Constructing The Beginning Discourses Of Creation Science:

Constructing the Beginning Simon Locke, 2014-04-04 In *Constructing the Beginning* Simon Locke offers a new approach to considering the enigma of creation science using the perspective of discourse analysis. Using the publications of the British Creation Science Movement to perform a detailed analysis of the creationist case, Locke demonstrates that the discourses and rhetorics used by natural and social scientists are also employed by non-scientists. Out of this study, a view of science as a cultural resource develops, questioning the adequacy of perceived sociological wisdom that sees science as the source and embodiment of cultural rationalization. As a case study of the use of science as a discursive resource in everyday life, *Constructing the Beginning* speaks to scholars of discourse analysis, constructionism, rhetorics, and the public understanding of science. It will also be of great interest to scholars in the areas of cultural studies, sociology of scientific knowledge, and of religion, postmodernism, and sociological theory.

Additional Copy Creation science is the target of much attack these days from both within and outside of the orthodox scientific community. This book, however, takes a different approach. It is not an attack on creationism nor is it a defense. The author's interest is not in creationism at all but rather it is in the questions of the role and significance of science in modernity or the public understanding of science. Locke's approach to this issue is a discursive and rhetorical one. Creationism is treated as a case study of the argumentative engagement between science and non-science, which in his view is as central to the commonsense lifeworld of modernity as much as it is to the lives of its intellectuals. An important dimension of the public meaning of science in modernity is its limits and its relations with other modes of thought and belief which continue to survive as discourses in the wider culture. Creationism is merely one example of this general feature. The book begins with a discussion of the current issues in the public understanding of science in relation to traditional sociological views of the impact of science on modernity. This is examined through rationalization and the contrasting view derived from the sociology of scientific knowledge which points to the likelihood of a much more complex and variable relationship than rationalization proposes. It continues with an argument and detailed analysis that focuses on three main points: the problem of a competing account of reality, the world in the form of evolution, the problem of competing accounts of the Bible, the Word in the form of different versions of Christianity, and the realization that both of these problems must be managed together in such a way that creationists' own versions of the world and of the Word are compatible, a compatibility achieved through a discursive syncretism. The final chapter brings together the strands of the argument to further develop the implications of the dilemma of science for the public understanding of science through the idea of science as a cultural resource and its possible relation to other such cultural resources within modernity such as Christianity. It is suggested that much so-called anti-science could be made sense of in these terms and proposes further research in this direction.

American Creationism, Creation Science, and Intelligent Design in the Evangelical Market Benjamin L. Huskinson, 2020-08-19 In this compelling and thoroughly researched book, Benjamin

Huskinson demonstrates that just as there is broad diversity within evangelicalism so too there is broad diversity among creationists His work on the Intelligent Design movement is superb and he prompts me to rethink my long held conviction that Intelligent Design is merely the most recent evolutionary form of creationism This is a very fine book Randall Balmer Author of *Evangelicalism in America* and writer host of *In the Beginning The Creationist Controversy* Benjamin Huskinson's study of American creationism will be an eye opener for those who sit on the opposite side of the evolution debate He shows that far from being a unified assault on Darwinism the campaign was actually a sequence of separate movements launched by rival evangelical groups competing for influence within their own community Peter Bowler Author of *Monkey Trials and Gorilla Sermons Evolution and Christianity from Darwin to Intelligent Design* A thoughtful and careful analysis that throws as much light on the diversity of American evangelicalism as it does on Christian attitudes to evolutionary theory Huskinson offers a smart analysis of religious anti evolution movements which neither demonises nor ridicules but seeks to understand the tenets and beliefs of a movement far more complex and multivalent than most of us appreciate A must read for science communicators Philippa Levine Walter Prescott Webb Chair in History and Ideas University of Texas at Austin USA This book explores the cultural history of anti evolution efforts in the United States from 1960 to the present refuting several popular narratives about creation science in evangelical America Separating theological terms like creationism from cultural movements such as creation science and intelligent design in an evangelical marketplace of ideas it contests assumptions that evangelical movements against evolution are homogeneous and it argues that intelligent design is not an off shoot of the creation science movement It demonstrates that the rationale of creationist groups is relational as well as ideological showing that the social function of American creationism which is to establish the boundaries of orthodox religion is key to understanding the competing strategies of creation science organisations

Evolution on British Television and Radio Alexander Hall, 2021-09-30 This book charts the history of how biological evolution has been depicted on British television and radio from the first radio broadcast on evolution in 1925 through to the 150th anniversary of Charles Darwin's *Origin of the Species* in 2009 Going beyond science documentaries the chapters deal with a broad range of broadcasting content to explore evolutionary themes in radio dramas educational content and science fiction shows like *Doctor Who* The book makes the case that the dominant use in science broadcasting of the evolutionary epic a narrative based on a progressive vision of scientific endeavour is part of the wider development of a standardised way of speaking about science in society during the 20th century In covering the diverse range of approaches to depicting evolution used in British productions the book demonstrates how their success had a global influence on the genres and formats of science broadcasting used today

