Constructing Post-Soviet Geopolitics in Estonia Pami Aalto, 2013-09-13 This work examines the construction of post Soviet political space geopolitical discourses and boundaries in Estonia Making use of innovative methodological solutions such as Q methodology its analysis includes in depth interviews that elucidate a variety of issues through human experience and subjective perception such as Estonian Russian border disputes of the 1990s inter ethnic issues and national integration and security As Estonia is one of the frontline EU accession countries and is queuing for membership of NATO the book raises broad questions of post Soviet geopolitics in the Baltic region and across Europe Indeed Pami Aalto argues that small states such as Estonia should be understood as active participants in post Soviet and European geopolitics and not simply pawns in a superpower environment

European Union and the Making of a Wider Northern Europe Pami Aalto, 2006-09-27 This book is the first comprehensive study of how and why the European Union has enlarged to become northern Europe's leading power Pami Aalto presents a new approach to the under theorized field of EU foreign policy studies showing how since 1990 the EU has enlarged to include Finland Sweden Estonia Latvia Lithuania and Poland and also incorporated the former East Germany He also examines how this northern expansion has led the EU to reflect on relations with Russia and its north western regions This unique study includes a fresh approach to the under theorized field of EU foreign policy key empirical material including hundreds of documents interviews and field experiments in depth case studies of relations between the EU Nordic states Baltic states and Russia with its north western regions This is essential reading for all students of European politics Russian studies and international relations

Global and Regional Problems Vilho Harle, 2016-04-22 Distinctive due to explicit and systematically developed links between international relations IR and related disciplines this book addresses global and regional interactions and the complex policy problems that often characterise this agenda Such enhanced communication is crucial for improving the capacity of IR to engage with concrete issues that today are of high policy relevance for international organisations states diplomats mediators and humankind in general Whilst the authors do not reject the present IR they offer a wider research agenda with new directions intended not only for those IR scholars who are unsatisfied with the analytical power of the current discipline but also for those working on international foreign global or interregional issues in other disciplines and fields of research In this instance they pay particular attention to linking up with peace research international political economy IPE and cultural political economy CPE sociology political geography development studies linguistics cultural studies environmental studies and energy research gender studies and traditions of area studies

Russia's Energy Policies Pami Aalto, 2012-01-01 Russia is an increasingly important player in global energy markets yet its policies are under researched and little understood This collection represents an important and sophisticated contribution to the debate While much of the commentary on Russian energy consists of generalizations about Russia's political strategy this work lifts the lid and looks inside the process through which

Russian energy policies are designed and implemented It brings together essays by top specialists in the field and makes a conscious effort to integrate the various disciplines of politics economics and geography by developing a model of the cognitive frames through which the policy process is shaped It addresses both domestic and international dimensions of the problem and gives equal weight to traditional customers in Europe and new markets in Asia Peter Rutland Wesleyan University US The book explains Russian energy policies instead of a policy It portrays a picture with multiple policy drivers including institutional regional and federal environmental and commercial The study markedly improves our understanding of the multifaceted nature of Russian energy policy a topical and complex issue This is a highly commendable book that should be included in the reading lists of anyone with an interest in the role of energy in Russia s political economy or energy matters more generally Kim Talus University College London Australia Russia s vast energy reserves and its policies towards them have enormous importance in the current geopolitical landscape This important book examines Russia s energy policies on the national interregional and global level It pays particular attention to energy policy actors ranging from state federal and regional actors to energy companies and international financial actors and organizations The book models the formation of Russia s energy policies in terms of how energy policy actors perceive and map their policy environment The case studies cover federal regional and environmental aspects of Russian energy policy Russia s energy relations with Europe and the CIS North East Asia the globalization of Russian oil companies and the political economy of Russian energy It is found that there are several concurrent energy policies in contemporary Russia and that this situation is likely to continue These policies are conducted primarily from the business frame perspective while notions of energy superpower Russia are found more ambiguous Russia s Energy Policies will benefit advanced master s level students doctoral students researchers policy makers and practitioners The book will be a great resource for advanced international relations political economy international business and globalisation courses alongside energy policy courses as well as area studies courses on Russian post Soviet and European politics and environmental politics

Post-Cold War Identity Politics Marko Lehti, David James Smith, 2003 This book highlights the existence of co existing and to some extent competing region building projects in northern Europe

The Great Power (mis)Management Alexander Astrov, 2016-03-03 Drawing on the empirical case of the Russian Georgian war of 2008 the book explores the theoretical underpinnings of the idea of great power management first articulated within the English School of International Relations The contributors to the volume approach this idea from a variety of theoretical perspectives ranging from policy analysis to critical theory but all of them are addressing the same question What does the Russian Georgian war of 2008 tell us about great power management as an institution of international society

