws on the empirical record of the historical often trial and error experience of the Succession states to the Versailles treaties settlements and to the assorted acts of Decolonisation of the former European Imperial Colonial powers *New Frontiers of State Constitutional Law* James A. **Originalism, Federalism, and the American Constitutional Enterprise** Edward A. Purcell, 2007-12-28 In this lively historical examination of American federalism a leading scholar in the field refutes the widely accepted notion that the founding fathers carefully crafted a constitutional balance of power between the states and the federal government Edward A Purcell Jr bases his argument on close analysis of the Constitution's original structure and the ways that structure both induced and accommodated changes over the centuries There was no clear agreement among the founding fathers regarding the true nature of American federalism Purcell contends nor was there a consensus on correct lines dividing state and national authority Furthermore even had there been some true original understanding the elastic and dynamic nature of the constitutional structure would have made it impossible for subsequent generations to maintain any original or permanent balance The author traces the evolution of federalism through the centuries focusing particularly on shifting interpretations founded on political interests He concludes with insights into current issues of federal power and a discussion of the grounds on which legitimate decisions about federal and state power should rest *Handbook of Public Administration, Third Edition* W.
