Heilman,2018-02-06 An encounter with the death of another is often an occasion when the bereaved need to be sustained in their loss relieved of the anxiety that the meeting with death engenders and comforted in their grief It is a time when those left behind often seek to redress wrongs in themselves or in the relationships that death has shaken and upset In both collective and individual responses to the trauma of encountering death we witness efforts to counter the misfortune and to explain the meaning of the loss to turn memory into blessing to reconcile life with death to regenerate life and redeem both the bereaved and the dead Sometimes loss may transform the bereaved in ways that lead to growth and maturity other times a loss leads to unrelenting anger or melancholia There may be a variety of spiritual expressions that the bereaved experience in their time of loss but there appears to be some common elements in all of them Overtime survivors feelings are

transformed into growing exploration of the spiritual a profound sense of rebirth newfound feelings of self mastery or confidence and a deeply held conviction that life goes on The contributions to this volume are based on a conference held in New York on the first anniversary of September 11 2001 Contributors include Peter Metcalf Robert Jay Lifton Ilana Harlow Robert A Neimeyer Samuel Heilman and Neil Gillman This sensitive and heartfelt volume relates specifically to issues of death bereavement and mourning in the aftermath of the attack on the World Trade Center but the applications to other individual and catastrophic events is obvious The contributions do not simply explore how people deal with bereavement or are psychologically affected by extreme grief they address how people can try to find meaning in tragedy and loss and strive to help restore order in the wake of chaos The multidisciplinary perspectives include those of anthropology psychology theology social work and art

Handbook of the Sociology of Emotions Jan Stets, Jonathan H. Turner, 2007-02-25 For almost thirty years sociologists have increasingly theorized about and conducted research on human emotions Surprisingly it was not until the 1970s that the sociology of emotions emerged as a coherent field of inquiry What makes this late date surprising is that it is now obvious that human behavior interaction and organization are driven by emotions It was an immense oversight for emotions to be de emphasized in sociological theorizing and research for most of its 175 year history Since the 1970s however the study of emotions has accelerated and is now at the forefront of sociological analysis This book is designed to bring the reader up to date on the theory and research traditions that have proliferated in the analysis of human emotions Key figures who have carried the sociology of emotions to its current level of prominence review their own work and the work of others who have made contributions to a particular approach to the study of emotions The outcome is a comprehensive book that serves as a primer on the cutting edge of sociological work in what is obviously a key dynamic in human affairs The first section of the book addresses the range of emotions and how they can be classified the neurological underpinnings of emotions and the effect of gender on emotions The second section reviews the prominent sociological theories of emotions including theories emphasizing power and status rituals identity and self psychoanalytic dynamics exchange expectation states and evolution While there is little integration among these theories this state of affairs will not last forever The third section addresses theory and research on specific emotions such as love jealousy and envy empathy sympathy anger grief and the moral emotions While this list does not exhaust the range of human feeling they are central emotions that drive human behavior interaction and social organization The last section explores how the study of emotions has added new insight into other subfields within sociology such as the study of the workplace health and social movements These chapters illustrate how the sociology of emotions can provide new research and theory for the large numbers of specialties within sociology Although no book can completely cover a field even a relatively new one like the sociology of emotions this *Handbook of the Sociology of Emotions* comes close to being comprehensive The reader will come away with a greater appreciation for how far the sociology of emotions has developed and prospered over the last thirty years

Epiestems of Death Pratham Parekh, 2017-01-01 Death and dying experiences are not common across human race because humans do not share common cultural heritage and physical environment The fact of death thus can be considered as socially constructed fact abounded by idiosyncratic religious beliefs and rituals existing within social life It is almost impossible to have common consensual understanding of death and dying This book tries to investigate various sources of knowledge about death in multiple disciplines from sociological lenses *Trouble with Death* Finn Bowring, 2025-04-25 Are we accepting of death or in denial of it What insights can we gain from the ways death has been imagined theorized and organized throughout Western social and intellectual history that might help us respond meaningfully to the climate emergency This interdisciplinary study begins with the role of tragedy in Greek antiquity and examines European attitudes toward death especially their entanglement with colonial atrocities and politically organized killings Drawing on the work of philosophers sociologists historians and psychoanalysts this is a resounding call to confront our responsibility for the lives of others and the future of life itself amid the existential threats of the Anthropocene *The Extreme Gone Mainstream* Cynthia Miller-Idriss, 2019-12-03 This book comes at a time that could hardly be more important Miller Idriss opens up a completely new approach to understanding the processes of violent radicalization through subcultural products and will surely become a standard work in the study of right wing extremism Daniel Koehler founder and director of the German Institute on Radicalization and De Radicalization Studies dies *Death* Geoffrey Scarre, 2014-12-05 What is death and why does it matter to us How should the knowledge of our finitude affect the living of our lives and what are the virtues suitable to mortal beings Does death destroy the meaningfulness of lives or would lives that never ended be eternally and absurdly tedious Should we reconcile ourselves to the fact of our forthcoming death or refuse to go gently into that good night Can death really be an evil if after death we no longer exist as subjects of goods or evils How should we respond to the deaths of others and do we have any duties towards the dead These and many other questions are addressed in Geoffrey Scarre's book which draws upon a wide variety of philosophical and literary sources to offer an up to date and highly readable study of some major ethical and metaphysical riddles concerning death and dying **Young People's Experiences of Loss and Bereavement** Jane Ribbens McCarthy, 2006-11-16 This intellectually stimulating book demonstrates the authors are well read and possess elegant synthesizing skills I found the authors to be wise and insightful and their presentation of ideas complex and balanced Omega Journal of Death and Dying What it does extremely well and indeed uniquely is provide a wide and deep exploration of the extensive often bewildering and conflicting literature about the experiences of young people loss and bereavement drawing from it useful conclusions as well as identifying gaps in the research and pointing to possible ways forward BereavementCare What is the significance of death in contemporary society How do young people come to terms with loss and bereavement Evidence shows that bereavement is an issue that touches the lives of the majority of young people and yet it is often left to the province of specialists This timely book provides the first in depth interdisciplinary