Heartlands of Eurasia Anita Sengupta, 2009-07-16 Heartlands of Eurasia explores how received metageographical knowledge informs the understanding of global processes and is subsequently transformed into geopolitical reasoning with foreign policy implications It provides a detailed examination of writings from both within the region and outside that look into the significance of Halford Mackinder's heritage in the context of a vastly changed world situation In particular it attempts to examine how policy makers and strategic thinkers have used these geopolitical concepts as justification for their policy in the region Finally it attempts an analysis of the extent to which this policy thinking was translated into practice While the study looks into how the vision of the pivotal significance of a vast expanse of land finds its echoes in contemporary narratives it also underlines the very creative ways in which Mackinder's ideas have been reinterpreted in keeping with the changing global dynamics Making use of the way in which the region has been traditionally defined and the way in which the people defined themselves the study brings into focus a debate on the usefulness of region or area based studies that are located in geographical imaginations Anita Sengupta uses this connection to examine the following issues geopolitical imaginations and their relevance in identifying areas in the present context the intersection between how areas are defined from an outsider perspective and how people define themselves the extent to which these definitions have influenced policy and the possibility or feasibility of the development of alternative geostrategic discourses Mackinder himself did not specify the geographical area identified first as the pivot and later the heartland but his ideas were focused on the closed heartland of Euro Asia an area that was unassailable by sea power This study therefore centers its debates around the Eurasian space in general though the focus is on the Central Asian region and Uzbekistan in particular The book is ideal for specialists working on the Eurasian region graduate students interested in geopolitics as well as Eurasian and Central Asian studies and undergraduates studying political science and international relations

The European Union and Border Conflicts Thomas Diez, Mathias Albert, Stephan Stetter, 2008-03-27 It is generally assumed that regional integration leads to stability and peace This book is a systematic study of the impact of European integration on the transformation of border conflicts It provides a theoretical framework centred on four pathways of impact and applies them to five cases of border conflicts Cyprus Ireland Greece Turkey Israel Palestine and various conflicts on Russia's border with the EU The contributors suggest that integration and association provide the EU with potentially powerful means to influence border conflicts but that the EU must constantly re-adjust its policies depending on the dynamics of each conflict Their findings reveal the conditions upon which the impact of integration rests and challenge the widespread notion that integration is necessarily good for peace This book will appeal to scholars and students of international relations European politics and security studies studying European integration and conflict analysis

The Changing Geopolitics of Eastern

Europe Dr A H Dawson, Rick Fawn, 2013-11-05 This work covers the uncertain geopolitical situation of some countries of Central and Eastern Europe including some of those which are hoping to enter the European Union in the near future some for which entry is far off and some which may never seek or be eligible for membership **The Estonian Foreign Policy Yearbook** ,2004 Analysing Kazakhstan's Foreign Policy Luca Anceschi, 2020-03-16 This book investigates the roles that ideas and constructs associated with Eurasia have played in the making of Kazakhstan's foreign policy during the Nazarbaev era This book delves into the specific Eurasia centric narratives through which the regime headed by Nursultan Nazarbaev imagined the role of post Soviet Kazakhstan in the wider Eurasian geopolitical space Based on substantive fieldwork and sustained engagement with primary sources the book unveils the power implications of Kazakhstani neo Eurasianism arguing that the strengthening of the regime's domestic power ranked highly in the list of objectives pursued by Kazakhstani foreign policy between the collapse of the Soviet Union and Nazarbaev's apparent withdrawal from the Kazakhstani political scene 19 March 2019 This book ultimately is a study of inter state integration which makes use of a rigorous methodological approach to assess different incarnations of post Soviet multilateralism from the Commonwealth of Independent States to the more recent and highly controversial Eurasian Economic Union This book offers a ground breaking analysis of Kazakhstani foreign policy in the Nazarbaev era It will be of interest to students and scholars of Central Asian Politics International Relations and Security Studies Bibliographic Index ,2008 **Vergangenheitsdiskurse in der Ostseeregion: Die Sicht auf Krieg, Diktatur, Völkermord und Vertreibung in Russland, Polen und den baltischen Staaten** Jörg Zägel, 2007 **Forthcoming Books** Rose Arny, 2003-04 **International Studies** P. Aalto, V. Harle, S. Moisio, 2011-07-27 Presenting International Studies as a wide plural and inherently interdisciplinary field of research this book shows its links with philosophy peace research history geography globalization studies international political economy political psychology sociology and social theory linguistics strategic or war studies and anthropology **The Return of Geopolitics in Europe?** Stefano Guzzini, 2012-10-25 The end of the Cold War demonstrated the historical possibility of peaceful change and seemingly showed the superiority of non realist approaches in International Relations Yet in the post Cold War period many European countries have experienced a resurgence of a distinctively realist tradition geopolitics Geopolitics is an approach which emphasizes the relationship between politics and power on the one hand and territory location and environment on the other This comparative study shows how the revival of geopolitics came not despite but because of the end of the Cold War Disoriented in their self understandings and conception of external roles by the events of 1989 many European foreign policy actors used the determinism of geopolitical thought to find their place in world politics quickly The book develops a constructivist methodology to study causal mechanisms and its comparative approach allows for a broad assessment of some of the fundamental dynamics of European security *Choice* ,2004 **NewsNet** American Association for the Advancement of Slavic Studies, 2003 **ICCEES International Newsletter** ,2003