Studies in Language and Social Interaction Jennifer Mandelbaum, 2003-01-30 This collection offers empirical studies and theoretical essays about human communication in everyday life The writings come from many of the world's leading researchers and cut across academic boundaries engaging scholars and teachers from such disciplines as communication

sociology anthropology linguistics and education Chapters emphasize empirical qualitative studies of people's everyday uses of talk in interaction and they feature work in such areas as sociolinguistics conversation analysis discourse analysis and ethnography The volume is dedicated to and highlights themes in the work of the late Robert Hopper an outstanding scholar in communication who pioneered research in Language and Social Interaction LSI The contributors examine various features of human interaction such as laughter vocal repetition and hand gestures occurring naturally within a variety of settings at a dinner table a doctor's office an automotive repair shop and so forth whereby interlocutors accomplish aspects of their interpersonal or institutional lives resolve a disagreement report bad medical news negotiate a raise and more all of which may relate to larger social issues including police brutality human spirituality death and optimism The chapters in this anthology show that social life is largely a communicative accomplishment and that people constitute the social realities experienced every day through small and subtle ways of communicating carefully orchestrated but commonly taken for granted In showcasing the diversity of contemporary LSI research this volume is appropriate for scholars and graduate students in language and social interaction communication sociology research methods qualitative research methods discourse analysis conversation analysis linguistics and related areas

The Cultures of Creationism Leslie Carlin, 2017-11-28 Even in a world where secular scientific discoveries and assumptions have come to dominate the lives of so many people

science cannot be said to have rendered religion obsolete Since the nineteenth century one particular debate has been of central importance in apparent conflicts between science and religion that of evolutionist versus creationist views on human origins This book presents both the history and the contemporary dimensions of disputes over the emergence of our species It focuses on the ways in which conservative Protestants have either opposed or attempted to appropriate the languages and methods of secular scientists in defence of a Genesis based account of the origins of life Leading authorities on creationism and creation science are brought together from such disciplines as anthropology sociology religious studies history and philosophy This is the first book to attempt a comprehensive comparative survey of creationist movements around the English speaking world A central question addressed by the contributors is why anti evolutionist ideas appear to flourish in some social and cultural contexts but are ridiculed in others

Ibss: Sociology: 1999 ,2000-12-07 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge on the social sciences

Creationism in Europe Stefaan Blancke,Hans Henrik Hjermitsev,Peter C Kjærgaard,2014-12-15 A history of Creationism in Europe from its reception to its rise and the response that has followed For decades the creationist movement was primarily situated in the United States Then in the 1970s American creationists found their ideas welcomed abroad first in Australia and New Zealand then Korea India South Africa Brazil and elsewhere including Europe where creationism plays an expanding role in public debates about science policy and school curricula In this the first comprehensive history of creationism in Europe leading historians philosophers and scientists narrate the rise of and response to scientific creationism creation science intelligent design and organized antievolutionism in countries and religions throughout Europe Providing a map of creationism in Europe the authors chart the history of creationist activities and strategies Over the past forty years creationism has spread swiftly among European Catholics Protestants Jews Hindus and Muslims even as anti creationists sought to halt it Anti evolution messages gained such widespread approval in fact that in 2007 the Parliamentary Assembly of the Council of Europe passed a resolution advising member states to defend and promote scientific knowledge and firmly oppose the teaching of creationism as a scientific discipline on an equal footing with the theory of evolution Creationism in Europe offers an introduction to the cultural history of modern Europe the variety of worldviews in Europe and the interplay of science and religion in a global context It will be of interest to students and scholars in the history and philosophy of science religious studies and evolutionary theory as well as policy makers and educators concerned about the spread of creationism in our time

Re-crafting Rationalization Simon Locke,2016-03-23 Re crafting Rationalization contributes to debates relating to the public understanding of science regarding the conceptualization of the relationship between science and the public It challenges the prevailing science centred or top down framework that currently informs notions of public engagement and knowledge transfer offering an alternative that remains firmly grounded in the discourse of classical social theory By

proposing an alternative version of rationalization to the standard interpretation of Weber's disenchantment thesis this book establishes the public understanding of science as a matter of fundamental sociological concern As such it redefines this field to emphasize public meanings of science engaging with a range of topics of major interest to the public and popular meaning of science including science and religion science fiction and fantasy fringe science and media representations of science Combining rhetorical analysis with ethnomethodology and membership categorization analysis the book outlines the basis of a new approach to the sociology of knowledge in the light of which Weber's rationalization thesis is radically re-crafted in relation to studies of scientists' discourse the rhetoric of science popularization and public usages of science This re-crafted rationalization is applied in a series of detailed empirical studies of enchanted science creationism and intelligent design Scientology and reflexive spirituality superhero comics and mundane mysteries Fortean discourse conspiracy theory and media representations of the scientist in the case of Jack the Ripper Re-crafting Rationalization therefore redresses a significant shortcoming in contemporary social theory which currently overlooks or misrepresents important public meanings of science whilst excluding popular culture from attention With profound implications for the ways in which we make sense of developments involving science this book will be of interest not only to sociologists and social theorists but also to those interested in popular culture and subcultures and the history philosophy and sociology of science