overview of our knowledge and theorizing of bereavement and young people including the voices of young people as well as major statistical studies of cohorts of young people followed over many years Taking a broad sweep across a great range of relevant literatures this book breaks new ground in spanning theoretical issues and empirical research to examine critically what we know about this important but often neglected issue It also features in depth original case studies of young people who have experienced bereavement and uses these as a basis for exploring how loss and bereavement impact upon young people s lives *Young People s Experiences of Loss and Bereavement* provides essential reading on issues of loss change and bereavement for students researchers and professionals across a wide range of health and social care disciplines especially those involving family and youth work **Death, Gender and Sexuality in Contemporary Adolescent Literature**

Kathryn James,2009-02-10 Considering the trope of woman death the eroticizing of death and the ways in which the gendered subject is represented in dialogue with the processes of death dying and grief James shows how representations of death in young adult literature are invariably associated with issues of sexuality gender and power **The Body** Nicholas J. Fox,2012-02-27 This is the first volume in Polity s new Key Themes in Health and Social Care series providing applied introductions to core issues and topics for allied health care professionals *Time of Death* Glenys Caswell,2024-04-12

Addressing a gap in social science research to explore the meanings understandings and experiences of time at life s most critical point this book takes a thoughtful sociological approach to questions about how humans use and experience time in relation to when someone dies **The Ages of Superman** Joseph J. Darowski,2012-01-27 Since Superman first appeared on the cover of Action Comics 1 in 1938 the superhero has changed with the times to remain a relevant icon of American popular culture This collection explores the evolution of the Superman character and demonstrates how his alterations mirror historical changes in American society Beginning with the original comic book and ending with the 2011 Grounded storyline these essays examine Superman s patriotic heroism during World War II his increase in power in the early years of the Cold War his death and resurrection at the end of the Cold War and his recent dramatic reimagining By looking at the many changes the Man of Steel has undergone to remain pertinent this volume reveals as much about America as it does about the champion of Truth Justice and the American Way Changing Ways of Death in Twentieth-century Australia

Patricia Jalland,2006 The first general history of death and bereavement in twentieth century Australia Starts with the culture of death denial from 1920 to 1970 and discusses increased openness about death since the 1980s *Organized Secularism in the United States* Ryan T. Cragun,Christel Manning,Lori L. Fazzino,2017-11-07 There has been a dramatic increase in the percentage of the US population that is not religious However there is to date very little research on the social movement that is organizing to serve the needs of and advocate for the nonreligious in the US This is a book about the rise and structure of organized secularism in the United States By organized secularism we mean the efforts of nonreligious individuals to build institutions networks and ultimately a movement that serves their interests in a predominantly religious

society Researchers from various fields address questions such as What secularist organizations exist Who are the members of these organizations What kinds of organizations do they create What functions do these organizations provide for their members How do the secularist organizations of today compare to those of the past And what is their likely impact on the future of secularism For anyone trying to understand the rise of the nonreligious in the US this book will provide valuable insights into organized efforts to normalize their worldview and advocate for their equal treatment in society

Materialities of Passing Peter Bjerregaard, Anders Emil Rasmussen, Tim Flohr Sørensen, 2016-03-17 Passing is a common euphemism for the death of a person as he or she is said to pass away or pass on This open ended saying has at its heart a notion of transformation from one state to another which in turn grants the possibility of grasping or approximating the passage of time and the materiality of death and decay This book begins with the idea that since all material things whether animals human beings objects or buildings undergo some form of passing then the specific transformation in these passages and the materiality actively given to it can offer us a grasp of otherwise precarious temporalities It examines how human beings strive to relate to the temporal dimension of death and decay by giving new shape and direction to being and by examining its natural transformations Focusing on the materiality of passing and thereby the relationship between embodiment temporality and death Materialities of Passing offers rich case studies from Europe Papua New Guinea South Africa and the Russian Far East for exploring the material spatial and directional aspects of the very interface between life and death As such it will appeal to scholars of anthropology death studies archaeology philosophy and cultural studies

Governing Death and Loss Stephen Conway, 2011 Political economic social cultural and technological changes have led to profound transformations in the ways that death and loss are perceived and managed in contemporary society Over the last few decades the long term shift to chronic illness as a major causal factor has significantly increased the time scale of dying Most people die in institutions and care is typically medical Many communities and ordinary citizens now relinquish control and involvement to experts in the last stages of life However at global and local levels new institutional arrangements are emerging to govern the changing face of death and a new model is being developed to counter claims of the creeping medicalisation of death and dying Emphasising the international context of the issues involved this book illustrates the

interlinking nature of society death and loss and gives examples of governance that promotes the empowerment participation and the increasing need for the involvement of ordinary people and communities in differing social and cultural contexts All chapters are written at an accessible level and will appeal to a wide readership Part 1 of the book provides a sociological understanding of the governance of death and loss in international and historical contexts and the implications for practice Part 2 provides examples of good practice drawing upon a sociological understanding
