Constructing Alternative World Futures Reordering The Planet:

Constructing alternative world futures Louis René Beres, 1977 *Reordering the Planet* Louis René Beres, Harry R. Targ, 1974 **Planning Alternative World Futures** Louis René Beres, Harry R. Targ, 1975 Addresses the concept and design of alternative futures for such urgent world problems as international and national security systems populations diminishing natural resources environmental deterioration and the widening gap between rich and poor Cover 4 *Peace and World Order Studies* Barbara J. Wien, 1978-01-01 *Land Use Scenarios* Alan W. Shearer, David A. Mouat, Scott D. Bassett, Michael W. Binford, Craig W. Johnson, Justin A. Saarinen, Alan W. Gertler, Julide Koracin, 2009-01-14 Any alteration of the natural processes occurring on a piece of land will have expected as well as unanticipated effects and those effects have little regard for arbitrary human boundaries Consequently it is not enough for land managers to consider only how they might maintain the parcels for which they are responsible they must also anticipate **The Global Community Yearbook of International Law and Jurisprudence 2022** Giuliana Ziccardi Capaldo, 2023-09-05 The 2022 edition of The Global Community Yearbook of International Law and Jurisprudence constitutes the only thorough annual survey of major developments in international courts General Editor Giuliana Ziccardi Capaldo selects excerpts from important court opinions supported by contributors who provide expert guidance on those cases The topical organization and subject index make the thorough comprehensive content easy to navigate *The Strategy of Nonviolent Defense* Robert J. Burrowes, 2015-10-26 Because of the way in which the history of nonviolence has been marginalized relatively few people have a sense of the rich history of nonviolent struggle or realize that it can be systematically planned and applied Nevertheless the historical record illustrates that nonviolent struggle is a powerful form of political action But can it be effective against military aggression The Strategy of Nonviolent Defense answers this question in the affirmative by first defining the notion of social cosmology the four mutually reinforcing features that determine the character of any society It then devotes attention to strategies for dealing with conflict in particular to developing a strategic theory and framework for planning a strategy of nonviolent defense In order to develop this theory Burrowes synthesizes insights drawn from the strategic theory of Carl von Clausewitz the nonviolence of Mahatma Gandhi and recent human needs and conflict theory **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1976 **The Person and the Common Life** James Hart, 1992-10-31 This Husserl based social ethics claims that the properly philosophical life i e one lived within the noetic noematic field is not cut off from action Indeed the ethical and political dimensions of the person are disclosed through various reductions At the passive synthetic level as well as at the higher founded levels of personal constitution a basic sense of will emerges the telos of which is a godly intersubjective self ideal This truth of will is inseparably an ought and an is involving moral categoriality as a way of letting the good of others be part of one's own Both moral categoriality and the polis actuate the latent first person plural dative of manifestation which emerges with a common

world. Thereby they actuate also senses of the common life which can develop to community as a higher order person. This leads to a eutopian anti-statist theory of the polis and common good which has affinity with some communitarian anarchist and Green views. *The National Interest and the Human Interest* Robert C. Johansen, 2014-07-14. In an effort to determine the extent to which the United States contributes to the creation of a preferred system of world order, Robert Johansen considers the country's performance against a framework of four major global values: peace, economic wellbeing, social justice, and ecological balance. Martin Rochester, 2010-10. This book distills the essential elements of world politics, both the enduring characteristics as well as the revolutionary changes that may be altering the very fabric of the centuries-old state system. Author J. Martin Rochester explores all the important topics that one would expect to find in an IR text: war, diplomacy, foreign policy, international law, and organization, the international economy, and more, but injects fresh perspectives on how globalization and other contemporary trends are affecting these issues. In addition, the author does so through a highly engaging, lively writing style that will appeal to today's students. *Fundamental Principles of International Relations* is a tightly woven treatment of international politics, past and present, drawing on the latest academic scholarship while avoiding excessive jargon and utilizing pedagogical aids while avoiding clutter. Rochester ultimately challenges the reader to think critically about the future of a post-Cold War and post-9/11 world that is arguably more complex, if not more dangerous, than some previous eras, with the potential for promise as well as peril. **Bulletin of the Atomic Scientists**, 1981-02.

Between Peril and Promise J. Martin Rochester, 2011-11-08. In this concise introduction to international law, students gain a clear appreciation for how politics shapes the development of international law and how international law shapes political relations between states. Throughout the book, Rochester takes this complex subject and makes it accessible with his vibrant, easy-to-read prose. **International Relations** Margot Light, A.J.R. Groom, 2016-10-06. *International Relations* offers a guide to the state of International Relations theory during the Cold War. It provides a critical commentary on the literature of the time and covers all aspects of this discipline in detail. [Surviving Amid Chaos](#) Louis René Beres, 2016-04-04. Now facing a genuinely unprecedented configuration of existential threats, Israel's leaders must decide whether to continue their deliberate nuclear ambiguity policy, the bomb in the basement, as they consider such urgent and overlapping survival issues as regional nuclear proliferation, Jihadist terror group intersections with enemy states, rationality or irrationality of state and sub-state adversaries, assassination or targeted killing, preemption, and the probable effects of a Cold War II between Russia

and the United States Israel must develop a strategic posture that will involve a suitably coherent and refined nuclear strategy This book critically examines Israel s rapidly evolving nuclear strategy in light of these issues and explains how it underscores the overarching complexity of strategic interactions in the Middle East **The Time Dimension** T K.

Das,1990-04-17 This is the first comprehensive bibliography of temporal scholarship research on the subject of time and the phenomenon of time itself As the author notes in his introduction the nature of research insights on the subject of time is difficult to comprehend within the confines of any specific discipline since relevant materials are scattered throughout the literature in numerous scholarly fields By bringing together the most significant published works in a wide variety of disciplines this unique compendium enables scholars and researchers to look beyond their own particular area of expertise when selecting appropriate resource materials Throughout the focus is on the time dimension itself as a problematic or researchable phenomenon rather than on narrow topics such as time management time series analysis or forecasting Organized by discipline the work begins with an initial chapter that lists general works on the time dimension Nineteen chapters then list works in particular disciplines ranging from anthropology and culture to biology economics futures studies history linguistics management studies psychology and more The final chapter lists miscellaneous entries which could not be categorized into any of the specific disciplinary headings Within each chapter entries are arranged alphabetically by author or editor Nearly all sources are from scholarly journals and books *The Quest For A Just World Order* Samuel S

Curso de Relações Internacionais José Adelino Maltez,2002-10-17 Este texto fruto das reflexões e da experiência do autor

enquanto professor de Relações Internacionais na Faculdade de Direito da Universidade de Lisboa. Nele procura integrar de forma interdisciplinar as matérias da ciência do direito das relações internacionais e da política com o micro da técnica e do saber fazer e o macro da procura da sabedoria a que muitos dão o nome de filosofia por acreditar que só assim se pode aceder a uma complexa questão da globalização da mundialização ou da planetarização. E opta claramente por um estudo integrado dos vários discursos sobre o tema bem como pela procura dos valores que mobilizam os indivíduos e os povos em torno de conceitos do mundo e da vida ou de cosmovisões cientes que este não é um mundo livre de valores. **International Relations** Frederic S. Pearson, J. Martin Rochester, 1992