Constructing Professional Discourse Concepción Orna-Montesinos, 2012-01-17 This book explores the fascinating role that language plays in the construction of non-verbal objects by mapping out the ontological meaning of the specialised concepts and the domain-specific knowledge embedded in them In doing so it provides a comprehensive linguistic insight into the discourse of professional domain-specific communities and hence into the communication practices and procedures of those communities In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under-researched interrelatedness of the discursive and professional practices of a discipline Specifically this book provides readers with an integrative multi-perspective approach to the study of professional domain-specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological engineering The book starts from the analysis of domain-specific texts as final written products with specific lexico-grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach

provides fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced *Perspectives on Science and Christian Faith*,2002 **The Construction of Professional Discourse** B.L. Gunnarsson,Per Linell,Bengt Nordberg,2014-09-19

Internationally there is increasing research and interest in the processes of the production and reception of texts for specific purposes and in the historical development of genres and registers within Languages for Specific Purposes LSP psycholinguistics sociolinguistics anthropology and the sociology of science Studies of professional communication have traditionally been biased towards the written medium and have been carried out with little if any connection to LSP Disciplinary boundaries and interest groupings have thus kept these different approaches to the study of professional communication and interaction separate The editors of this volume unite these different perspectives and approaches and bring together recent research from linguistics sociolinguistics ethnography of communication anthropology and sociology to provide an up to date analysis of different varieties of professional discourse and their historical development Chapters written by leading exponents in the field deal with the core theoretical issue of how language written genres and spoken discourse are constructed as a successive and continuous interplay between language and social realities The volume includes chapters on the moral construction of discourse in the social care profession the discourse of dispute negotiation narrative accounts in clinical research doctor patient interaction legal and other kinds of institutional discourse A key text for students of applied linguistics and sociolinguistics at both advanced undergraduate and MA levels Science and its Publics Alice R. Bell. Sarah R. Davies,Felicity Mellor,2021-02-03 The relationship between science and its publics has concerned commentators since science itself began Yet in recent years questions of how and how should science and society interact have come to particular prominence A field of practice initially dubbed public understanding of science and later rebranded as public engagement with science and technology has blossomed But although academic studies have informed the development of this practical field to date there has been little opportunity to take stock of the full breadth and variety of academic analyses of science communication In an attempt to reveal the richness of the nascent field of science communication studies this volume presents critical interdisciplinary analyses of some of the many ways in which science intersects with its publics From children s science books to computer advertising news media to lab talk public engagement to science fiction the sites modes and meanings of public science are explored Contributions draw on historical cultural science and media studies All however follow science through popular culture taking critical science studies out of the lab and into society **Forthcoming Books** Rose Arny,1998-06 Nanotechnology Challenges Joachim Schummer,Davis Baird,2006 This book introduces the latest methods for the controlled growth of nanomaterial systems The coverage includes simple and complex nanomaterial systems ordered nanostructures and complex nanostructure arrays and the essential conditions for the controlled growth of nanostructures with different morphologies sizes compositions and microstructures

The book also discusses the dynamics of controlled growth and thermodynamic characteristics of two dimensional nanorestricted systems The authors introduce various novel synthesis methods for nanomaterials and nanostructures such as hierarchical growth heterostructures growth doping growth and some developing template synthesis methods In addition to discussing applications the book reviews developing trends in nanomaterials and nanostructures **Knowledges in**

Publics Lorraine Locke, Simon Locke, 2013-10-30 This book presents a series of cutting edge research studies in the field of public understanding of science with particular focus on aspects of informal science education In addition to providing up to date overviews of current thinking about how best to conceptualise the field it offers a range of primary research studies examining informal public venues of science and mediations of scientific knowledge and representation With contributions from some leading international researchers the book provides discussions and case studies addressing the USA UK and Europe Africa and India offering insight and assessment of key issues on a global footing Challenging extant notions of science public relations in terms of deficiency engagement and knowledge transfer the book taken as a whole argues for approaches that take seriously the multiplicity of publics and that recognise the centrality of social relations and social contexts to forms of knowledge and ways of knowing **The Social Construction of Climate Change** Mary E.

Pettenger, 2016-02-24 Individuals international organizations and states are calling for the world to confront climate change Efforts such as the Kyoto Protocol have produced intractable disputes and are deemed inadequate This volume adopts two constructivist perspectives norm centred and discourse to explore the social construction of climate change from a broad theoretical level to particular cases The contributors contend that climate change must be understood from the context of social settings and that we ignore at our peril how power and knowledge structures are generated They offer a greater understanding of why current efforts to mitigate climate change have failed and provide academics and policy makers with a new understanding of this important topic
