Constraints on Error Variables in Grammar Philip A. Luelsdorff,1986-01-01 An in depth investigation of constraints on error variables in grammar with special reference to bilingual misspelling orthographies A corpus of errors is examined in minute detail In the course of this analysis received categories and standard assumptions about linguistic errors are critically scrutinized some are sharpened and others are abandoned Many conceptual snarls having to do with the notion of error in linguistic performance are untangled in this book *A Bibliography on Writing and Written Language* Konrad Ehlich,Florian Coulmas,Gabriele Graefen,2011-06-01 The bibliography offers information on research about writing and written language over the past 50 years No comprehensive bibliography on this subject has been published since Sattler s 1935 handbook With a selection of some 27 500 titles it covers the most important literature in all scientific fields relating to writing Emphasis has been placed on the interdisciplinary organization of the bibliography creating many points of common interest for literacy experts educationalists psychologists sociologists linguists cultural anthropologists and historians The bibliography is organized in such a way as to provide the specialist as well as the researcher in neighboring disciplines with access to the relevant literature on writing in a given field While necessarily selective it also offers information on more specialized bibliographies In addition an overview of norms and standards concerning script and writing will prove very useful for non professional readers It is therefore also of interest to the generally interested public as a reference work for the humanities
